

C.I.G.

COMMERCIAL & INDUSTRIAL GAUGES LTD

Product Guide Edition 1

Welcome to **The Complete Product Resource Catalogue**

C.I.G. Company Profile

C.I.G. Ltd is a manufacturing and supply company with in-house research and development capability, incorporating fabrication and engineering facilities.

We have many years of experience in the supply of tooling and pressure & flow instrumentation equipment. We have over 30 years spent dealing with, and working in different areas of water distribution systems covering product design, installation, development and manufacturing.

Our company is committed to continued improvement through ongoing research and design. With development work carried out both independently and in conjunction with our customers. It is our intention to be at the forefront of the implementation of quality, innovative instrumentation and equipment to underpin and enhance the status of the water industry.

C.I.G. A Leading UK Supplier

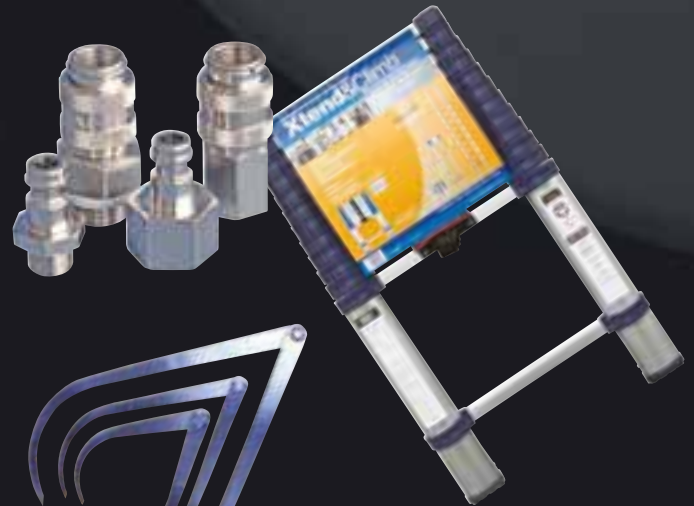

Shop

Our custom-built trade counter area is open during normal working hours, welcoming new and existing customers. We accept credit account customers, and also cash, cheques, credit and debit cards.

On display and available from stock, we have an extensive selection of products from within a comprehensive range of over 10,000 product lines, consisting of water works, tooling, gas equipment, plumbing fittings, couplings, hand tools and general fittings.

We are approved distributors for, the Draper range of hand tools, for Reed mfg, as well as being officially authorised for the sale and repair of Honda (UK) mfg. Industrial equipment, including Pumps and Generators.

We stock a wide range of items from a number of recognised and renowned industrial suppliers and manufacturers.

C.I.G. CUSTOMER HOTLINE T: 01978 661704

F: 01978 660321 E: info@cigltd.co.uk

Ideal for 'on-site' use

Customer care kits are designed, manufactured and supplied by ourselves.

Choose from our comprehensive standard range covering flow, pressure and water testing procedures.

C.I.G. Facts

- › Made to order
- › High quality aluminium cases
- › Lockable
- › Foam padded

- Ideal for 'on-site' use.
- 'Photographers' style lockable carrying case with customised routed inlay.

CUSTOMISATION

Customise a Kit to your own requirements for a variety of applications. Bespoke Kits to your design.

Specialist: ■ Air lock, ■ Chlorine, ■ Turbidity testing, ■ Meter removal & installation, ■ Flow and pressure testing.

Bespoke meter installation and removal kits.

Meter removal and installation kits to suit a variety of standard water meters.

Routed inlay, shapes cut to suit customer requirements.

Comprehensive selection of gauges, adaptors and connectors.

Comparators, discs and tablets supplied as kits or individually.

Original Hozelock fittings.

CARE KITS

Chlorine comparator test kit low level.

Compact stop tap and meter service kit.

Airlock removal kit.

Lockable Carrying Cases

With customised internal layout to carry and store a multitude of tools and equipment.

Bespoke water sampling test kit

To assist with the collection of 'clean' samples from hydrant standpipes supplied with chlorine spray bottle, spare washers and customer designed extended instantaneous coupling.

4 x meter head removal kit

Utility 4 x head kit c/w 4 in 1 and spindle grip keys

Multi function stop tap repair and operation kit

Levels of service flow and pressure
To take flows and pressures from meter chambers and consumers outlets.

Flow and pressure test kit
To take flows and pressures from taps and standpipe outlets

Hoses for level of service
Can be cut to length to suit customer requirements.

TEMPORARY REPAIR
Spare Bungs for temporary repair stop tap headworks replacement kit

HYDRANT FLOW AND PRESSURE TEST MEASUREMENT

The Flowmaster provides a reliable and accurate flow and pressure measurement. Invaluable for hydrant testing, pump testing, flushing and water main condition testing. Simply attach, switch on and take flow and pressure readings. Measures flow rates up to 3,000lpm and pressures up to 25 bar. The electromagnetic sensor has no moving parts – measurement is not affected by debris in the water stream.

Digital Flowmeter with Analogue Gauge

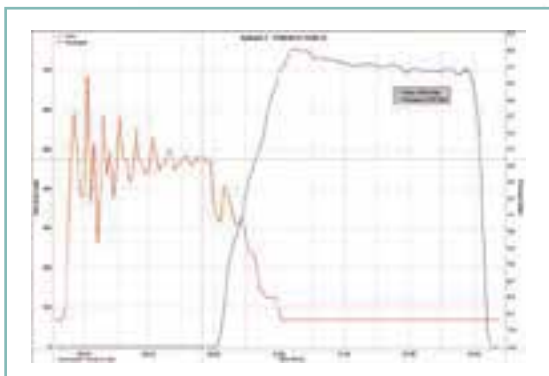

Digital Flowmaster 250DL with Logger

Portable flow & pressure test instrument with Digital display and data logger. The Flowmaster 250DL measures the flow rate and the pressure and produces verifiable reports. All measurements are digitally recorded and can be downloaded to a computer and predefined reports and graphs can be printed. Unobstructed straight through flow measuring system. Supplied with Mains battery charger. In-car / van chargers also available on request.

Straight Through Hollow Meter

Eliminates the problem of paddle wheel blockage. Allows for higher and more consistently accurate flow rates to be taken. Battery powered with daylight activated digital screen. These flowmeters are ideal for mains flushing from fire hydrants.

C.I.G. Facts

- › Utilising proven Flow measuring technology
- › Digital display. Rate of Flow and total volume discharged
- › Light weight

VERSATILITY

Available as a lighter weight floor standing connected via hose, or as a direct 'plug-in' flow meter.

Utilising proven ABB Magflow technology. Digital display provides rate of flow and total volume discharged

Light weight, floor standing connected via Hose or as a direct "Plug In" Flow meter, these versatile Digital Flow Meters can provide loggable recordable data. Available with Instantaneous or "other" inlet and outlet connections, to customers requirement.

The straight through hollow design of these meters eliminates the problem of paddle wheel blockage, and being of magflow style also reduces the required upstream and downstream pipe diameters before and after the meter. Allows for higher and consistently accurate flow rates to be taken and recorded.

FLOWPOD 3000

A lighter weight version of Flowmaster 250, it provides accurate and reliable water flow and volume measurements. Designed for in-line use. Connect directly to low pressure outlet on a pump or between two hose lengths.

Three versions available:

- Portable flow meter
- Portable flow meter with analogue pressure gauge
- Portable flow and pressure meter with data logger

UK MANUFACTURED

- Tried and tested and still produced at our manufacturing site in the UK.
- Light weight, with no moving parts straight forward basic operation.
- Flow or Weir Cup Indicators.

THE FLOW CUP INDICATOR FAMILY

5 gallon/25 litre, 10 gallon/50 litre and 35 gallon/150 litre.

COLD WATER TURBINE TYPE FLOW METER

For inline or discharge applications. Supplied with BSP male connections or fitted with customer specified connecting couplings as required.

VARIABLE AREA INLINE FLOW METERS

A multitude of size and flow rate ranges are available. Please contact our sales team to discuss any specific requirements.

COLD WATER FLOW METERS

■ One of the most popular ranges of meters, available in a 15 or 20mm connection size to suit all smaller and domestic applications. These meters can be mounted in either a horizontal or vertical position thanks to the single jet measuring style.

Range of Rotary Piston Water Meters designed for high levels of accuracy and flow performance.

COMMERCIAL SIZED COLD WATER METERS

■ Designed to allow for bulk flows of water, to be monitored in either a horizontal or vertical installation position. PN16 flanged connection as standard from 40mm up to 300mm. There is also an option of a BSP connection for the 50mm meter. Pulsed versions are available.

FLOW

Hoses for many and varied applications. Suitable for suction and discharge. FDA and drinking water suitable hose available.

SEMI RIGID HOSE

Reinforced spiral wound.

HOSE BANDING CLAMPS

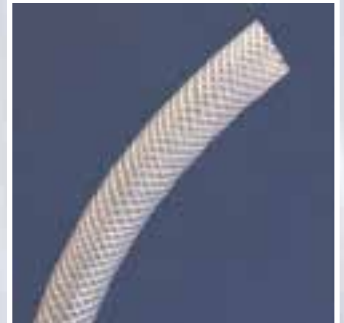

Heavy duty bolt fixing, Worm Drive or Dog Ear type clips.

PVC LIGHT DUTY LAYFLAT HOSE

Ideal for open ended water discharge flushing applications.

REINFORCED PVC SEMI-RIGID HOSE

Supplied as coils or cut to size as required. Used in assemblies such as Flame Trap hose.

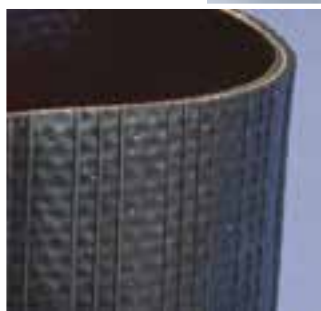

LAYFLAT HOSE

Type 2 General purpose hose.
Type 3 Brigade quality hose.
DWI approved for potable applications.

DRAGMASTER LAYFLAT HOSE

Superb kink resistance prevents point abrasion and lining damage.

HOSE

DWI HOSE

DWI Approved, UK made potable hose cut to length and coupled according to customer requirement. Outer sleeve stencilling available on request.

BRAIDED PVC WATER DELIVERY HOSE

10 bar rated. Aquavend water hoses - WRAS approved hose - suitable for potable water transportation. General purpose reinforced PVC semi rigid hose. Available in various colours.

Manufactured in the UK, layflat hose exceeds BS 6391:2009 Type 3. A strong, lightweight covered hose combining high performance with affordability.

'MILL' HOSE

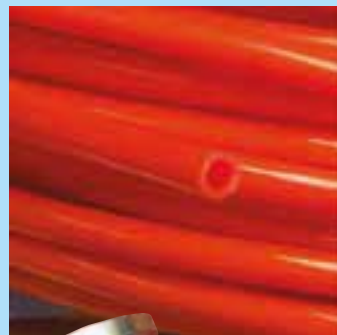

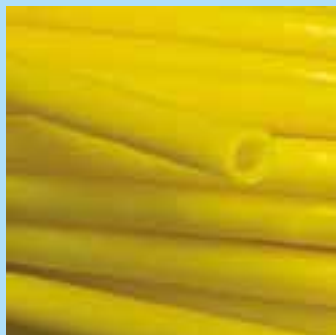

Uncoated layflat 'Mill' Hose. Cut to length. Can be supplied with 'wired on' or banded couplings as required.

P Printing Available

NYLON TUBING

Metric and Imperial sizes. Coil and cut lengths available in various colours as required.

