1 Schools & Educational Facilities

Typical floors:
Vinyl, linoleum, safety flooring and hard tiles.

Cleaning methods:
Mechanical scrubbing, suitable floor-cleaning solutions and mopping and drying with a wet and dry vacuum to remove residual water.

Key benefits:
A cleaner, safer learning environment with improved appearance and hygiene. Helps reduce slip risks and supports health and safety with the removal of dirt, dust and spills.

2 Gyms & Leisure Facilities

Typical floors:
Rubber, vinyl, sealed concrete and suitable hard tiles.

Cleaning methods:
Machine scrubbing, targeted cleaning solutions and hand scrubbing for smaller areas and edges.

Key benefits:
Removes sweat, dirt and general build-up, helping to maintain a cleaner, safer training environment. Reduces slip risks and supports health and safety in high-traffic areas.

3 Offices & Commercial Premises

Typical floors:
Vinyl, ceramic tiles, sealed stone and other suitable hard surfaces.

Cleaning methods:
Machine scrubbing, mopping and drying, with targeted treatment of marks and soiling.

Key benefits:
A cleaner, more professional environment for employees, clients and visitors. Maintains the appearance and value of your premises.

4 Commercial Kitchens & Food Preparation Areas

Typical floors:
Textured safety flooring, quarry tiles and other suitable non-slip surfaces.

Cleaning methods:
Degreasing, scrubbing and careful removal of soil and greasy residues, using methods suited to the floor and site requirements.

Key benefits:
Helps remove grease and oil, reducing slip risks and supporting food hygiene and health & safety standards.

5 Warehouses & Industrial Facilities

Typical floors:
Concrete, sealed concrete and suitable resin flooring.

Cleaning methods:
Industrial floor-scrubbing machines, scrubber dryers and targeted treatment for accumulated dirt and operational residues.

Key benefits:
Cleaner operational areas, improved presentation and a safer environment for staff and vistors.

6 Railway Stations & Transport Facilities

Typical surfaces:
Platform paving, concrete and suitable hard-wearing flooring.

Cleaning methods:
Mechanised scrubbing or other suitable cleaning techniques, depending on the surface, access restrictions and operational safety requirements.

Key benefits:
Helps maintain cleaner, safer public-facing areas and reduces slip risks while working within the demands of a busy transport environment.

Additional Services

For a Complete Hard Floor Cleaning Solution

Deep Floor Cleaning
Removes accumulated dirt and stubborn soiling for a fresher, cleaner finish.

Strip & Re-seal Flooring
Using stripping pads and applicators to remove old seal and apply a new protective finish where required.

Specialist Floor Cleaning
We offer specialist cleaning for stone, marble and other delicate or high-value flooring types. Each surface requires the right approach to avoid damage.

Targeted Degreasing
Ideal for kitchen and industrial areas where oil and grease build-up can be a hazard.

Our Approach

The Right Method for the Right Floor

We assess
We research each flooring type and suitable chemicals before commencement of each job.

We follow
We follow any instructions and suggestions from the client, especially for specialist or sensitive flooring.

We use the right equipment
Including scrubber-dryers, sit-on scrubbers, mop and dry systems and hand scrubbing for smaller areas and grouting if required.

We finish to a high standard
All flooring is mopped and dried upon completion to remove any residual water waste from the machines.

Health & Safety

A Cleaner Floor is a Safer Floor

- Reduces slip and trip risks
- Helps remove bacteria and contaminants
- Tackles grease and oil build-up
- Supports a healthier working environment

Every job is planned with health and safety in mind, using the correct equipment, products and procedures for the specific environment.
