ECA have taken care of all our business energy needs since 2014.

They provide specialist advice, and most importantly, ensure we benefit from the very best energy prices.

Every bodyshop could benefit from speaking to ECA Business Energy.

Andy Pennell,
Group Operations Manager

 **Balgores Motor Group**

» procurement

Long-term energy savings through better procurement and access to group purchasing options.

» compliance

Analysis and advice to meet regulations for total energy compliance.

» bill validation

Validate contracts and bills: refund overpayments and reduce costs

» monitoring & usage reduction

Analyse existing usage and actively reduce consumption.

» LED lighting

Make significant savings, and exceed manufacturers criteria on Lux levels, by switching to LED lighting. You can switch over to LED, with no upfront costs.

» electric vehicle charging points

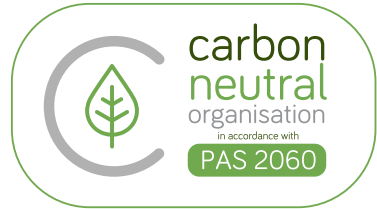

Expert planning and grant advice, and installation support, to help generate new revenue streams for your business.

» become carbon neutral

Your bodyshop now has the opportunity to reduce energy costs, attract more business, and help the environment by becoming carbon neutral in accordance with PAS2060.

You can become Carbon Neutral.

Reduce costs, attract more business and help the environment.

Your bodyshop now has the opportunity to reduce energy costs, and attract more business, by becoming carbon neutral in accordance with PAS2060.

Customers are more likely to choose environmentally responsible businesses.

ECA Business Energy support more than 400 bodyshops throughout the UK.

Our specialists offer a proven programme to support your business to become Carbon Neutral. We will help you reduce carbon emissions, whilst offsetting carbon used by your bodyshop, through high quality certified carbon credits.

“ We are leading the way in the accident repair industry by achieving carbon neutrality in accordance with PAS2060. ECA Business Energy has enabled us to become carbon neutral. ”

Graham Roberts,
Commercial Director

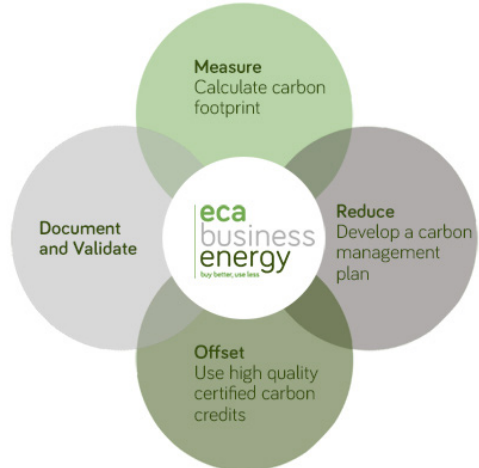

ECA Business Energy specialists will support your bodyshop to enjoy the benefits of becoming Carbon Neutral.

- Achieve carbon neutral status in accordance with PAS2060
- A team of more than 30 specialists with over 35 years experience supporting businesses
- Avoid future carbon taxes
- Reduce energy costs by implementing a carbon neutral plan
- 100% green electricity available through group buying options
- Help meet requirements of new business tenders
- Better engage staff, stakeholders and suppliers
- Ongoing support available to work towards NetZero
- Promote your achievements through marketing opportunities
- Most importantly, benefit from increased customer demand

Our proven four step process has been developed specifically for bodyshops.

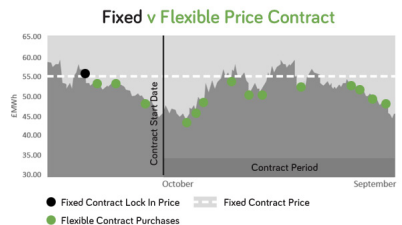

Now available to your bodyshop: » the bodyshop energy basket

Save on your bodyshop energy costs. Join hundreds of businesses, benefit from flexible purchasing.

Your bodyshop is invited to buy energy at rates only previously available to high volume users.

ECA Business Energy provides an opportunity for your bodyshop to join other bodyshops, to buy energy together.

When we pool energy volume, and buy on behalf of hundreds of businesses, we can negotiate significant cost savings for your bodyshop.

Graphic for illustration purposes only.

And that's not all. The ECA Business Energy team track the energy market every day and buy energy blocks at different times during the year, to take advantage of lower market rates, rather than being restricted to one fixed purchase per annum.

Your bodyshop will save money with flexible purchasing from ECA Business Energy, compared to fixed contract agreements.

Benefits to your bodyshop:

- Pool your energy volume with other bodyshops to increase purchasing power
- Gain access to an energy product normally only available to high volume users
- Buy energy blocks at different times during the year, to take advantage of lower market rates
- Buy energy strategically as part of a fully managed risk management strategy
- Available for all electricity and gas supplies
- Add and remove supplies as required
- Guarantee 100% green renewable electricity
- Avoid overpayment with full invoice validation
- Agree individual payment terms (up to 28 days)
- Save time, by accessing ongoing reporting, and an online portal

And most importantly, benefit from reduced costs, compared to traditional energy purchasing.