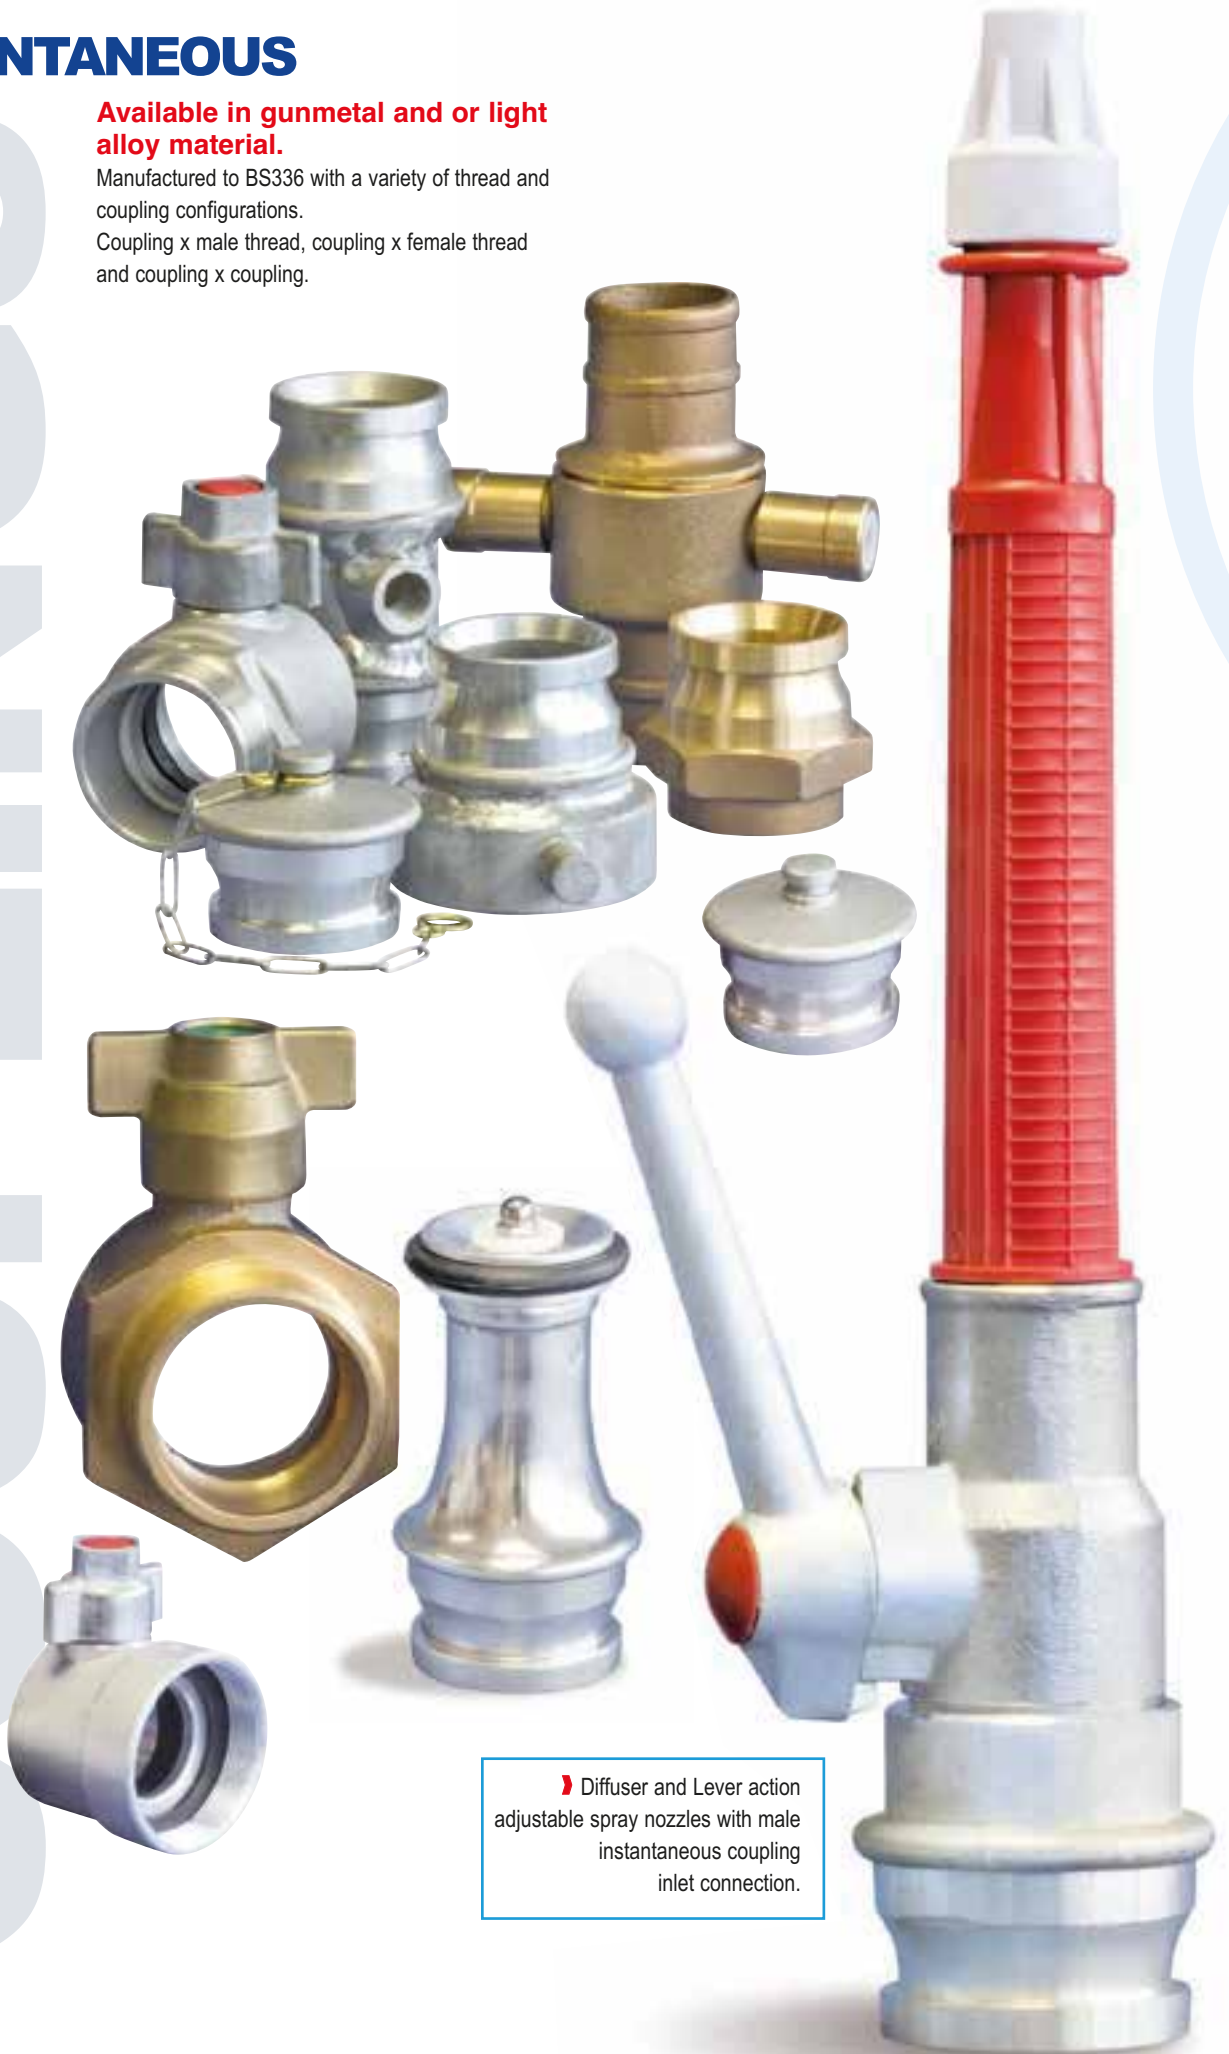

INSTANTANEOUS

Available in gunmetal and or light alloy material.

Manufactured to BS336 with a variety of thread and coupling configurations.

Coupling x male thread, coupling x female thread and coupling x coupling.

COUPLINGS

▶ Diffuser and Lever action adjustable spray nozzles with male instantaneous coupling inlet connection.

INSTANTANEOUS

2 1/2" female instantaneous light alloy coupling x 1" BSP male thread.

2 1/2" female instantaneous light alloy coupling x 3" BSP male thread.

2 1/2" female instantaneous light alloy coupling x 2" BSP female thread.

2 1/2" double male instantaneous adaptor

2 1/2" female instantaneous light alloy coupling x 3" BSP female thread.

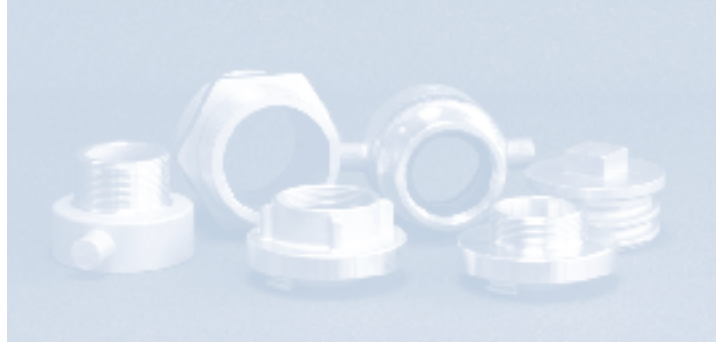

Double female instantaneous coupling single twist releases.

Female instantaneous blanking cap x single twist release.

Non - standard adaptors. Collecting and dividing breechings available.

COUPLINGS

CAM AND GROOVE COUPLINGS

Cam and Groove couplings as shown, available with male, female threaded and hose tail connections. Can be supplied in light alloy, stainless steel and polypropylene.

PUSH-IN FITTINGS

Compatible with many fluids and gases. Available for use on metric and imperial tubing. Materials of construction; stainless steel, Nickel plated brass and plastic

NICKEL PLATED BRASS QUICK RELEASE COUPLINGS

Male and female connection type with male or female BSP threads.

STORZ TYPE COUPLINGS & ADAPTORS

Supplied in brass or aluminium material. Available with BSP male or female connecting threads and hose tail. Couplings are available as either standard coupling or with safety latch feature.

BAUER TYPE LEVERLOCK

**LEVER LOCK
BAUER TYPE
COUPLINGS**

Many available from stock.
A comprehensive range of
industrial and agricultural
couplings for suction or delivery
use. Supplied galvanised steel
or as stainless steel.

STANDPIPES

CONTRACTOR TYPE STANDPIPES

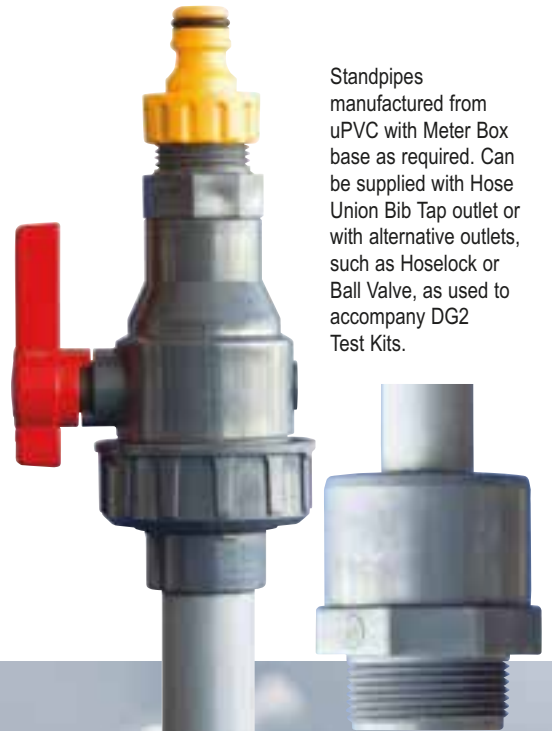

Bespoke assembly, with various formats available, to suit a multitude of applications.

