

D&E Liobex compact single action spring hinge

The D&E Liobex compact range has an enclosed body to reduce the risk of vandalism. This unique fixing method makes it suitable for environments where security and reliability are essential.

DELSA03	75mm / 3" s/a spring hinge	silver
DELSA03SS	75mm / 3" s/a spring hinge	sat. stainless steel

Door width: 650mm
 Door thickness: 20 - 25mm
 Max. door weight: 10Kgs
 Packaging: 1pr

DELSA04	100mm / 4" s/a spring hinge	silver
DELSA04SS	100mm / 4" s/a spring hinge	sat. stainless steel

Door width: 700mm
 Door thickness: 21 - 30mm
 Max. door weight: 15Kgs
 Packaging: 1pr

DELSA05	125mm / 5" s/a spring hinge	silver
DELSA05SS	125mm / 5" s/a spring hinge	sat. stainless steel

Door width: 780mm
 Door thickness: 25 - 35mm
 Max. door weight: 25Kgs
 Packaging: 1pr

DELSA06	150mm / 6" s/a spring hinge	silver
DELSA06SS	150mm / 6" s/a spring hinge	sat. stainless steel

Door width: 850mm
 Door thickness: 25 - 40mm
 Max. door weight: 35Kgs
 Packaging: 1pr

DELSA07L	175mm / 7" s/a spring hinge - LH	silver
DELSA07R	175mm / 7" s/a spring hinge - RH	silver

Door width: 920mm
 Door thickness: 33 - 50mm
 Max. door weight: 45Kgs
 Packaging: 1pr

Dimensions & other technical information can be found on pages B-1005 to B-1007

The DELSA06 single action spring hinge has been tested as part of a door set for use on 30 minute fire doors - 3 hinges required per door.

Characteristics common to all the Liobex hinge models

	Model No.	LSA03	LSA04	LSA05	LSA06	LSA07	LSA08
Height of Leaf	mm	75	100	125	150	175	200
	inch	3	4	5	6	7	8
To suit door thickness	mm	20 - 25	21 - 30	25 - 35	25 - 40	33 - 50	35 - 55
To suit max door width	mm	650	700	780	850	920	1000

Characteristics specific to the Liobex Compact range

Weight of the hinge - pair	Kg	0.390	0.580	0.850	1.290	1.765	2.530
Max torque at 90° - per hinge	daN	0.250	0.350	0.500	0.700	0.850	1.200
Max weight of door - per pair	Kg	10	15	25	35	45	55
Fixing screws recommended - Countersunk Screw		4 x 20	4 x 20	4 x 25	4.5 x 25	6 x 30	6 x 30

Characteristics specific to Liobex 'décor' range - with end caps

Weight of hinge - per pair	Kg	0.625	0.870	1.390	1.970	2.675	3.840
Max torque at 90° - per hinge	daN	0.400	0.500	0.600	0.950	1.000	1.400
Max weight of door - per pair	Kg	12	20	30	40	50	70
Fixing screws recommended - Countersunk Screw		4 x 20	4 x 25	4.5 x 25	5 x 25	6 x 30	6 x 30

Installation of Liobex single action spring hinges

To install Liobex Single Action Spring Hinges it may be necessary to fix a plant down the hanging frame. The width of the plant should be sufficient to provide a bearing surface for the flanged face (C) of the hinge. The thickness of the plant should be sufficient to allow the hinge cylinder to rotate freely after the leaf has been morticed into the door, ensuring that the cylinder is free to rotate and that standard door / plant clearance is maintained.

Liobex Single Action Hinges up to 6" are supplied in right hand configuration only, the capstan being at the top of the hinge. For left hand doors the capstan is set at the bottom. 7" and 8" are supplied handed and should be fitted accordingly with the capstan at the top in both instances.

Normal installation should be 250mm from the top and bottom of the door. In the event of a door being oversize, a third hinge may be fitted 100mm below the top hinge. Care must be taken that the centre line of the hinges is in alignment.

Adjustment

Normal operation of the hinge is achieved by tightening the capstan on each hinge and inserting the pin provided.

Normally the top hinge(s) will not require more than three (3) holes, and the bottom Hinge two (2) holes.

DO NOT OVERTIGHTEN THE CAPSTANS

Maintenance

Liobex Spring Hinges are lubricated before despatch. We recommend annual lubrication to maintain trouble free operation.

Installation of Liobex double action spring hinges

To install Liobex double action spring hinges correctly it is necessary to have or fix a plant down the hanging frame. Ideally the width of the plant should be the same dimension as the thickness of the door. The thickness of the plant should be sufficient to allow the hinge cylinders to rotate freely after the lipped face (C) has been morticed in. The other lipped face should be morticed into the door, ensuring that both cylinders are free to rotate and that standard door plant clearance is maintained.

The capstan should be fitted at the top on the plant, and at the bottom on the door. This configuration will ensure optimum efficiency and minimum wear.

Normal installation should be 250mm from the top and bottom of the door. In the event of a door being oversize, a third hinge may be fitted 100mm below the top hinge. Care must be taken to ensure that the centre line of the hinges is in alignment.

Adjustment

Normal operation of the hinge is achieved by tightening both capstans on each hinge and inserting the pins provided. Normally the top hinge (s) will not require more than three holes, and the bottom hinge two holes.

DO NOT OVERTIGHTEN THE CAPSTANS

Maintenance

Liobex Spring Hinges are lubricated before despatch. We recommend annual lubrication to maintain trouble free operation.
