We've been supplying to the NHS since 1998

It's a partnership we're extremely proud of. And you can find plenty of our Sanitary & Nappy Bins in most hospitals up and down the country.

The NHS change lives. And when we're able to give back, we do. Here are some of our most memorable NHS projects:

- During the first Covid-19 lockdown, we focused all our efforts on providing the NHS with PPE bins. From 16th March to the 10th of July, we delivered around 13,000 of our capsule units and 16,000 RFG products.
- We delivered over 3000 bins in just five weeks to the new Royal Liverpool University Hospital.
- In 2011, we delivered over 8,000 bins to The Royal London Hospital.
- We supplied 1,100 sackholders to Balfour Hospital in 2019 during its construction. This hospital is Scotland's first net-zero hospital.

Nappy & Sanitary Bins

Our Nappy & Sanitary Bins come in various sizes and are specifically designed for the collection of feminine waste, sanitary towels and nappies. Each unit comes with anti-microbial coating to prevent the build up of bacteria, reinforced by a galvanised steel body that offers excellent rust and corrosion resistance.

The sanitary and nappy bins are operated using a foot pedal to open the lid, or there is a hand-operated option that removes the pedal. All contents fall into a chute that are hidden from view.

These bins are fire retardant.

1YR PARTS & LABOUR
GUARANTEE

All of our products come with a 1 year parts and labour guarantee as standard.