Manufactured from heavy duty galvanised tube cut to length as required.

Can be supplied with alternative inlet threads and outlet configurations to suit customer requirements.

Assembled with BS1010 brass hose union bib tap, with in-built integral or separate double check valve installed in upstand of standpipe.

Standpipes manufactured from uPVC with Meter Box base as required. Can be supplied with Hose Union Bib Tap outlet or with alternative outlets, such as Hoselock or Ball Valve, as used to accompany DG2 Test Kits.

Meter Box

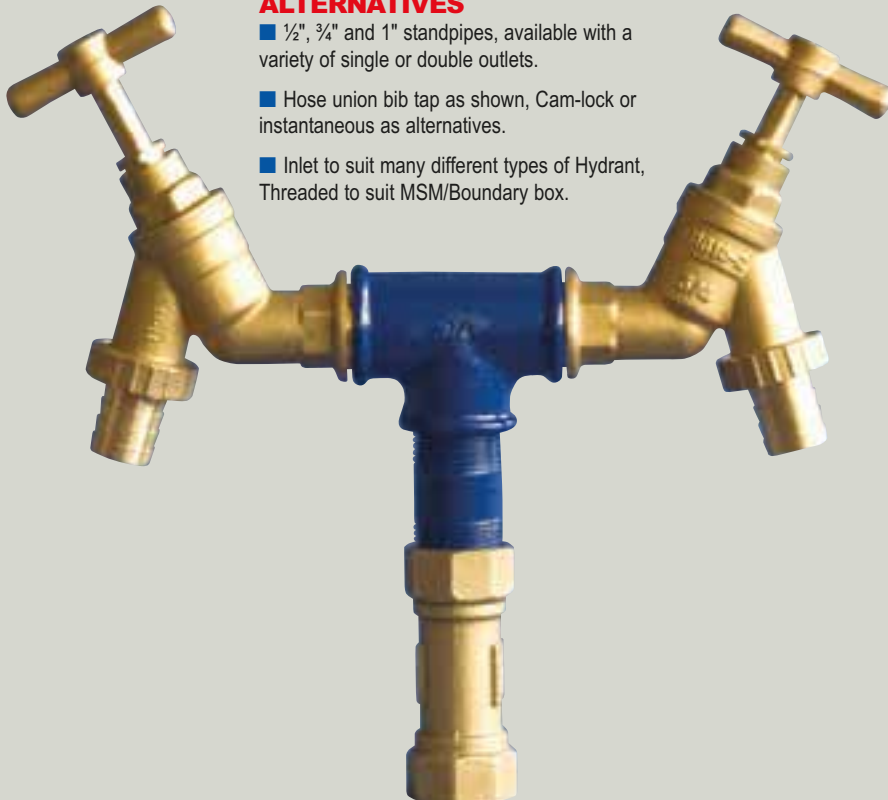

Belfast

LRT

ALTERNATIVES

- 1/2", 3/4" and 1" standpipes, available with a variety of single or double outlets.
- Hose union bib tap as shown, Cam-lock or instantaneous as alternatives.
- Inlet to suit many different types of Hydrant, Threaded to suit MSM/Boundary box.

HYDRANT STANDPIPES

Quality hydrant standpipes in any configuration.

2½" (64mm) light alloy hydrant standpipes with BS750 Base and BS336 instantaneous outlet. Single or double swivel outlet.

FLANGE ADAPTORS

Light alloy flanged adaptor with male or female instantaneous coupling.

RECOIL HOSES

Pressure hose extending recoil hoses supplied fitted with male x female Nickel plated quickfit couplings.

HYDRANT CAPS

Hydrant Caps supplied as Blanking Caps or complete with Pressure Test Point available in most configurations to suit standard underground hydrant outlet. London Round Thread, Belfast Vee Thread, Bayonet Lug Type and Boundary box / MSM caps with Probe outlet.

EVERY COMBINATION

Hydrant standpipe, light alloy, single or double outlet, swivel or plug in head. Can be supplied with or without backflow prevention.

← 2½" light alloy single "Plug In Head" outlet, hydrant standpipe c/w integral WRAS approved double check valve

WASHERS

Standpipe base, Body Joint and Outlet Washers, available in standard sizes or cut to size in Leather or EPDM Rubber.

BASES

Hydrant Standpipes can be made available with a variety of bases to suit customer applications. Belfast Vee Thread Male, Bayonet Lug or London Round Thread Female for example.

2½" light alloy single swivel head outlet, hydrant standpipe.

C.I.G. : EVERYTHING YOU NEED T: 01978 661704

VALVE KEYS

The range of forged steel equipment is as comprehensive as possible, endeavouring to incorporate the basic and fundamental light, medium and heavy duty keys for the operation of Hydrant and Sluice Valves.

Hydrant and Valve operating keys supplied in a multitude of options. Solid shaft with looped top. Aluminium with hollow shaft and integral bar. Steel with Hollow shaft and integral bar.

KEY OPTIONS

Valve keys can be supplied with Sockets available to suit Trunk main valves as well as a variety of local Valve designs, "Metropolitan", "Liverpool pattern", "Triangular" and Euro Valve sizes.

HANDHELD POWERED VALVE OPERATOR WITH GFI AND OVERLOAD PROTECTION.

Can be supplied complete with electric, hydraulic or pneumatic drive, LCD revolution counter, torque arm extension, manual and steel storage case. Lightweight, one man operation with finger tip control of rotating direction and shut off. Greatly reduces operator muscle strain and fatigue.

HYDRANT AND VALVE OPERATING KEYS AND BARS

Supplied to suit standard and non-standard valves. Standard sizes available from stock. Non-standard size sockets and key length can be made to order.

TOGGLE TYPE VALVE KEYS

These keys are used to provide that extra control when opening and closing valves. Supplied with lightweight hollow Steel Key and operating bar.

TWO PIECE FORGED STEEL EXTENSION SPINDLES

Most common lengths are available from stock. Non-standard can be made to order to suit customer requirements.

FIXED AND ADJUSTABLE GUIDE BRACKETS

Available to support longer than standard spindles.

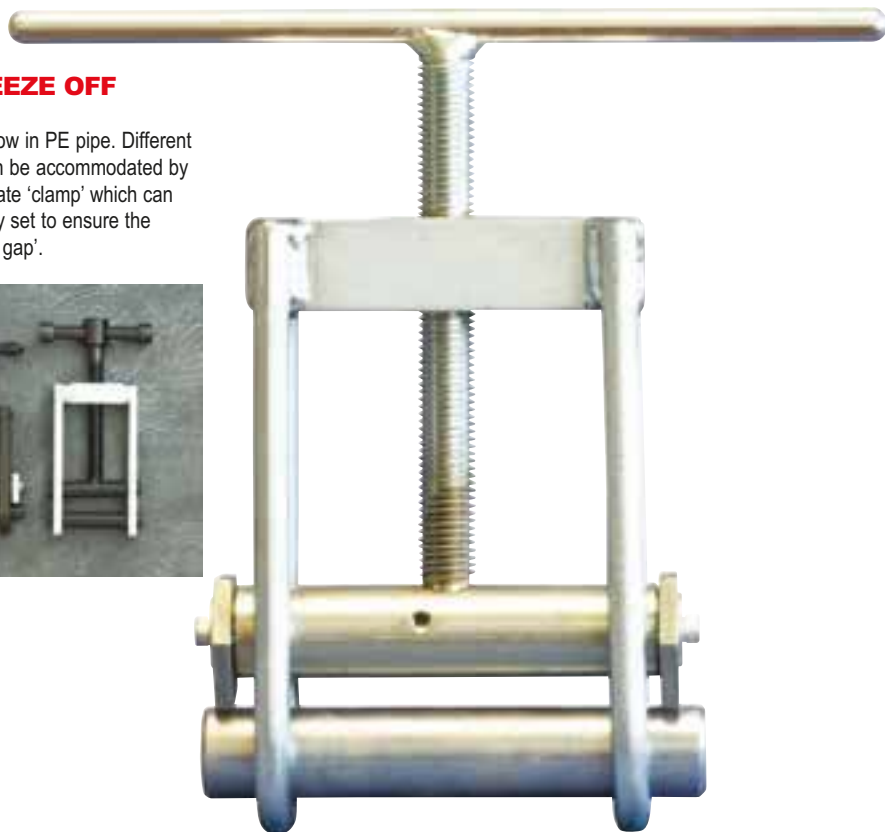

PRY BARS & VALVE KEY OPERATING BARS

Standard length and diameter or, manufactured to customers specific requirements. Plain flat ended, chiselled or with pointed ends.

PIPE "SQUEEZE OFF CLAMPS"

Used to limit the flow in PE pipe. Different pipe diameters can be accommodated by using the appropriate 'clamp' which can then be individually set to ensure the optimum 'squeeze gap'.

PIPE FREEZING KITS

The Polar freezing kit is used in combination with a disposable container of high quality original Polar® freezing spray. The kits are packed in handy plastic carrying cases which include gas canisters and jackets required for large freezes. Easy to use scales are included to ensure best possible gas usage for each freeze.

STANDARD FERRULE KEYS AND PLUG LIFTERS

JETFREEZER

Reduces downtime and cost by eliminating the need to drain down pipework before maintaining, repairing or extending a system. Utilising the intensely cold properties of solid carbon dioxide, Jetfreezer rapidly and economically creates a positive ice plug in the required work area.

Natural convection melts the ice plug restoring supply in minutes when the work is complete. Jetfreezer freezes water in a 15 mm diameter copper pipe in approx. 3.5 minutes.

SPRAYS

- Gas leak Spray fluid, non flammable for detection of leaks in joints, connections etc.
- CIG Pipe Freezer spray
- "Polar" canisters, for use with the Polar range
- Crack It – Shock Freeze Release Spray

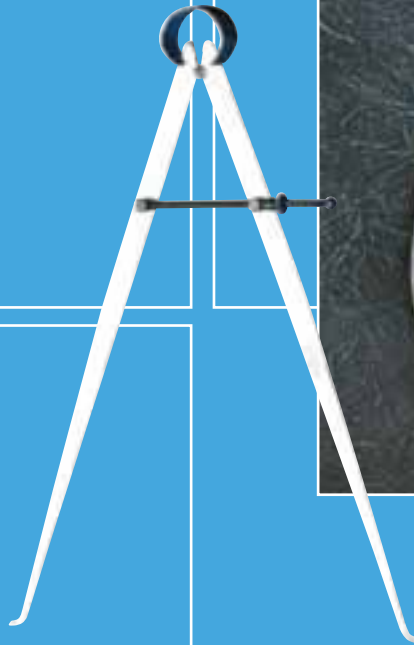

CALIPERS

Available with Stiff Joint or Spring Joint, Internal or External Pipe measuring calipers.

TAPES

Pipe measuring Tapes, showing pipe circumference and pipe diameter.

SADDLES

Saddle Straps in Gunmetal available as plain or with female threaded boss. Suitable for AC, Cast Iron or PVC, Steel and Ductile Iron. Swivel ferrules available in Plug, Screw-down or Self-tapping pattern. Outlets: Female iron or Push-fit.

