Our Company

Founded in 2000, Dalvie Systems is a Midlands based company that supply and install a wide range of bespoke warehouse racking and shelving systems. Additionally we provide office interiors, storage and material handling products, to businesses across the UK.

With our experience and expertise we deliver extensively planned projects and refurbishment services, to enhance and improve the way your workforce and business operate.

Our wide portfolio of products, as well as our attention to detail when carrying out larger projects, has made us the preferred choice for some of the UK's most successful businesses.

Clients we have worked with...

We work with a variety of clients from different sectors and industries.

PHS Group

Our Service to You

Dalvie Systems provides a personable service to ensure every detail of your requirements are covered and delivered to the highest of standards.

Our experienced team will visit your site, walk through your requirements, take detailed measurements and offer their expertise and advice on how best to use your warehouse space.

Whether you require a full-scale racking installation, a mezzanine floor to double your footprint, an office refurb and furniture or industrial partitioning to create additional rooms, Dalvie can assist.

Once your project begins, our team will provide updates on timescales and expected completion dates. We will liaise closely with your operations team to ensure minimum disruption to your business.

Dalvie manage the entire process so you don't have to. We will manage the ordering and delivery of materials as well as the installation team on site. Everything is taken care of - and if planning permission is required, we'll organise that too!

PALLET RACKING

As part of our warehouse refurbishment service, we can re-structure, enhance or expand on your existing pallet racking. We provide anything from single bay, to multi-tiered racking systems – our services are prevalent with clients who require commercial and warehouse solutions.

With a detailed assessments of each client's personal requirements, bespoke orders are completed to the strictest deadlines. Our specialised services can blend seamlessly with any existing fixtures should this be required. No matter what the size or shape of your commercial space or warehouse, we can create a solution to match your exact requirements.

- Wide aisle adjustable racking
- Double deep racking
- Narrow aisle racking
- Drive in/drive thru racking
- Mobile racking
- Multi-tier racking

PALLET RACKING

The planning stage of installing pallet racking is crucial to ensure deadlines are met and the delivery of service is to the highest of standards. We spend time discussing the project with you to design the most feasible and effective layout. Through our expert in-house CAD designers we will visually illustrate your final layout plans.

Our experienced installation team will keep in regular communication, to ensure down time is kept to an absolute minimum. With the rare occasion of any issues arising, rest assured we will provide prospective plans with a view to finding effective solutions rapidly.

Many of our projects have required the successful integration of clients' existing pallet racking and shelving, with a new layout of pallet racking. This can be carried out in phases, if required, as we recognise it is imperative for many businesses to continue with their normal day to day operations throughout the refurbishment.

PALLET RACKING ACCESSORIES

Enhancing your existing pallet racking can create great benefits to your business. With a variety of different options available you can not only improve the way you store your goods, you can also create a safer environment for your staff and provide a more efficient way of working.

- **Mesh Decks / Timber Decks / Bars**

Decks offer an array of benefits to your current racking solution. A quick and simple addition that can provide a storage solution for different pallet sizes.

- **Back of Rack Netting & Anti-Collapse Mesh**

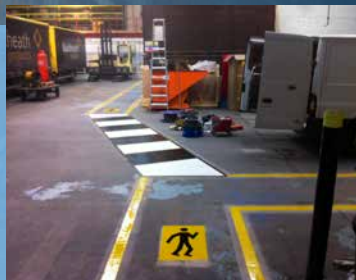

Create a safer environment for your staff and protect your palletized goods with back of rack netting. These products can be installed to any style of racking, and will provide your warehouse with extra safety measures, by preventing stock from falling and being damaged.

- **Signs, Labels & Floor Marking**

Create a safe, efficient and organised warehouse with a clear and concise labelling system. Dalvie also offer floor marking to create defined areas and walkways. We can also offer a label install service to make the picking process simple and easy for your team.

- **Column Guards / Protectors**

Protect your racking from bumps and knocks to prolong the life of your pallet racking.

MEZZANINE FLOORS

Installing a mezzanine floor can double or even triple your current footprint, a cheaper and simpler option to moving to larger premises.

Our flexible design options can be used for numerous purposes, with bespoke designs available to satisfy your exact requirements.

Thanks to a wide choice of colours, the mezzanine floor will integrate seamlessly into your existing environment and our flooring can provide a contemporary aesthetic appearance, while being highly functional.

Our service includes applying for the necessary building regulations and a site survey by qualified project engineers. Once our preliminary survey is completed, we will provide detailed structural drawings and calculations for the project.

The construction process will be completed with minimum disruption, as we can arrange for the delivery and installation to suit your workload. Our qualified team will ensure rapid and efficient installation, with safety being a paramount consideration at all times.

RACK INSPECTIONS & REPAIRS

Racking inspections and repairs are a crucial part of the health and safety in the workplace. They are carried out to ensure warehouse pallet racking is safe to use. The survey will highlight any damages or problems with the racking which could potentially harm your employees or cause damage to goods.

