

## ScanX Scout

ScanX Scout is a battery powered X-ray Imaging System with flexible digital film plates for C-IED, search, postblast investigation, forensics, TSCM and NDT tasks.

ScanX Scout reads digital x-ray Image plates in less than a minute, is compatible with most types of Portable X-ray Generators and is controlled by our ScanView X-ray Imaging software.

ScanX Scout incorporates the latest in digital x-ray technology producing high resolution images from 130 microns down to 50 microns using flexible plates that bend around or attach to almost any surface. Large areas can be checked using multiple x-ray image plates and the images can be stitched together with the Scanview software.

ScanX Scout comes in a single system case, operates from its own inbuilt battery and is easily set up and deployed in less than 2 minutes by one person.

## Key features

- Portable and easy to set up and use in less than 2 minutes
- Thin Flexible Image plates in a range of sizes from 8 x 10" up to 13 x 51"
- Image Resolution from 130 - 50 microns and 5 line pairs minimum
- Scan and erase the reusable plates in a single pass
- Battery Powered for mobile field operations
