

Email Migration

Make the move to cloud-based e-mail
– with zero risk, complexity or downtime

Migrating from an on-premises environment to a modern cloud-based mail service like Microsoft's Office 365 offers some truly compelling benefits.

The Challenge

Transitioning hundreds or thousands of mailboxes without disruption is a big task that's not without risk.

You need to minimise impact on end users, ensure that calendars and address books transfer with full fidelity, and deal with issues like archived and encrypted mail.

Then there are challenges like deciding where your data will reside, how applications, devices and services are integrated with Office 365, and addressing security and compliance requirements to ensure archives are retained in accordance with regulatory laws.

Some decisions won't be cut and dried. To avoid interference with day-to-day operations, a staged migration may be in order. Which means operating two platforms in tandem as you move over to the new system.

Or perhaps you're considering a hybrid option, utilising Office 365 for mobile workers and retaining some aspects of your on-premises environment for office-based users.

To do things right, you'll need specialist tools alongside skilled planning and execution to ensure user onboarding runs smoothly - with no unexpected disruptions, data loss or overruns.

The Solution

No matter whether you have 50 or 50,000 users, our transformational approach is based on a tried and tested methodology that delivers a smooth migration process and minimal downtime.

Experts at transitioning legacy mail services like Notes/Domino, we understand all the potential pitfalls like data integrity, system stability and limited bandwidth.

Beginning with a thorough assessment of your existing environment, we'll generate a customised migration plan that's exactly tailored to your business. Ensuring every aspect of your move is carefully planned and implemented to give you a fixed cost, fixed outcome service.

With a range of skills and accreditations that truly make us a 'one stop' partner for cloud e-mail migration, we'll help you move to the cloud seamlessly, on time, and on budget.

Why Bell

Our cloud e-mail migration expertise includes:

- Exchange to Office 365 migration
- IBM Notes/Domino to Office 365 migration
- A choice of migration options – cutover, staged and hybrid
- Full lifecycle management provides end-to-end support – from the design and build of your Microsoft 365 environment through migration to post-migration monitoring
- Enabling improved security, compliance and global access