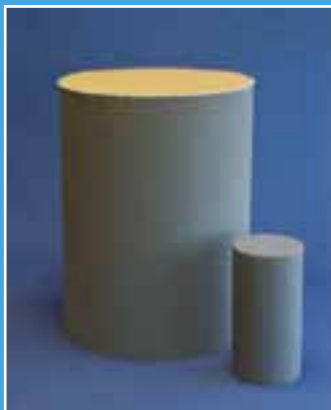

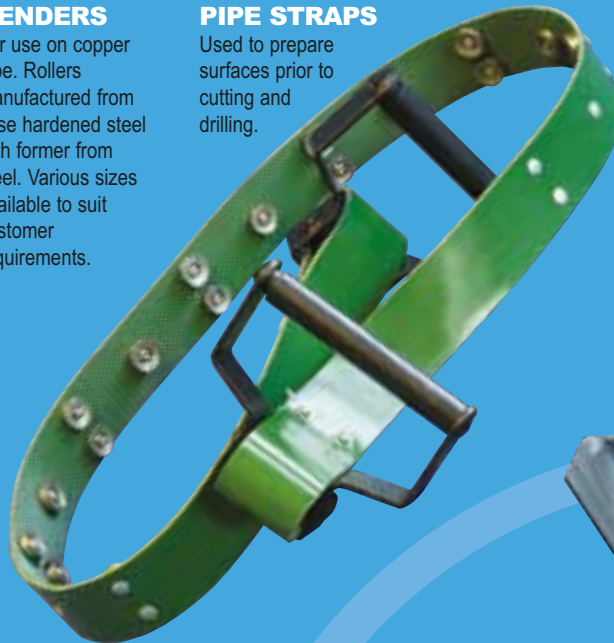

BENDERS

For use on copper pipe. Rollers manufactured from case hardened steel with former from steel. Various sizes available to suit customer requirements.

PIPE STRAPS

Used to prepare surfaces prior to cutting and drilling.

SWABS

Foam "Pigs" (Swabs) used to remove dust or debris from pipe internals. Generally pushed through by water pressure.

DRILL TAPS

Full selection of Drill Taps, Holesaw Taps and cutters.

LIFTING KEYS

Whatever the grid - we have the key.

Lifting Keys, of single piece construction with forged lifting tip. Tee or Triangle Handle. Bespoke keys can be made to order.

MECHANICAL GRID LIFTER

Mechanical Grid Lifting device to lift Split covers. Supplied with Seal breaker.

LIFTING KEYS

Gatic, BT Style, Safety Lifters, Multi-head Lifting Keys.

STOP TAP & METER KEYS

"Stop Tap" and "Chamber Lock Off" devices to prevent access to, or unwarranted operation of Stop Tap Valves.

BARRACUDAS

To be installed in chamber directly above Stop Valve to obstruct access to valve and reduce opportunity of unwarranted operation of tap.

HYDROSCOPES

Illuminating meter reading device with integral magnifying glass.

LOCK OFF CLAMPS

To be installed directly onto valve to hide crutch from view to assist in prevention of unwarranted operation of Stop Tap.

METER REMOVAL / INSTALLATION HEADS

Stop Tap Key c/w 1/2"
Male available with
lockable or non-Lockable
square drive.

C.I.G. Facts

» We manufacture a comprehensive range of meter removal / installation keys to suit the most commonly available revenue meters.

BESPOKE STOP TAP OPERATING KEYS

Keys can be manufactured to customer designs as required.

4 IN 1 STOPTAP KEY

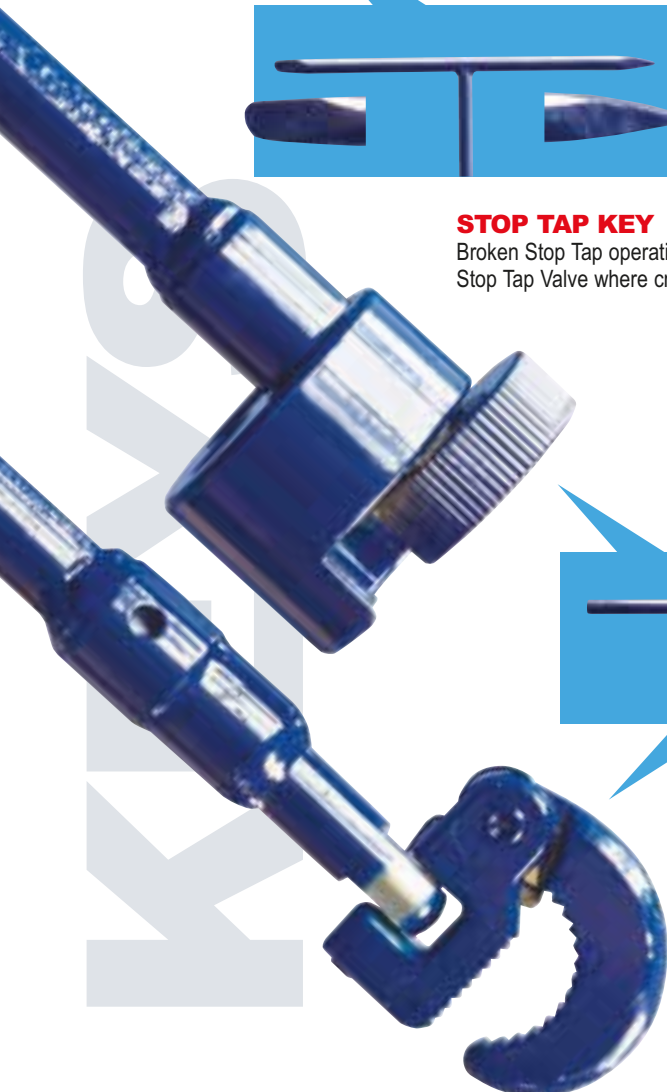

STOP TAP KEY

Broken Stop Tap operating Key to enable operation of Stop Tap Valve where crutch is missing from spindle.

CAM & CLAW

"Cam key" (Spindle Grip) and "Claw Key".
(Headworks removal tool)

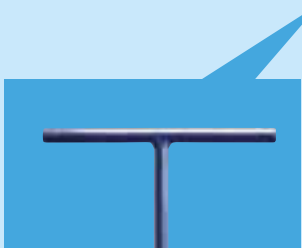

STANDARD DESIGN HEAVY DUTY & LIGHTWEIGHT KEYS

Available to suit the majority of Stop Taps currently in use.

STANDARD STOP TAP KEYS

Available supplied as Crutch Head, Female Square or 2 & 4 prong.

C.I.G. Fact

› We can manufacture Stop Tap Keys to specification supplied.

BESPOKE CHAMBER CLEANING TOOLS

Steel chamber Cleaning Scoops, Ladles and Grabs, all can be manufactured in a wide variety of shapes and sizes to suit most requirements. If you have a design in mind let us quote to manufacture.

PUMPS

A superb range of quality pumps to get the job done - big or small.

Portable Pumps to Trash Pumps designed for a variety of uses. Lightweight and high pressure performance pumps, popular uses gardening, irrigation, dust suppression. High flow rate pumps are able to deal with large volumes of water with solids up to 6mm quickly without clogging or causing damage. Trash pumps can be used to drain water containing solids up to 31mm.

The Power of Dreams

GENERATORS

The right generator for the job.

From campsite to building site C.I.G. Ltd have a range of suitable Honda generators. Portable, lightweight, super-quiet, to high performance endurance generators. Robust, reliable, requiring minimal maintenance, for commercial and industrial use. Manoeuvrable, high-tech generators with Honda pioneering technology, providing clean, stable and economical electricity and are just what you need in an increasingly mobile and electric-powered world.

EC3600

EG3600

PUMPS

Petrol/Hand or Electric Pumps.

Chamber emptying pumps are available in a multitude of sizes and power supplies.

If you need to move that water fast, get a pump from C.I.G. on the job - from small portable pumps to large trash pumps. Compact and portable. When you need strong and reliable water pressure, our pumps will get the job done.

2 Stroke Petrol Pump

50:1 Mix Weighing 5.5kg.

110 lpm max flow.

7 Metres Max head suction.

32 Metres Head max.

4 Stroke Petrol Pump

Lightweight, weighing just 6.1kg general purpose 1" pump. Easy starting 4-stroke engine is clean and quiet.

ELECTRIC PUMPS

12 Volt Chamber emptying Pumps supplied with connecting power cable, Cigar Plug and discharge hose.

BILGE DIAPHRAGM PUMPS

If required, pumps can be supplied with a foot plate for added stability.

WORKHORSE

This workhorse of a pump is used in industries and occupations as diverse as the MoD, construction, utilities, farming, agriculture and fire departments.

BAILING BOWLS

9" galvanized Bailing Bowl with wooden handle.

HAND PUMPS

Hand operated chamber emptying Hog and Bailer Pumps.

EMPTYING SPOONS

Forged steel type chamber emptying spoons. Small, medium or large head with vanes cross welded across face of spoon. Supplied as standard with 4ft handle with cross bar. Light or heavy duty shaft.

EMPTYING SCOOPS

Mechanical chamber emptying scoops with a variety of bowl diameters and handle lengths available. These scoops are ideal chamber emptying tools.

FLEXITRAC

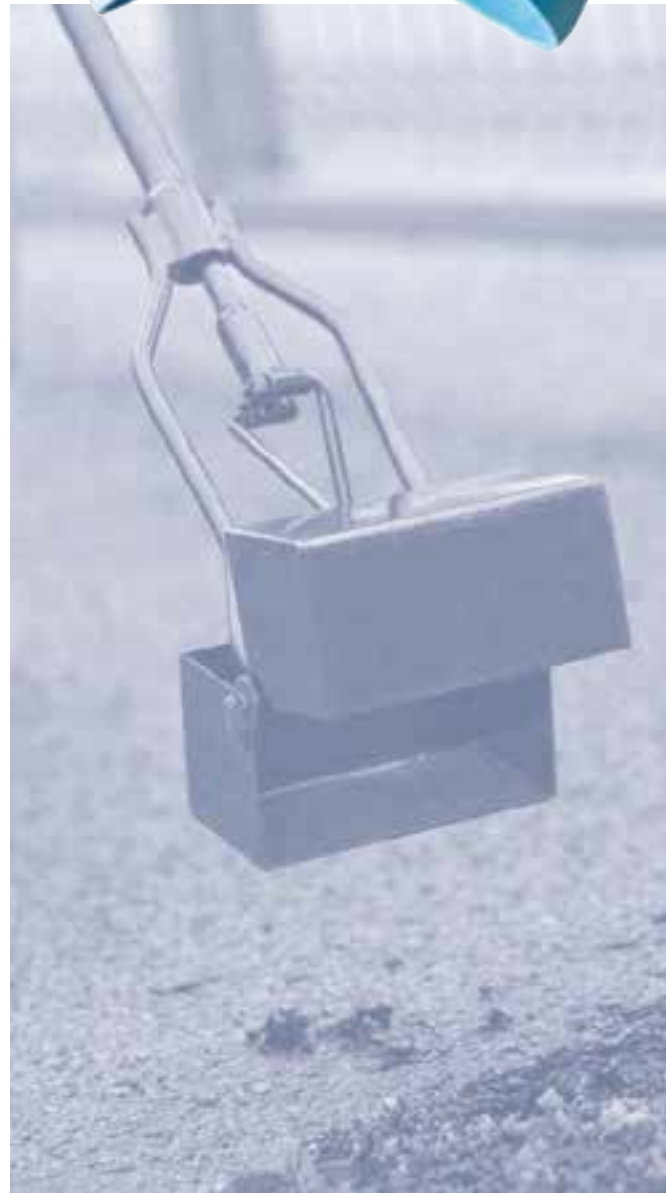

To assist with locating and tracing the position of underground duct, pipe and drain, to be used in conjunction with cable location and generator equipment.