Racking inspection are essential to be performed annually at the very least, depending on the size of your operation. A detailed examination of the racking system will take place and any damage will be recorded by location using the SEMA traffic light system, if required Dalvie also provide a repair service.

Our independant SEMA approved inspector typically looks at:

1. Beams, beam connectors, uprights, bracing members, locking pins
2. Footplates, securing bolts, column guards.
3. Condition of stored materials and pallets.
4. Floor condition.
5. Signage.
6. Any other relevant factors relating to specific site conditions.

Once all of these areas have been inspected, a summary of damage by item will be compiled into a report and issued to you.

OFFICE REFURB & PARTITIONING

From private spaces, to open-plan environments, Dalvie Systems will help you to develop your office space. Our bespoke solution will be purpose designed to benefit your company and the workforce's specific requirements.

We can be a one stop shop for all your needs. As part of the refurbishment process, our skilled team will also install partitioning and mezzanine floors, which will add multiple levels to your office space to increase the working area. We also provide a decorating and furnishing service.

We will present our designs in CAD format and walk you through the complete design process, delivering your furniture and installing it.

OFFICE FURNITURE

We can supply, deliver and install furniture to meet all your office needs. Including workstations, seating, storage solutions, conference rooms, as well as specialist or bespoke items that will be custom-built to make the most of the available space.

Working with clients to provide outstanding items that feel as good as they look, we specialise in affordable, contemporary furniture solutions.

We understand the importance of keeping your staff and customers happy, and our ergonomically designed furniture will enable you to achieve the best possible office environment.

It's not just a case of thumbing through a catalogue - we will visit you to get a personal feel for your company, providing a basis for a productive and lasting relationship. We can supply your office furniture at extremely competitive rates, in a wide range of finishes, colours and price bands.

WAREHOUSE SUPPLIES

One stop shop for all your office and warehouse needs, from safety equipment to trolleys, lockers and signs, we can supply it all right to your door. You can find all our stock in our annual catalogue or visit our website for more information.

Client's Testimonials

“For many years now Dalvie Systems have been a key strategic supply chain partner for the Oasis Group.

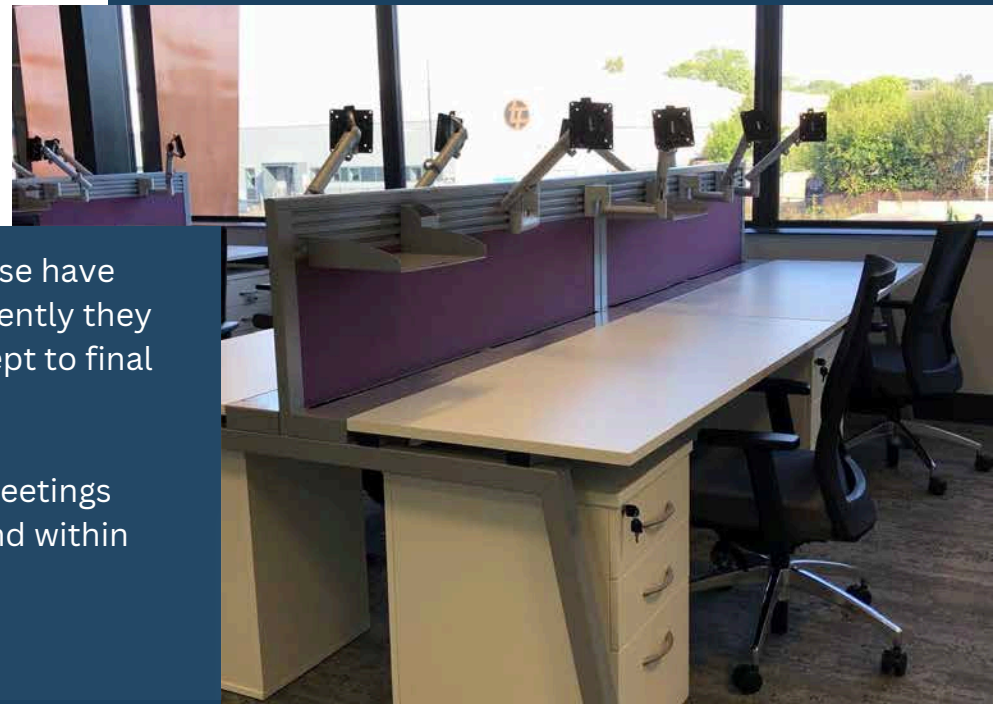

They have provided us with expert support across all our geographies and have successfully delivered many business-critical racking projects which have contributed to the continuing success of our company.”

OASIS GROUP

“Dalvie Systems have carried out several projects for Lawton Tubes, these have included refurbishments of both offices and staff canteen facilities. Recently they project managed the build of a new inspection office, from design concept to final fit out.

Dalvie have proved themselves reliable and professional, with regular meetings and a strong attention to detail, with projects being delivered on time and within agreed budgets.”
