For many years we have been providing the highest quality cabinet-making and fine joinery for a wide variety of clients including local authorities, churches and schools. In addition to standard product ranges for hymn boards, honours boards and internal notice boards, we are able to offer a bespoke manufacturing service for items such as document display cases, trophy cabinets and prayer boards.

We are able to work either from clients own drawings or, where necessary to provide a complete design and build service. By way of illustration, image 8 (below left) shows a new watering point for St Peter's Church, Iver. This faithful reproduction of the original was created from photographs and basic measurements supplied by the client.

In addition to the finest traditional craftsmanship, the images on this page show the incorporation of a wide range of other disciplines and technologies ranging from hand-painted heraldry and hand carving to fibre-optic lighting, bonded glass construction and touch-screen technology.