DRAIN TRACING DYE

Available in various colours. Used to establish source and route of surface water.

For full range of location and sounding equipment see pages 43 - 46.

LOCKFAST DRAIN CLEANING RODS AND TOOLS

These Rods are generally recognized as being among the best quality rods available and can be found specified on a world wide basis as being the preference of professionals. They have a well deserved reputation for being reliable, strong and rigid but still with just the right amount of flexibility.

They have been developed through many years of constant research and development, the rods are manufactured from the highest grade of polypropylene whilst the joints are manufactured from solid brass. To ensure strength and durability during use the brass joints are securely fitted to the rods by brass rivets.

LOCKFAST DOUBLE WORM SCREW HEAD

To remove foreign objects from within Pipework

LOCKFAST PLUNGERS

Robust rubber plungers. Builds up pressure of water which forces obstruction clear. The plunger is supplied complete with washers, which enables the rubber plunger disc to be removed and replaced.

FITTINGS

Pipe fittings and connectors.

Compression, Male and Female threads, Weld socket and Quickrelease couplings. Coupling configuration to suit many and varied applications.

LISTENING DEVICES

Electronic and manual listening devices are the first line of attack as an aid in determining the location of leaks. A comprehensive range of tools are available to assist with the initial detection of leaks.

GROUND MICROPHONES

These high performance acoustic leak detectors have built up a solid reputation due to the useful hand switch and lightweight sensor. They allow for accurate location of the actual leak. These ground microphones are designed for both the beginner and professional and can provide optimum sound amplification. Tried and tested equipment to assist with accurate pin pointing leak location.

BEECH EAR PIECES

Extended Beech sounding Earpiece with metal insert

STANDARD PIECES

Sapele or Nylon standard Earpiece with metal insert

MANUAL LISTENING STICKS

Are one of the oldest ways to find a leak but can still be extremely effective in assisting in finding leaks. Sounding sticks manufactured from a combination of wood and metal are still the preferred tool of many watermen.

WOODEN LISTENING STICKS

These basic, cost effective sticks are a regularly used product from the C.I.G. leak detection range. Manufactured at its most basic level from a cost effective soft wood or if required from a more close grained harder wood. All supplied with metal ferrule at base of rod.

POCKET STETHOSCOPE & EXTENSION ROD

The 8" pocket stethoscope, as its name suggests is a pocket sized sounding device manufactured with a stainless steel rod covered with a black P.V.C. sleeve and earpiece. Used for close up direct sounding of pipework and fittings. To accompany this listening device we are able to supply a stainless steel extension rod of 0.5mtr or 1.25mtr length to attach to the pocket stethoscope for remote sounding.

STETHOSCOPE TYPE

Utilising a "Doctors Style" Stethoscope earpiece, this mechanical sounding device with bell chamber provides enhanced acoustic functionality, collecting and amplifying leak noise. A stainless steel extension rod of 0.5mtr or 1.25mtr length is available for remote sounding.

PALATINE TYPE

An entirely hollow two piece listening stick with sounding chamber type earpiece to augment the slightest sound. A device that has been tried and tested over many years.

DIAPHRAGM TYPE

Stainless steel Diaphragm Listening Sticks incorporating an optimum designed resonance chamber which amplifies the leakage noise from a variety of pipe materials. Complete with larger ear piece and protective rubber cover. Available as single, two or three piece construction 4ft and 5ft lengths with straight or angled head.

MEASURING WHEELS

SOURCE:

Supplied by world leading manufacturers of quality distance measuring wheels suitable for a wide range of applications.

FEATURES:

- Accuracy of 99.5%.
- Measuring distance 9999.9m with increments of 0.1m
- Push Button Zero reset.
- Wheel diameter 0.32mtrs
- Wheel circumference 1m
- Easy store folding design

APPLICATIONS:

Running in sealed roller bearings these accurate measuring wheels are suitable for a multitude of applications: road marking, construction, garden layouts, field and factory layouts property assessments, etc... Can be used on most surfaces smooth and uneven over long or short distances.

CABLE AVOIDANCE

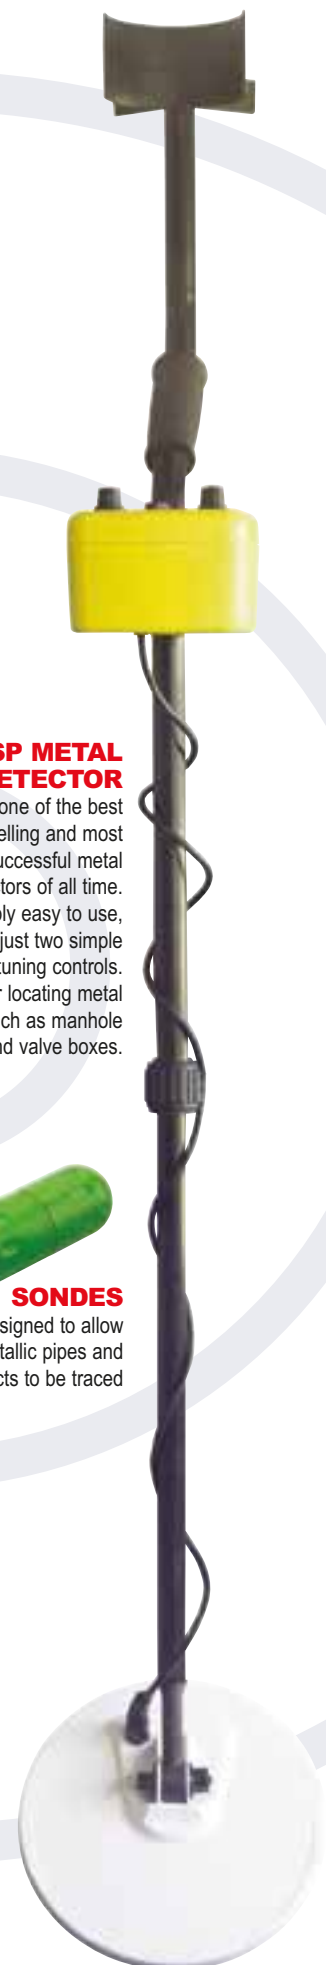

CABLE AVOIDANCE TOOLS

Standard Depth and Data-logging versions available. Contact C.I.G.Ltd with your requirements.

WASP METAL DETECTOR

Arguably one of the best selling and most successful metal detectors of all time. Remarkably easy to use, having just two simple tuning controls. Ideal for locating metal objects such as manhole covers and valve boxes.

GENNY

Transmitter for use with CAT Contact C.I.G.Ltd with your requirements

SONDES

Designed to allow non-metallic pipes and ducts to be traced

ROD AND REEL

Glass fibre reinforced helically wound epoxy rod giving excellent bending elasticity making it ideal for short to long installations into ducts. It is an ideal and fast way of installing draw ropes and winch ropes into ducts, ready for cable pulling and location operations.

PLASTIC PIPE TRACERS

20 & 50m – Designed to allow small diameter, non metallic pipes to be traced.

TEST KITS

Test kits for analysing drinking water, wastewater and process water, environmental and soil analysis, these products can assist you in making the critical decisions in the field or the laboratory.

MAKING TESTING SIMPLE

Designed to provide simplicity of testing and the capability to be used either in the laboratory or in the field – both aspects making them ideal for use in a variety of applications.

POTABLE WATER

Whether it is a municipal supply from the tap or a well in a rural village, this range of drinking water testing products will test for safety, acceptability and compliance with local regulations.

WASTE WATER/ ENVIRONMENTAL

Industrial wastewater testing, municipal wastewater testing, surface water monitoring of marine and fresh water supplies.

BESPOKE

Bespoke designed kits to customers specification to suit particular application

H₂O

COMPARATORS

Compact, ergonomic and supplied with high quality discs, the Comparator is perfect for visual testing of drinking water, wastewater and water treatment applications.

CHLOROMETERS

The Compact Chlorometer provides free and total chlorine analysis utilising the DPD method in a choice of hard and soft case kits.

INSTACHLOR TABLETS

A convenient method of small-scale chlorination, ideal for water containers, water tanks, wells or a small reservoir.

PHOTOMETER TABLET RANGE

Provides stable, portable and simplified water testing reagents for a wide variety of parameters from aluminium to zinc. Including the world famous DPD tablet range.

AMMONIA

The Compact Ammonia Duo provides field analysis of ammonia and ammonium ideal for drinking water or wastewater and environmental analysis

Palintest[®]
Leaders in Water Analysis Technology

STANDARD COMPARATOR KIT

High performance visual testing for a wide range of parameters suitable for drinking water, wastewater, boilers and cooling towers

C.I.G. : EVERYTHING YOU NEED T: 01978 661704

CHLORINATION / DE-CHLORINATION

Chemicals, reagents, dosing units and consumables for chlorinating, de-chlorination, disinfection and sterilisation of water mains, tooling, water containers, tanks, wells and small reservoirs.

D-CHLOR TABLETS

Principally sodium sulphite a reliable and proven method of removing chlorine to prevent contamination of a water course after chlorination of a water main.

INSTACHLOR

Rapid release chlorine tablets, convenient means of small scale chlorination, 150mg 1grm and 3grm chlorine content available.

SODIUM THIOSULPHATE

25kg bag of crystals used as a de-chlorination agent to prevent pollution of water course.

CHEMICALS

Sodium hypochlorite 14/15% available in 5ltr and 20ltr containers used to chlorinate a water supply. Sodium bisulphite used to dechlorinate waste water prior to discharge into the environment available in a 25ltr container.

TABLET FEEDER

For use in conjunction with chlorination and de-chlorination tablets, we can fit the inlet connection of your choice.

MODULAR DOSING UNIT

Hydraulically driven dosing unit being flow proportional the dosing remains constant irrespective of variations of flow and pressure. Chlorinates 3000lph @ 30-300 ppm supplied with instantaneous connections in a lockable casing supplied with a 5ltr chlorus carrier.

Lockable secure housing for chlorus solution.

BALL VALVES

From a single brass ball valve, our product range has been expanded over time to meet the many requirements and expectations that our customers have. Everything from butterfly valves to diaphragm valves to solenoid valves, available in a range of different materials

including: brass, bronze, stainless, carbon steel, cast iron and plastics. Gas and WRAS approved valves available for quotation upon request. We can supply a comprehensive range

of valves making it easier for our customers to get everything they need all under one roof. Our range includes Full bore Lever Action Ball Valves and Compression, Mini Ball Valves, Needle Valves, Gas Valves and Test Points.

GATE

GATE VALVES

Offering a range of gate valves in various construction materials allowing them to be used in many and varied applications, including boiler room, steam, HVAC, water distribution & treatment, agricultural, compressed air, oils and gases.

HOZELOCK TAP ADAPTORS AND EQUIPMENT

We stock and supply an extensive range of Hozelock fittings and equipment. Manufactured to the highest quality, Hozelock produce a comprehensive range that covers: watering fittings, tap adaptors, pressure sprayers and high pressure cleaners. With over half a century of expertise developing their product range combining knowledge, experience and craftsmanship. Every product is crafted to work time after time, so that our customers can be confident in the reliability of these products.

TAPS

C.I.G. Facts

- › Over 15 tap styles available
- › Brass, chrome, zinc plated

Taps from a wide range of options, as Lever action ball tap and Standard crutch type taps Hose Union and plain Bib type. Non-concussive self closing taps for commercial applications.

WE OFFER A WIDE RANGE OF TAPS AND VALVES.

Hose Union Bib Taps available to BS1010 / BS5412 Standard and as WRAS approved, supplied either with or without internal check valve.
 1/2" BSP All Chrome Plated Tap or All 316 Stainless Steel construction for sampling applications c/w with tapered outlet, Dust cap and retaining chain.

