

NCSC Assured Service Provider for Cyber Essentials

Regola Digital Consulting is formally recognised by the National Cyber Security Centre (NCSC) as an **Assured Service Provider (ASP)** for Cyber Essentials. This assurance confirms that we meet the NCSC's national requirements to deliver trusted, high-quality support for organisations working through the Cyber Essentials scheme.

Alongside our ASP status, we provide **Cyber Adviser** services, offering practical, nationally aligned guidance to help organisations understand their current security position and the steps required to strengthen it.

Our Cyber Adviser support includes:

- Understanding cyber security requirements
- Identifying potential areas of risk
- Taking safe, proportionate initial actions
- Improving cyber security readiness
- Clarifying next steps towards Cyber Essentials or Cyber Essentials Plus (CE+)

To help organisations begin their journey, we offer **30 minutes of free Cyber Adviser support** — ideal for those approaching Cyber Essentials for the first time or preparing to progress to CE+.

Our NCSC Assured Service Provider status reinforces our position as a dependable partner for organisations seeking verified, practical cyber security support.

If your organisation is considering Cyber Essentials, preparing for CE+, or simply needs initial guidance, our team is ready to assist.
