

Laboratory Fit Out

1. One Stop Shop

From stripout to handover our refurbishment service can be tailored to meet your needs.

All trades are co-ordinated, health & safety is taken care of & all work is carried out to current Building Regulation standards.

Managing all aspects of the project reduces time on site & makes our total packages excellent value for money.

2. Experienced Team

Our project management is what sets us apart and gets your facility up and running quickly and efficiently.

We have been doing this for 40 years and plan every step in minute detail. This minimises stress & makes the refurbishment process seamless & straightforward for clients.

3. Client Feedback

Customer satisfaction is of paramount importance to our team. Ultimately, the best conclusion to complex refurbishment projects is to receive outstanding testimonials!

The Klick team were extremely proactive and were flexible and pragmatic when changes were required. Biofortuna now have a cutting edge manufacturing and laboratory facility with state of the art functionality which suits our needs perfectly. The quality of the whole facility is absolutely top notch."

Dr Nick Ash - Chief Executive Officer, Biofortuna Ltd

We engaged Klick Technology to develop an innovative lab space, which included the creation of two state-of-the-art R&D labs. Their expertise in designing a fully equipped working lab, complete with advanced HVAC systems and specialist equipment, truly impressed us.

Tony Havvas - JPL Flavours Ltd