C.I.G. : EVERYTHING YOU NEED T: 01978 661704

WHATEVER THE VALVE TYPE...

Pressure Relief and Vacuum breaker valves, Air Valves, Pipe interrupters. Safety relief valves, supplied for various specifications, to provide safety from potential over pressurization and backflow.

VALVES

STAINLESS STEEL / BRASS / PLASTIC SAFETY RELIEF VALVES

These Valves are particularly suitable for liquid applications where a 'small' discharge often prevents the safe pressure in a system being exceeded.

ANTI-VACUUM VALVES

Used to relieve unwanted vacuum conditions in storage tanks & cylinders and prevent collapse due to internal vacuum.

DOUBLE CHECK VALVES

Lightweight WRAS approved, compact double check valve used to help prevent contamination risk and protect against back-flow and back-syphonage. Allow high flow rates with minimum pressure drop.

Suction strainer Simple pump inlet protection (Coarse filter mesh)
Tin Can strainer hose tail with no valve.
Suitable for clean or dirty water applications. Generally used together with engine driven pumps.

STRAINERS

'Y' STRAINERS

A range of compact, in-line 'Y' strainers available in a variety of sizes with compression or BSP Threaded connections c/w Access port for servicing the filter.

SAFETY RELIEF VALVES

Full lift Safety Relief Valves used to prevent excess pressure build-up in systems providing maximum flow rates. Suitable for use on steam, liquids and gases.

FOOT VALVE STRAINERS

WE OFFER A WIDE RANGE OF FOOT VALVE STRAINERS. Designed to be installed on the suction side of the pump, the Foot valve maintains pump prime between pumping cycles. The strainer prevents debris from entering the piping system and minimizes head-loss to optimize pumping efficiency.

GAUGES

Whatever the application we have a gauge to suit.

For more than 28 years, Commercial & Industrial Gauges Ltd has been synonymous with the design, manufacture and supply of quality pressure gauges and thermometers, with a comprehensive range that has been developed by customer request and specification.

Available as standard or specifically designed these instruments are adaptable to wherever pressure or temperature measurements are required.

THERMOMETERS

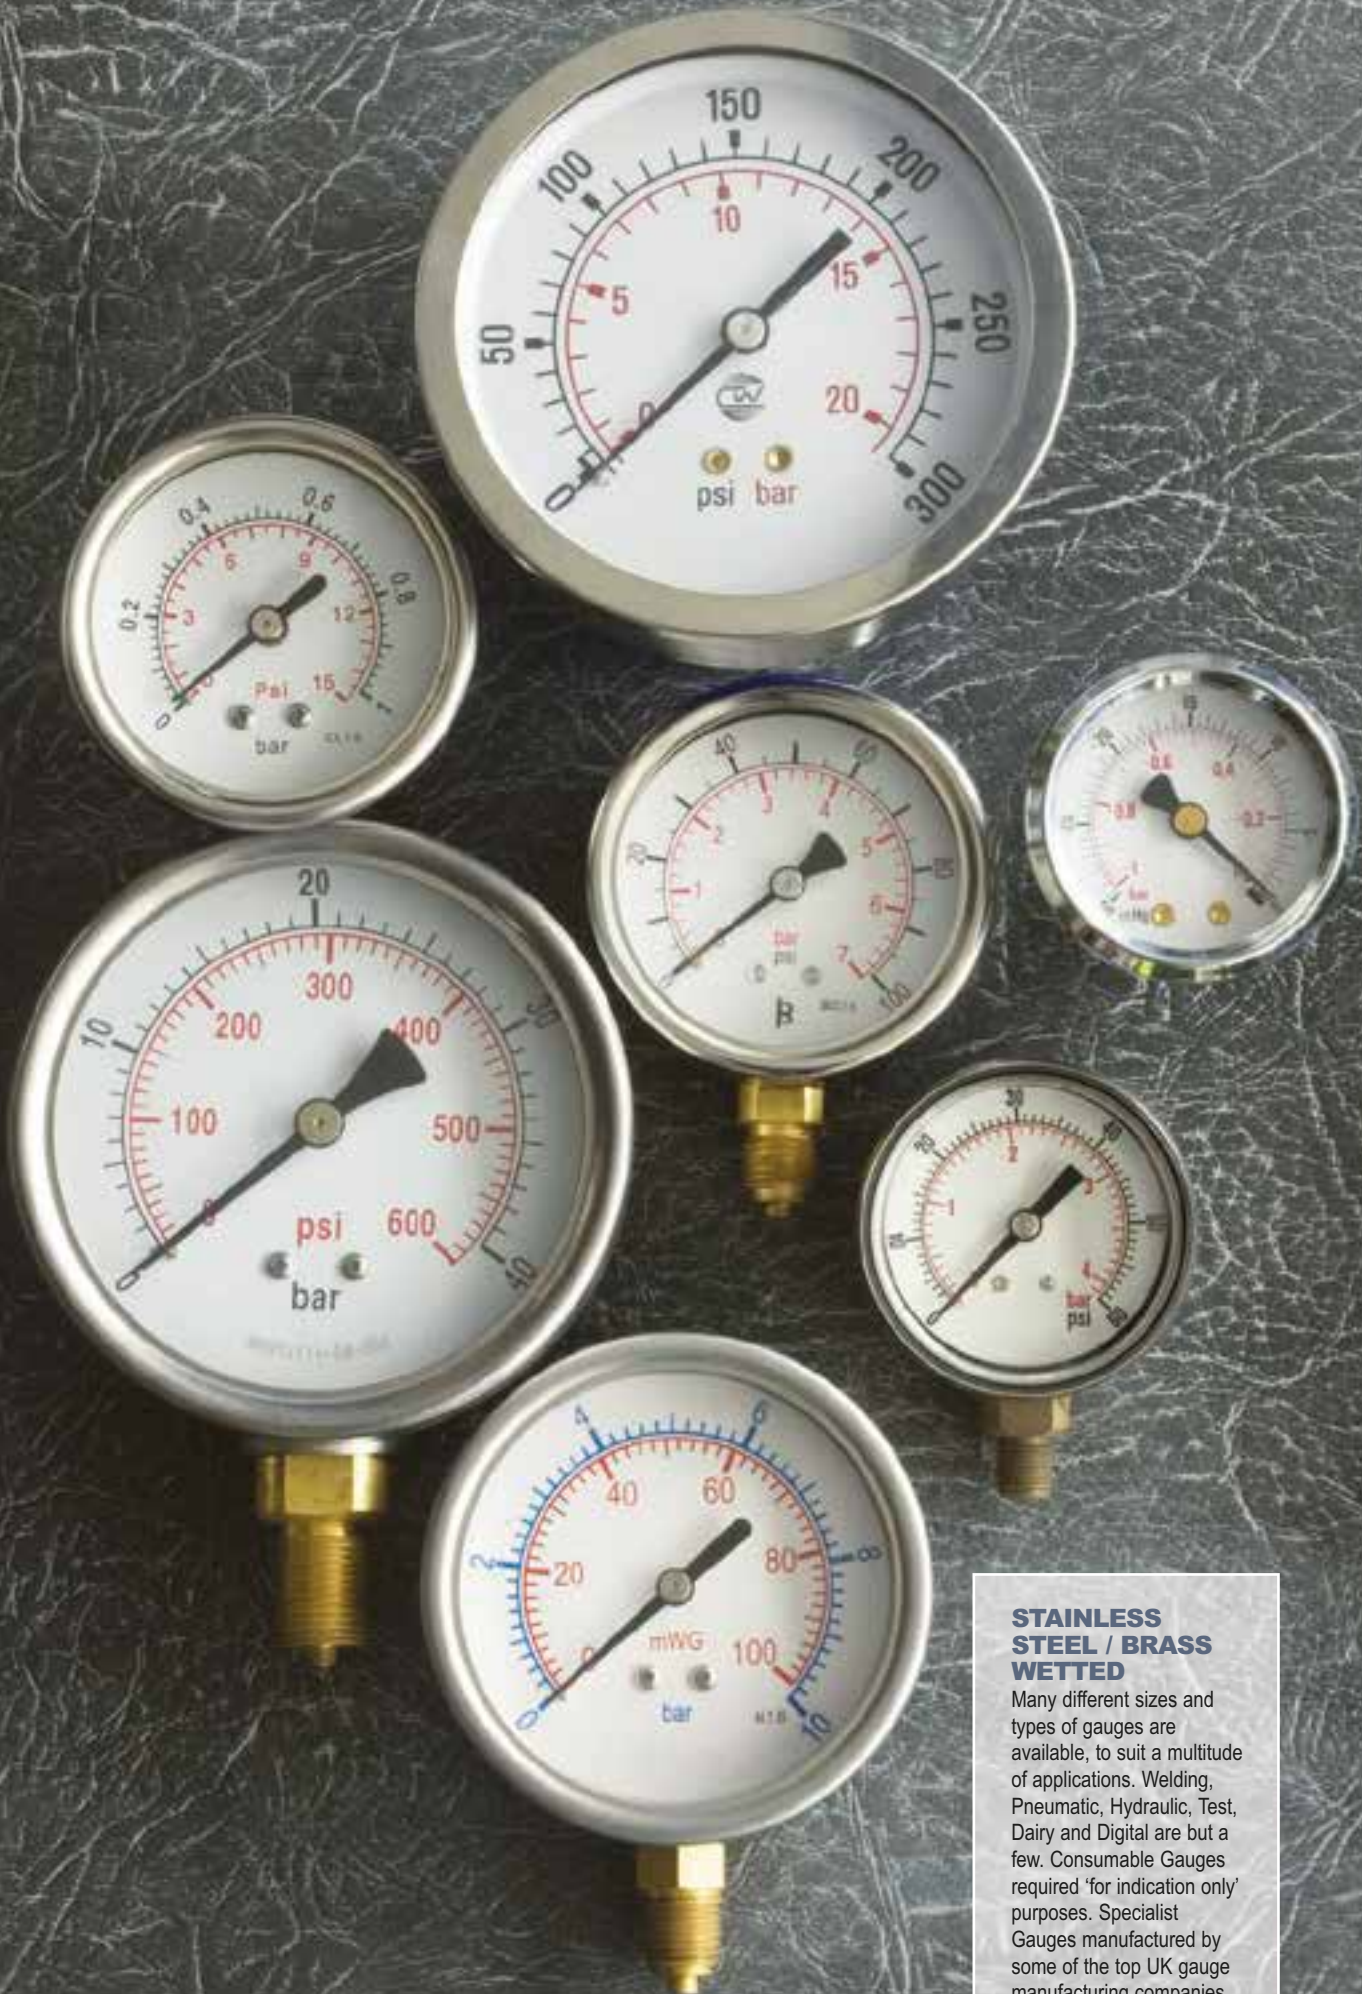

Analogue type thermometers for permanent installation. Bi-metal or liquid filled. With direct bottom or rear connection. Case and probe manufactured from all stainless steel if required, can be supplied with pocket to enable instrument removal.

C.I.G. Facts

- › Wide variety of analogue Pressure Gauges
- › Superb quality instruments from top UK and worldwide manufacturers

STAINLESS STEEL / BRASS WETTED

Many different sizes and types of gauges are available, to suit a multitude of applications. Welding, Pneumatic, Hydraulic, Test, Dairy and Digital are but a few. Consumable Gauges required 'for indication only' purposes. Specialist Gauges manufactured by some of the top UK gauge manufacturing companies.

