People Outsource Services
Staff augmentation: Filling your skills gap

At Bell Integration, we work with you to understand your needs and advise on the best approach, providing you with highly skilled resources – whether that's a dedicated project team or specialist individuals – to join your teams, when you need them.

The Challenge
The IT landscape is changing and evolving so quickly, businesses are unable to train and recruit staff with the required skills to keep up. With the existing workforce too consumed with firefighting to develop what's needed, there's an internal skills gap emerging creating concern within the industry.

There are also the peaks and troughs of resource demand to consider which makes permanent recruitment an even less attractive option. But what is the alternative? Hiring temporary staff from agencies is time consuming and the agencies can bombard you with piles of CVs without really understanding the company's needs.

Businesses need a trusted partner to help with staff augmentation, an outsourcing strategy to determine which additional skills are required and to supply those resources to meet their business objectives.

The Solution
According to industry analysts, IT staff augmentation has the highest growth in the professional services sector, constituting 40% of overall global revenue.

Bell Integration is a leading IT consulting and systems integrator with a proven track record of delivering consistently high quality, cost effective IT solutions.

We start by working with you, assigning a dedicated delivery manager to your case, to get a full all-round understanding of your needs and fit. This, aligned with a deep level of technological expertise, allows us to rapidly and accurately match our personnel options to meet your exact specifications.

By adding our people to your existing teams to fill a skills gap, you'll realise the added benefits brought by access to the pool of knowledge we've collected over many years across multiple industries, technologies and processes.

Bell's People Outsource Services team is the same as we employ on our large scale fixed price projects, allowing you to free up your own staff to focus where they're needed most. We prefer to create a longer term partnership to support your ongoing, changing and dynamic needs.

Our People Outsource Services cover technology and project management – from Engineers to Architects, and Admin to Project Directors and Programme Managers

Our People Outsource Services has expertise in (but not limited to):
- Microsoft
- VMware
- Citrix
- Orchestration / automation
