

# LSD WORKMASTER® RANGE

Easy to move

Folds flat

Easy to open

**The perfect platform for work, indoors and out**

- ◆ Height adjustable – over 600mm in 6mm steps
- ◆ As easy to use as a step ladder, but much safer
- ◆ Secure guard rail that leaves both hands free
- ◆ Platform heights up to 3450mm
- ◆ Supplied fully assembled and folds flat for storage
- ◆ Aluminium construction – will not rust or corrode
- ◆ Lightweight, stable and very strong
- ◆ Works on slopes up to 16°
- ◆ Articulated foot spreads load and stops legs sinking into soft ground
- ◆ Three year guarantee

**LADDER  
SAFETY  
DEVICES**

# LADDER SAFETY DEVICES

**THE WORKMASTER®** range of work platforms has been designed to work effectively and safely for workers who need high access in the factory, office, village hall, church, squash court, in the garden and around the home. They are built to a very high standard using only aluminium, which makes them extremely strong, lightweight and corrosion free.

They have guardrails at each side and the front guardrail is adjustable. It can be fixed in any one of two positions to suit the user, thus improving safety. A sprung button locks this guardrail into the required position. The large platform (600mm x 500mm) is very stable and made of "Rhino-board" which is extremely durable and has a non-slip surface.

Each of the three models has four legs, which are individually adjustable over a range of 600mm in increments of 3mm, which allows it to cope easily with uneven ground. Each leg has a 140mm articulated foot which spreads the load and prevents it from sinking into soft ground.

The rungs are grooved to provide a non-slip surface and the position of the bottom "floating" rung is adjustable to take into account the required height of the platform.

Each WorkMaster® is supplied fully assembled and folds flat for storage.

There are three models available and for each model we offer a height extender, which can be fitted without the need for tools.

## THE COMPACT

The COMPACT has a working platform height of 750mm to 1350mm.

The COMPACT Height Extender provides an increase in height of 600mm giving a working platform height range of 1350mm to 1950mm and a shoulder height of approximately 3450mm.

## THE CLASSIC

The CLASSIC has a working platform height of 1350mm to 1950mm.

The CLASSIC Height Extender provides an increase in height of 900mm giving a working platform height range of 2250mm to 2850mm and a shoulder height of approximately 4350mm.

## THE PROFESSIONAL

The PROFESSIONAL has a working platform height of 1950mm to 2550mm.

The PROFESSIONAL Height Extender provides an increase in height of 900mm giving a working platform height range of 2850mm to 3450mm and a shoulder height of 4950mm.

## WORKMASTER® DIMENSIONS

SAFE WORKING LOAD 150kg

### WORKING DIMENSIONS

	HIGHEST	1950mm	2025mm

WorkMaster® Professional with Extender

The WorkMaster® provides the safest means of working at a height and it can be used for any work around the home, office, factory, village hall, school and orchard.

It is ideal for clearing gutters, painting windows, soffits and fascias and any general maintenance work.

## COMPLIANCE

The WorkMaster® range is manufactured to comply with the requirements of the General Product Safety Regulations of 1994.

**Manufacturers and distributors of access equipment complying with the relevant British Standard or HSE requirements**

## “Can I extend the height of my WorkMaster®?”

*Yes – many of our customers do (and it can be done whenever it suits you). The Extender unit is sold separately and can be purchased at any time.*

Professional with Extender