DIGITAL

Top quality Digital Pressure Gauges of European manufacture. With certifiable traceable accuracy. User definable ranges psi, bar, kPa, mtrs. Micro-processor controlled, accurate and versatile digital pressure measuring instruments with integrated fast peak, max. and min. function. The pressure is measured 5,000 times per second and is brought to the display twice per second.

STAINLESS STEEL

Stainless steel case or all stainless steel construction gauges. Available with 316 St.St. wetted parts with 304 St.St case. Instruments can be supplied dry or as glycerine filled construction for internal and external applications. Specialist dials can be supplied to order or requirement. Customer logos can be added to dial face if required.

DRY CASE GAUGES

Primarily for pneumatic application. Direct bottom or rear connection as specified. Surface or flush panel mounting as required. Safety Pattern Gauges available on request.

GAUGE ADAPTORS

Machined from solid, as Male x Female, Female x Female or as 'Ring Thread' to upsize or down size a thread. Can be supplied as BSP x BSP or combination of thread types to suit customer's requirements.

GAUGE COCKS AND OVER-RANGE PROTECTION VALVES

Gauge Cocks designed and manufactured to suit Pressure Gauge threads to isolate supply. Over-Range protection valves designed to assist with the protection of the instrument from over pressure.

'U' OR 'PIG TAIL' TYPE SYPHONS

Available in brass, steel or stainless steel. Used to protect the pressure gauge from the effect of media such as steam. The pressure medium forms a condensate that collects inside the syphon, which prevents the hot media from coming directly into contact with the instrument.

CALIBRATION AND REPAIR

We supply, calibrate & repair a wide range of gauges and instrumentation from vacuum to in excess of 15,000 psi. Our calibration equipment is traceable to known UK accredited laboratories.

Digital Test gauges for accurate calibration comparison of Pressure and Vacuum instruments.

Supply and certification available for RPZ Test equipment, including the WATTS TK range.

“COW HORN” MAINS TEST STANDPIPES

used in line with GIS/TE/P6.3:2007. Equipment used in testing gas mains and services with operating pressure not greater than 7bar.

PRESSURE RELIEVING VALVES

As specified and can also be supplied as spares.

PRESSURE RATINGS

We manufacture 3 pressure ratings:

- Low Pressure (Orange)
- Medium Pressure (Blue)
- High Pressure (Red)

TYPE	COLOUR	GAUGE	RELIEF VALVE SETTING
Low pressure	Orange	63mm x 0-1 bar/0-15 psi	0.350 bar
Medium pressure	Blue	63mm x 0-4 bar/0-60 psi	3.3 bar
High pressure	Red	63mm x 0-10 bar/0-160 psi	7.7 bar
Common Base	Yellow	N/A	N/A

Gauges 63mm diameter with rubber shroud

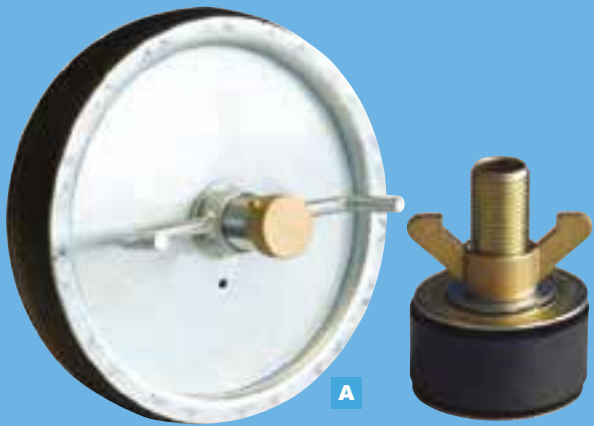

Manoflex flexible water gauges used with test standpipes.

COMMON BASE

All assemblies attach to the Yellow Common Base. Test Standpipes can be supplied welded, with plant i/d and test certs.

AC & PVC CUTTERS

For J1 Drilling Machine.

THE NO 1 DRILLING AND TAPPING MACHINE

The No 1 1/2" - 1" Drilling, Tapping and Ferrule Insertion. A well established and robust Underpressure drilling and tapping machine for inserting ferrules into live water mains up to 48" diameter. The machine can either drill directly into the main, or using a universal undercarriage, through a bossed saddle strap.

THE 'UNIVERSAL'

For underpressure insertion of ferrules, nipples and plugs.

THE J1

Ideal for drilling through straps/clamps through a full bore gate valve. 19 & 24mm cutter size.

THE J2

Ideal for drilling through straps/clamps through a full bore gate valve. 30 & 38mm cutter size.

Every type of drill for every application.

Every type of drill is available. From the most complex combi hammer drills to the simplest tungsten tipped drill. The majority of drill types are kept in stock - please call to check we have the tool in stock.

SCREWDRIVERS

Cordless screwdrivers with forward/reverse operation. Bosch has 30% more torque and increased rotation speed.

DRILLS

Hitachi and Dewalt drills are kept in stock. Full sets of drill bits available.

GO CORDLESS

Power tools without the worry of cables - ideal for difficult or awkward tasks. The most common have 18 Volt batteries. However, C.I.G. Ltd also offer machines with alternative battery ratings to suit customer requirements.

BOSCH

DEWALT

Makita

HITACHI

POWER TOOLS

C.I.G. Facts

- › Vast selection of Drills
- › Ring to check we have your specific drill requirement in stock

SCREWDRIVING DRILLS

Compact lightweight design with variable torque control. Keyless chuck has an automatic spindle lock for quick and easy bit change, variable speed and reverse switch plus all-metal gearing for efficient power transmission and long tool life.

DRILL BITS

Standard HSS and TiN coated tipped jobber drills, supplied as individual drills or in sized cases, ideal general purpose engineering drills.

DRILLS

Li-Ion battery, cordless or 110V/240V corded. Lightweight, extremely durable and suitable for a variety of applications.

Whatever the job - we have the power tool.

Power tools for every trade, various specifications to suit your budget and job requirements. Our extensive range of power tools come from trusted trade brands and include the latest state-of-the-art technology.

POWER TOOLS FOR EVERY TRADE

As established tool suppliers C.I.G.Ltd offer some of the very best brands in power tools such as Stihl, Draper, Makita, Dewalt, Bosch and Hitachi.

We stock a huge range of power tools including cordless drills, cordless saws, cordless combi drills, cordless screwdrivers as well as routers, angle grinders and circular saws.

C.I.G also offer an extensive range of hand tools and accessories from well known and recognised manufacturers such as Reed mfg, Sealey, Draper, Bahco and many more including hammers, screwdrivers, hand saws, clamps, spanners, chisels and wrenches.

POWER SAWS

Cutting neatly and swiftly, ideal for cutting roofing tiles, bricks, metal and paving blocks.

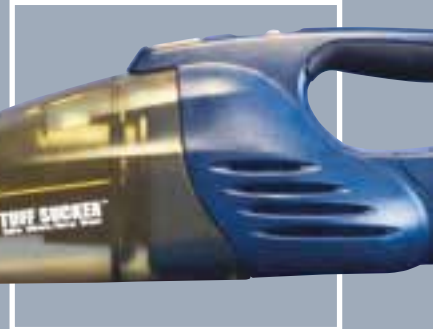

CORDLESS FLASHLIGHTS

Ideal for machine shops, or heavy-duty projects at home. Adjustable head makes it easy to position properly for hard-to-see spots.

CATERING FOR ALL YOUR NEEDS

Our range of carefully selected Power Tools are designed to cater to all needs. Whether you're a price conscious user that wants a basic tool with an entry level battery, or a seasoned professional in need of the latest high end cordless power tools and batteries, we have the right product for you. Power tools for grinding, cutting, planing and polishing, vacuuming, drilling and lighting. Hitachi, DeWalt, Stihl, Ryobi and many other recognised brands are available.

ANGLE GRINDERS

Compact and lightweight angle grinders perfect for grinding metal or masonry, paint and rust removal, or sanding.

HAND VAC

Cordless wet/dry hand vac's for both wet and dry spills. Quick change replaceable filter. Ergonomically designed and balanced for ease of use.

WELDING

We offer a range of welding consumables for arc welding, mig welding, tig welding and gas welding.

MIG & TIG WELDING SETS

Lightweight construction able to withstand the toughest work environments. Essential for a host of welding jobs, while delivering a reliable performance time after time.

DRAPER

GENERATORS

THE C.I.G. RANGE

Our range of generators includes quiet running, inverter generators, recoil start and electric start generators, ideal for a host of power generating situations.

POWER WASHERS

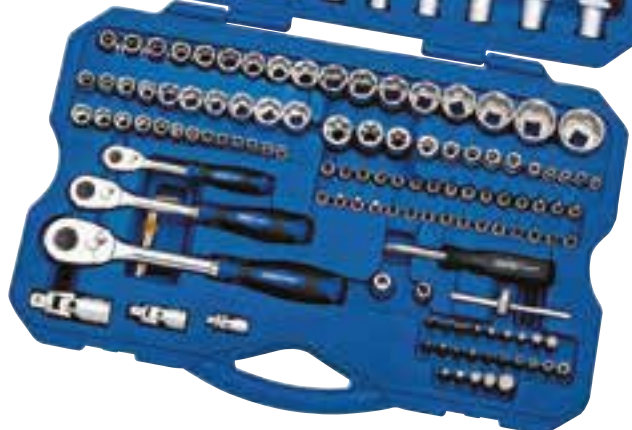

Pressure washers (also known as power washers) are ideal for quickly and efficiently removing dirt with minimal effort. We supply a comprehensive range of pressure washers - from lightweight, portable models to heavy duty jet washers.

SOCKETRY & SPANNERS

The complete Draper range for every application.

All of our socket sets and accessories are designed to be used by professionals in a multitude of different industries and a variety of industrial environments. All are manufactured to the highest standards providing reliability and performance.

DRAPER

ROAD EQUIPMENT

LINEMARKING

These aerosol cans produce highly pigmented hard wearing, defined bright lines and are safe to use on a multitude of surfaces including tarmac, concrete and composites. Available in various colours. 750ml aerosol cans are compatible with most aerosol line marking machines and are also suitable for freehand marking.

SALT

Don't get caught out this winter! Melt snow and ice fast.

SCREEN WASH

Suitable for summer and winter use. Highly concentrated de-ices and protects down to -20°C. Swiftly removes insects and grease deposits encountered in summer driving.

DE-ICER

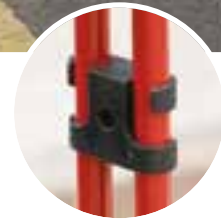

Powerful De-Icing formula melts ice quickly and effectively from vehicle windows, leaving a clear finish for increased visibility.

HAZARD BARRIERS

This robust barrier is manufactured from durable, lightweight polypropylene. Supplied as either 3 or 4 gate versions and offering a versatile option for many different requirements.

Available as 3 Gate or 4 Gate Barriers. Tough, stable and lightweight. Made with red powder-coated tubular frames. Hi-vis red and white reflective boards mounted at top and bottom of each frame. These barriers fold virtually flat for ease of transportation.

COLLAPSABLE CONES

Lightweight yet stable with rubber base for stability & grip, these space-saving 750mm cones collapse down to just 60mm high when not in use. Folded dimensions 380 mm x 380 mm x 60 mm. Weight 4kg.

CONES

Single-piece compression moulded road cones, manufactured from PVC. Cost effective and durable. Supplied fitted with reflective sleeve. Self-weighted for reliability and stability. Impregnated colour fast paint finish for resistance to weathering.

SIGNS

Supplied by one of the UK's premier sign manufacturers and distributed to the water and gas utilities, their main contractors and many others.

