

Premier Windows Ltd

High-Performance, High-quality
Timber Windows & Doors.

Unrivalled on Price & Service.

British built

Premier Windows is proud of our successful British manufactured products. As one of the largest, advanced and dynamic producers and installers of timber windows and doors in the UK, we strive to provide innovative yet affordable service. We are committed to delivering quality, performance and sustainability.

Utilising a purpose built and designed factory, we can deliver high performance products throughout the UK, for installation by our fully trained and accredited teams.

All products surpass all 2013 energy and heat saving standards and our windows are by no means 'one size fits all'. We make every type of window and door for all styles of British homes whether traditional or contemporary.

If you have a special or bespoke design please get in touch and chances are we can make it especially for you.

Timber

Benefit

from our

experience

and know-how

Web Morrel - Independent Timber Consultant

"It is always depressing to see otherwise beautiful homes ruined by ugly plastic windows. Wood windows not only look better, but also raise the price of a property. They can last 60 years or more and are available fully double glazed. As someone who adores colour, I love how you can pick and change the colour of your wood windows."

Our Warranties

- 30 years on frames
- 10 years on double-glazing units
 - 10 years on seals
 - 10 years on hardware
- 8 years on opaque coatings
- 6 years on translucent coatings

We use only the finest slow-growth pine, engineered to remove knots and defects, treated with the latest water-borne preservatives and spray coated with water based coatings under strictly controlled factory conditions.

With normal maintenance our timber windows have a minimum estimated service life of 60 years but with a little extra care there is no reason why they won't last 80 years or longer.*

Wood Window Alliance Window Estimated Service Life - ISO 15686-8:2008, Life Cycle Assessment Research, Dr R Murphy, Imperial College London.

Windows
for life

the
beauty
of wood

The beauty of real wood windows and doors is that they do not just save money through saving energy; they can also improve sound reduction, enhance security and add value to your home.

A national survey of estate agents carried out by English Heritage in 2008 found 'Unsympathetic replacement windows and doors, particularly plastic/PVC-u, are the single biggest threat to property values in conservation areas'.

where beauty meets performance

Energy-efficiency

- Double or triple-glazed units, argon or krypton-filled.
- Up to 'A' energy-rated windows, even with vertical sliding sashes.
- U-values as low as 1.0W/m²K
- Lower u-values with triple glazing.

Low maintenance

- Our windows are supplied fully finished. Coatings applied in controlled factory conditions ensure even invisible elements of the frame are painted to an exacting specification, with special attention to joints and end-grain.
- You won't have to refresh the initial coating until after 10 years – in fact, we offer an 8-year warranty on our opaque coatings.
- Re-coating is simple, with minimal preparation. Just one topcoat should be all that's needed to restore the beautiful appearance of the frames.

where
peace of mind
comes as standard

Our Standards

All our timber products meet the high quality, performance and sustainability standards demanded by the Wood Window Alliance with third-party accreditation from TRADA's Q-Mark scheme as evidence that our windows meet and exceed all relevant British Standards, including BS 644 and BS 6375 I & II. As your safety is our concern all our doors and windows have advanced safety and security features built in. For enhanced security, we offer windows and doors that meet the Secured by Design scheme standards.

- We are dedicated to supplying only products which use wood that is legally harvested from sustainably managed forests.
- Because of the carbon sink effect of the forests and the carbon stored in the windows, our frames are carbon negative, saving an average of 89kgs CO₂e over the life of each window when compared with a PVC-u equivalent.
- Our coatings and preservatives utilise the latest environmentally-friendly formulations and use of state-of-the-art waste paint recovery systems.

your
widest
choice
of windows

Whatever type of window, whatever style your heart is set on, we'll take care to make it beautifully for you. From Georgian sash windows with authentic period detailing, to contemporary casements.

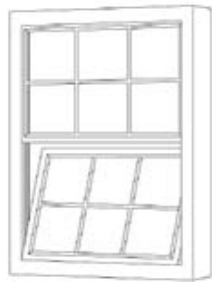

Most of our windows are made from engineered softwood, however hardwood or aluminium-clad windows are available for highly exposed areas and you can also choose a material and style of hardware to complement the design of your home.

From 1999 - 2013 energy and heat saving standards have been fully adhered to and we pride ourselves on providing high energy saving over and above the standards set out by The European Energy Performance of Buildings Directive.

Vertical Sliding Sash
(cords & weights or spiral balance)

Vertical Sliding Sash Window offers the best of both worlds - the appeal of traditional construction and styling combined with the benefits of modern timber technology.

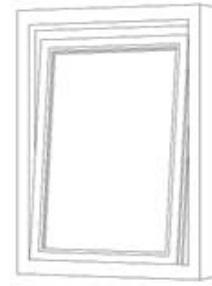

Vertical Sash With Tilt in to Clean

High performance within a traditional sash frame and design. Its unique track tilting mechanism with retaining arms allows safe cleaning of both external surfaces of glass from inside the building.

