RANGE OF PRODUCTS / SERVICES:

Coldon Engineering Co Limited was founded in 1966 and is a leading supplier of value-added services, specialising in the manufacture, distribution and logistics management, of components and assemblies used on land, sea and in the air.

Our customer profile includes many of the world's largest international equipment manufacturers who rely on the high integrity, quality and performance of Coldon products and services to meet their own exacting standards.

The company continues to invest in new plant, equipment and technology. We manufacture a comprehensive range of components and assemblies utilising a wide range of skills and up to the minute production techniques including:

- **CNC Milling including 5 Axis**
- **CNC Turning including Mill/Turn**
- **Assembly**
- **Press & Fabrication work**
- **Sub-Contract Special processes up to NADCAP standards**

Our core manufacturing competences are in the machining and fabrication of materials including all steels, titanium, aluminium, and other super alloys. This is achieved by utilising the latest technology and the design and manufacture of complex assemblies, sub-assemblies and kits. Proud of our reputation for developing leading edge manufacturing methods we strive to deliver sustainable competitive advantages and it is this that keeps us at the forefront of the industries we serve.

We operate in five major global markets: Aerospace, Defence, Marine, Space and Military
