Test Guide

Medical Capabilities

At Forwessun, we're proud to support the medical industry by delivering reliable, innovative test solutions. Our expertise in medical device testing ensures that critical electronics perform flawlessly, giving manufacturers confidence that their products will deliver consistent performance in the field.

IN-CIRCUIT

This automotive fixture integrates automatic barcode scanning and board marking functionality. Built to support high accuracy in limited space environments, the solution demonstrates our ability to customise around specific customer needs without compromising on performance.

FUNCTIONAL

Acting as a dedicated programming station for a medical device, this fixture employs precisely actuated probes to establish dependable contact with hard-to-access test points for comprehensive diagnostic testing. The unit features an automatic scanning system, which includes a Harting interface and a FeaSA LED detection and verification system.

CUSTOMISATIONS

Board Catching

Dual Well Test Fixtures

ZeroFlex Board Support

Auto Opening Fixtures

Auto Closing Fixtures

Socketless Fixtures

Dual Stage Methods

LED Testing

Probe Guidance

Board Marking

Programming

Vectorless Testing

Automatic Scanning

Alumalift Compatibility

UUT Cooling

Relay Cards

Safety Features

Loopback Connectors

Physical Strain Gauge

Mechanical Detection

Clock Measurement
