Secure Waste Bin

Ligature-Safe Secure Waste Unit

A purpose-built clinical waste solution designed for healthcare environments that demand maximum safety, hygiene, and secure disposal.

The Secure Waste Bin

Wybone's new mental health waste bin has been engineered specifically for environments where patient safety and security are critical. Available in either 28, 42 or 80-litre capacity, the unit incorporates a protected internal mechanism that prevents access to its contents.

The disposal aperture is activated via a fully concealed slimline foot pedal, enabling touch-free operation and maintaining hygiene standards. A secure lockable door further ensures controlled access for authorised personnel only.

Product Features:

- Rounded corners with minimal ligature risk
- Hands free, Pedal activated chute only to minimise infection.
- Bagless internal liner - no bag required and simple to clean
- Lockable door with anti-prise tab for secure access
- Restricted access to internal contents
- All mechanical components safely enclosed
- Flat-back design for secure, flush wall mounting
- Anti-microbial coated exterior for infection control

Sizes

Size	28 Litre	42 Litre	80 Litre
Width	265mm	475mm	475mm
Depth	230mm	270mm	270mm
