

Bespoke Gates & Architectural Metalwork

Made-to-measure steel gates, screens and feature metalwork

Our bespoke gates and architectural metalwork are designed to suit your property, secure your site and last for years. We take each job from **design to installation**, with **20 years' experience** in welding and fabrication behind every piece.

Gates & security

- Driveway gates: swing and sliding
- Side and pedestrian gates
- Security gates and fencing for commercial sites
- Steel doors and Crittall-style screens
- Made to measure for any opening

Architectural metalwork

- Feature screens and panels
- Canopies and steel frames
- Bespoke railings and balustrades
- Planters, brackets and decorative metalwork
- Finished to suit: primed, painted or galvanised

20

years' experience

no-obligation quotes

Built around your property

No two entrances are the same, so we do not do off-the-shelf. We measure up, agree a design with you and fabricate everything in our workshop at Rackheath, Norwich, before installing it ourselves.

From a simple side gate to a full set of matching gates, railings and screens, we focus on strong welds, clean lines and a finish that stands up to the British weather.

We cover **East Anglia, London and nationwide**, and every quote is free.

Why choose us

- 20 years' welding and fabrication experience
- UKCA marked to BS EN 1090 EXC2
- Full design-to-install service, one point of contact
- In-house workshop at Rackheath, Norwich
- Covering East Anglia, London and nationwide
- Free, no-obligation quotes
