

Staircases, Balconies & Railings

Bespoke steel stairs and balustrades, designed and installed

A well-made staircase or balcony changes how a building looks and works. We design, fabricate and install **bespoke steel staircases, balconies and railings** for homes, commercial buildings and industrial sites, all built in our Norwich workshop and **UKCA marked to BS EN 1090 EXC2**.

Staircase styles

- **Spine-beam** staircases with a clean central support
- **Mono-stringer** designs for a modern, open look
- **Helical** and spiral staircases where space or style matters
- **Straight** flights, internal or external
- External and fire escape stairs for commercial buildings

Balconies & railings

- Steel balconies and Juliet balconies
- Balustrades and handrails, internal and external
- Glass, bar or mesh infill options
- Landings, platforms and access walkways
- Finished to suit: primed, painted or galvanised

Made to measure, start to finish

Every staircase and balcony we make is designed around your space. We survey, produce drawings for your approval, fabricate in our workshop and install on site, so there is one team responsible for the whole job.

Whether you want a striking feature staircase for a new home or a practical external stair for a commercial unit, we combine **20 years' experience** with careful detailing to deliver a safe, solid and good-looking result.

We work across **East Anglia, London and nationwide**.

Why choose us

- 20 years' welding and fabrication experience
- UKCA marked to BS EN 1090 EXC2
- Full design-to-install service, one point of contact
- In-house workshop at Rackheath, Norwich
- Covering East Anglia, London and nationwide
- Free, no-obligation quotes
