1 Reach and Wash Systems (Ground Floor)

Typical surfaces:

Aluminium, composite panels, metal cladding, uPVC and other suitable exterior surfaces.

Cleaning method:

Pure water reach and wash system, using telescopic poles and specialist brushes to remove dirt and environmental deposits from ground level.

Key benefits:

- Removes dirt, moss, algae and traffic film
- Helps maintain a clean, professional appearance
- Safe and effective for suitable surfaces

2 Jet Washing from Ground Level (Hard to Remove Grime)

Typical surfaces:

Metal cladding, concrete panels, brickwork, render and other durable exterior surfaces.

Cleaning method:

High-pressure jet washing using professional equipment and suitable cleaning agents, where required.

Key benefits:

- Removes stubborn dirt, grease and staining
- Restores the original appearance
- Helps prevent long-term damage and build-up

3 Tower Cleaning (High Level Access)

Typical surfaces:

High-rise cladding, curtain walling, panels and other elevated external surfaces.

Cleaning method:

Professional high-reach equipment and reach and wash systems, with purified water and specialist brushes.

Key benefits:

- Accesses high and difficult areas safely
- Removes dirt and environmental deposits
- Maintains a cleaner, longer-lasting finish

4 Machine Using Reach and Wash System (Large Areas & Complex Buildings)

Typical surfaces:

Large, commercial buildings, warehouses, industrial units and complex structures.

Cleaning method:

Professionally using reach and wash system, with purified water and rotating brushes to clean cladding and glazing from the ground.

Key benefits:

- Covers large areas quickly and efficiently
- Consistent, high-quality cleaning results
- Safe and effective for a wide range of building types

5 Additional Service Information

We assess

We carry out a full site survey to identify your building type, surface condition and the most appropriate cleaning method.

We use the right products

We research each surface and use suitable, high-quality cleaning solutions, always following manufacturer and client recommendations.

Health & safety first

We follow strict health and safety procedures, including risk assessments, proper equipment and safe working practices at all times.

Environmentally responsible

We use purified water systems where possible and manage waste water in line with environmental best practice.

Specialist cleaning for special surfaces

For stone, marble, glass and other delicate surfaces, we provide specialist cleaning methods to protect and preserve the finish.