UPVC Sash Window With Tilt in to Clean

Traditional appearance with modern performance. Approximately half the cost of our timber equivalent. All fully A-rated. Dedicated brochure available upon request.

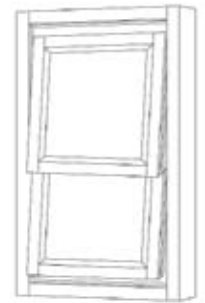

Tilt in to Clean

Our popular Tilt in to clean window is a classic design that allows you to be creative without compromising performance. Ideal where outwards opening is restricted.

Flush Casement

Designed and engineered to meet the demands of the latest Secured by Design Standards and has demonstrated resistance to attack in some of Britain's highest crime areas.

Dual Swing

Developed to meet the demands of contemporary styling, having the appearance of a traditional sash window whilst conforming to current building and fire regulations.

your choice of finish in any colour!

Choose from a wide range of colours or translucent coatings. You can even have your windows with one colour on the outside and another on the inside!

You will not need to refresh the paintwork for at least ten years - we even guarantee it for 8 years – and then you will be surprised how easy it is. A light rubdown and a single coat is all that should be needed to make them look as good as new. However we are making constant improvements and aim is to reduce repainting frequency substantially during 2013.

For technical info on our coatings, please visit our website or contact our office.

Colours are indicative only, as the printing process is not colour-accurate

your
choice
of doors

Entrance Doors

Beautiful, weather-proof & energy-efficient. Our doors are available in a style & colour to suit you. You will find we will make the perfect door to grace your home. Our steel lined door give the highest security and surpass all UK security standards

orangery with
bi-folding
door

Available in your choice of colour and finish

Bi-Folding Doors

The Premier bi-folding doors are designed and manufactured in the United Kingdom and are certified to conform with all current building regulations including 'Severe Weather Rating' the highest quality British Standards available.

Our folding doors and windows are available in an enormous choice of colours and finishes and are suitable for both domestic and commercial installations and the system provides you with added security and wider openings (for easy cleaning).

UPVC Hardware & Window Accessories

The Finishing Touches

D-Handles

Can be fitted internally or externally to aid in sliding the top sash downwards. Available in white, brass, chrome and satin chrome.

Sash Locks

Securely keeps the top and bottom sashes locked together, supplied as standard on every window. Windows greater than 1000mm wide are fitted with two locks as standard.

PVC OG Architrave

This OG architrave is tailored to our needs and is unique to Premier Windows. It is used to give your home the look of a traditional sash window rather than non-traditional flat architrave as standard with most PVC windows.

Lift Hooks

Designed to help you easily lift the bottom sash up wards while retaining the traditional sash appearance.

Tilt Buttons

Lateral operation to allow the top and bottom sashes to tilt inwards for cleaning.

Safety Restrictor

The purpose is to limit how far the sashes slide up and down. Designed for child safety; the window cannot be opened more than 100mm. Can be over-ridden for full opening.

Decorative Sash Horn

Traditional sash windows feature sash horns, which prevent the window being opened to far and causing damage to the window. We can match existing sash horns of many designs.

External Astragal Bar

Our astragal bar range will enhance the look of your home, giving it a sophisticated Georgian appearance and the effect of individual panes of glass by without the need for individual units.

Internal Fret

The Internal fret is used to give an authentic look to windows. This bar is located inside the glass unit and gives the window a similar appearance to the astragal bar but with much easier cleaning.

Trickle Vent

A ventilation option located on the top sash, which can be opened to allow a small amount of fresh air to enter the room to reduce condensation while remaining secure.

your

dream is just

a phone call away

Just call us, and one of our salesman will come round to measure your windows and doors. They'll also give you all the advice you'll need, and you'll have an estimate within days. Our sales team will tell you when your windows will be ready and arrange to install them when it suits you. Our installers will even arrange for your old windows and doors to be removed from site and recycled. And if your windows or doors need any attention in years to come, just contact us and we will be more than happy to help.

premier
installers
fully trained
and accredited

We only use our own fully trained and accredited installers for all of our projects.

All our installation teams have at least 15 years installation experience and our regular training and product knowledge sessions keeps them fully up to date with all new window and door installation techniques and products.

Premier Windows are committed to complying with all government legislation and regulations surrounding movement, correct access and equality for elderly and disabled people. We have experience of providing windows in accordance with **The Disability Discrimination Act 2005, The Equality Act 2010, Building Regulations 2013** and are experience in providing solutions for schools, care homes, dentists, surgeries and many other types of publicly accessible buildings. We also have a range of low door thresholds suitable for coupling with disabled ramps and lifts.

If you have any special access needs please give us a call and we will be more than happy to discuss the options.

At **Premier** we are committed to achieving highest standards of **Health, Safety and Environmental Practice** and we ensure the health and safety of all persons who may be affected by our activities through risk assessment and regular training.
