

ABOUT ANTEK AUTOMATION

NOT A TECH STARTUP. A BUSINESS THAT UNDERSTANDS **YOURS.**

AI automation built by someone who's spent 30+ years solving technology problems for UK businesses. Voice agents, chatbots and workflow automation, built to fit how you actually work — not how a template says you should.

30+ YRS IN TECH · **CERTIFIED RETELL AI PARTNER** · **FSB MEMBER** · **ANDOVER HQ**

FROM PRINT MANAGEMENT TO AI

- | | | |
|-----------|----------------------------------|--|
| 01 | Technician, Managed Print | The person businesses called when things broke. Learned how offices actually work, not how they look on paper. |
| 02 | Service manager | Saw the patterns: time lost to the same manual processes and communication gaps, year after year. |
| 03 | Solutions specialist | Designed systems that saved businesses thousands of hours and tens of thousands of pounds. |
| 04 | Founder, Antek | Built the fix when AI voice and chat finally got good enough to solve those problems affordably. |

NO PITCH. NO JARGON. NO TEMPLATES.

LISTEN FIRST. BUILD TO FIT. HONEST ABOUT LIMITS.

01

Listen first

We understand how your business actually runs before proposing anything. What calls come in, what customers ask, where time disappears.

02

Build to fit

Every agent, chatbot and workflow configured for your terminology, your booking process, your edge cases. Not a template with your logo on it.

03

Honest about limits

AI isn't magic. Some conversations need a human. If automation isn't right for your problem, we'll tell you, not sell you.
