# Greenbarnes Ltd

Not just another sign company

Greenbarnes did not set out to become a sign company; it happened as a result of us responding to “Can you make us .....?” requests received mainly from our existing customers who had come to us originally for notice boards. Over the years we have developed a range of standard products to meet the most frequent requests, but unlike many of our competitors we retain the ability to engineer bespoke solutions when appropriate.

## Standard products and bespoke items

- Flat plate aluminium signs
- Aluminium sign trays
- Post & plank signs
- Finger posts
- Directory signs
- Interpretation panels
- Encapsulations
- Commemorative & memorial plaques
- Clip frames
- “A” boards
- GRP signs

## Materials and techniques used include:

- Aluminium
- Mild steel
- Stainless steel
- Hardwoods
- Recycled plastics (Man-made Timber)
- Composites
- Solid surfacing materials
- Vinyl lettering
- Engraving
- Hand-painting
- Digital print

We pride ourselves on making client's ideas become reality. A case in point is the St George, Edgbaston project illustrated above. Following a long struggle to reconcile the conflicting requirements of the project architect, Diocesan Advisory Committee, and local planning authority with the constraints of their budget, the client approached us for help and advice. After consideration and consultation we were able to deliver a solution acceptable to all parties at approximately one third of the cost previously estimated.

For further information on our services, to discuss your requirements or to request a “no obligation quotation” please contact us. Please note that for larger projects we now also offer a consultancy service.