ROLL-UP SIGNS

Temporary roll-up portable road signs are extremely versatile and easy to use. The roll up and collapsible design is ideal in situations where storage is an issue. Safe to use and easy to handle a basic folding system for quick and speedy deployment. Flexible design allows for faces to be interchanged

TURKS HEAD BRUSHES

Turks Head Brush with black fibre bristles. Used as a tar brush for the application of bitumen to edges and surfaces. Available in short and long handle.

TAR BUCKETS

V-Lipped galvanised tar bucket with carrying & pouring handles. Heavy duty narrow spout galvanised tar can is ideal for precise pouring of hot tar.

LIGHTING

Huge Lighting Range.

With designs and options as varied as the requirements of their users C.I.G.Ltd supplies quality lighting products for use in tough professional situations, with proven endurance they are resilient and, with their lighting quality, ensure safe work under poor lighting conditions.

HEAD TORCHES

Anywhere with bad lighting and where you need both hands to ensure safe, effective work.

MINI LAMPS

These key ring torches are extraordinarily bright, lightweight and equipped with state-of-the-art electronics. Lightweight aluminium torch with carry strap and 6 bright LEDs. Requires 3 AAA batteries.

KRYPTON 60 HANDLAMP

These handy 60 lumen spotlights, with tough ABS case, fitted with a high power krypton bulb and complete with a heavy-duty 6 volt battery are ready for use in seconds. The handy spotlight is the perfect choice and extremely useful in many situations.

LONG RUNNING RECHARGEABLE LED HANDLAMP

These well respected hand lamps are available with a recharging facility and can, on certain models provide up to 400 metre beam distance, 230 lumens. Offering 3 lighting modes high, low and flashing.

BULB KITS

Universal multi headlamp 12v auto bulb kit is suitable for vehicles fitted with H4, H1 or H7 headlamp bulbs. The kit includes 3 headlamp bulbs, 12 additional interior/exterior bulbs and 4 blade fuses.

MAGNETIC MOUNT (70MPH) AMBER BEACON

The popular design of this standard beacon features belt-driven rotators which incorporate unique free-form optical reflectors to maximise beam pattern and light output. Supplied c/w 12V Cigar plug and lead.

EXTENSION CABLES

110 Volt open drum cable reel in a choice of cable lengths. Featuring a sturdy steel frame construction c/w carry handle for easy movement. With 2 outlet sockets with spring loaded protection flaps to keep unwanted debris out and a winding knob for easy and tangle free reel-in.

240 Volt open drum cable reel on a sturdy steel frame with carrying handle. With twin 240 volt socket outlets and cable fitted with a standard 240 volt plug.

LAMPS

Work lamp solutions for a variety of applications - a comprehensive range of on and off road, medium and heavy duty, industrial models with a variety of light intensities to suit the application.

SOLARIS LAMP

A most compact and lightweight rechargeable LED floodlight, ideal for emergency situations, offering a very high light output. Light weight and easily carried, making it ideal for use in remote areas.

CAMERAS

Digital Compact Cameras

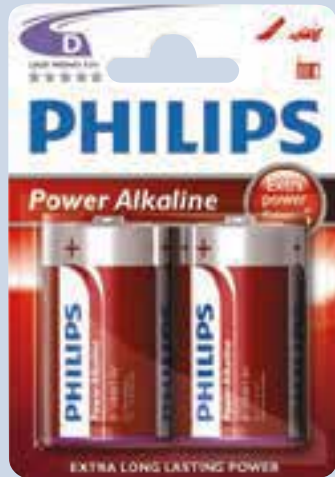

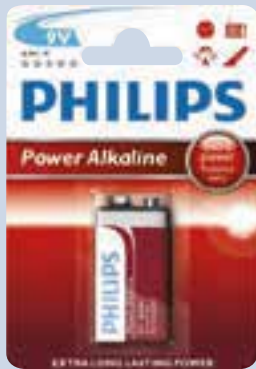

Cameras that pair innovative design with outstanding performance at great value. Available with In-Camera Panorama Stitching and a host of other superior features. Ideal for everyday use, compact cameras are the right device if you want a small, lightweight solution that's simple to use and provide superior image quality.

BATTERIES

Every type of battery - giving you power in the field.

We have a wide range of popular sizes of batteries. AA batteries, AAA batteries, C cells, D cells, 6v and 9v as single use batteries, lithium batteries, rechargeable batteries and battery chargers. We have batteries for most applications.

CHARGERS

Chargers

For all-round battery charging. Perfect combination of charger, maintenance equipment and test station for rechargeable batteries AA and AAA. Suitable for most brand batteries (NiMH/NiCd/Li-Ion/Li-Po).

CLOTHING

Single source supplier

C.I.G. Ltd is your single source for work-wear, offering a collection of garments for all areas of industry and commerce, from protective work-wear to bespoke corporate work-wear.

POLO SHIRTS

Cotton or poly cotton polo shirts we have it here, find the right polo shirts for your needs.

BOILER SUITS

A wide range of boiler-suits and coveralls for a wide range of work-wear purposes. To suit different purposes, we supply coveralls in cotton, poly-cotton or nylon.

C.I.G. Facts

- › Option of personalised embroidery or printing
- › Different styles of footwear
- › Various types of glove
- › Hi-vis products

HIGH VIS

Hi Vis Jackets, fixed hood with drawstring, sleeves with Velcro adjustment, outside pockets. Trousers with strong flexible seams, elasticated waist and two side slits.

HATS

A superb range of waterproof, woolly and other styles of hat.

JACKETS & FLEECES

Working in cold weather can be hazardous and uncomfortable. They are a great way to ensure that you stay warm. We supply a wide range of work coats and fleeces suitable for the most demanding work environments.

TROUSERS

Practical for the everyday working environment. Comfortable, stylish and tough yet still light enough to retain agility.

GLOVES

COMPLETE HAND PROTECTION

Being totally customer focused, priding ourselves in supplying the highest levels of quality and service. Providing hand protection that we strive to ensure is designed to the highest specification and fit perfectly to allow the job in hand to be carried out without limitation.

Specialising in quality work gloves, cut resistant gloves, chemical resistant gloves and nitrile gloves.

SAFETY

Total workplace protection.

PPE and workplace safety is of paramount significance in all areas of industry and we offer a range of products that form a comprehensive range of protective equipment.

HELMETS

A superb range of helmets are available - all to BSI standards. Whatever the job - we have the suitable headgear.

EYE PROTECTION

Offering a variety of modern and stylish products. All safety glasses protect the eyes. It's easy to injure the eye and hard to repair, don't leave it to chance, make sure you have the best protective eyewear and safety glasses.

MASKS

Dust Masks protect against airborne particles, and are an important part of workplace safety. We provide a large selection of products, that will protect against fine dust and oil/water based mists.

EAR PROTECTION

We supply ear plugs and ear defenders of varying specifications. We stock foam earplugs in pairs and dispenser boxes.

SHARPS DISPOSAL

Purpose-designed disposable plastic sharps container. Sharps are disposed of safely thus eliminating many of the opportunities for needlestick injuries.

KNEE PROTECTION

Lightweight & hardwearing providing protection and padding. Ergonomically designed. Ideal for most applications including general construction.

PICKERS

Rustproof stainless steel fingers and strong aluminium shaft. Strong enough to hold a 2.5kg brick sensitive enough to pick up a syringe.

HIGH VIS

Our high-visibility range is fully tested and certified, ideal for those who will not compromise on style, comfort, protection and performance.

FOOTWEAR

Complete foot protection.

Our Safety footwear is designed with both comfort and durability in mind. We offer a variety of different sole units and styles to suit all areas of the workplace.

C.I.G. Facts

- › Designed with both comfort and durability in mind
- › A variety of different sole units to suit all areas of the workplace

Clean thoroughly

Universal Wipes providing a range of products for hand and surface disinfection and cleaning. Containing a unique antimicrobial formula, they can be used as a detergent and disinfectant wipe

CLINELL PRODUCTS

Proven to kill at least 99.999% of germs – These wipes are one of the most effective products on the market.

clinell®

DISPENSING

A range of dispensing units with a wall mountable board designed to offer all that is required for a three-step skin safety programme, to individual dispensing units utilising a variety of specialist hand cleaners and protective creams.

SWARFEGA

Rapid action classic smooth green gel formula hand cleanser, easy to apply and quick rinsing to remove ingrained oil, grease & general grime.

SAFETY SIGNS

A huge signage range.

Our huge range of safety signs are designed to meet local and government regulations and we supply sign products for construction, building, warehouse, office and workplace environments.

BESPOKE

We offer both premade signs as well as bespoke designs to your specification. We provide a comprehensive range of safety signs compliant with B.S legislation.

GRAFFITI REMOVAL

Graffiti remover spray designed to remove road marker over spray, felt tip and biro. Suitable for use on most common surfaces including brick, stone, metals, concrete and most plastics.

HAMMERITE

Hammerite direct to rust, metal paint, suitable for painting directly onto rusty surfaces and, with its specially devised formula, there is no need to use a primer or undercoat. Corrosion resistant and suitable for use on a wide range of exterior metal products.

LADDERS

Every type of ladder to make access easy.

C.I.G. Ltd are suppliers of ladders & ladder access products. We can source & supply high quality ladder products from a huge range, with the flexibility to deliver to site as required.

XTEND & CLIMB ProSeries

Developed specifically for the professional, contractor, or surveyor. The ergonomic design provides quick and easy adjustment rung by rung, to exactly the operating height that you need.

SPECIAL ACCESS

A range of specialist ladders are available to overcome most accessibility issues.

STEP LADDERS

Light trade duty steps with large alloy platform. Deep alloy treads for added comfort. Integral side handrails fitted both sides. We have a wide selection of step ladders available in a large range of sizes and designs. We can offer both platform and swing back choices so you can be assured to have the right product to suit your needs.

ALUMINIUM EXTENSION LADDERS

Suitable for industrial applications. The tough box section stiles are fitted with large rungs.

LOCKS

Make illegal access hard.

C.I.G. Ltd supply's reliable padlock solutions that allow you to protect your premises and property. Whether an office, shop, warehouse, factory, yard store, container or tool-box. Locks also to protect mobile property. Our portfolio includes bicycle locks, motorcycle locks, and load securing equipment.

FB KEYS

Utility box access keys and FB Keys are also available. FB Keys as individual Keys or as a set.

Pack of three colours ▲

HASPS

The security rating of a hasp should always match the padlock. C.I.G Ltd offers a range of security hasps to provide optimal protection.

Padlocks with cables and chains are ideal for securing a wide range of objects. High-security chains with hardened eyes are not only suitable for securing bikes - pumps, generators and many other tools can be secured in this way.

VAN LOCKS

Ideal for use for example on double wing doors this universal hasp with integrated disc padlock to secure doors and gates without rebate, will fit on most common transport and storage containers.

WE HAVE THE UK COVERED

We have the UK mapped out.

AA Maps - provide comprehensive and detailed coverage of the country. Other information includes postcode boundaries, car parks, railway and other such features picked out in red, with other places of interest shown in blue. The comprehensive index lists street names and postcodes.

PHILIP'S

Featuring the clearest mapping, these practical yet comprehensive street maps show restaurants, pubs, hotels, one-way streets and car parks. Easy-to-read index. Clever use of colour ensures that the mapping can be read under street lighting.

NAV/COMM

TOMTOM SATNAV
 Plan ahead and avoid traffic jams with one of our bestselling sat navs. We offer a range of up-to-date and fully-routable maps for your device. Navigate with confidence with the GPS Sat Nav with UK & ROI Maps, featuring lane guidance and route planning, speed camera alerts and points of interest.

GPS

Personal Navigators: handheld, with fast satellite acquisition in the toughest conditions. Rugged, waterproof case features military-tough construction. Providing one-hand operation. Day or night, rain or shine.

DASH CAMS

Award Winning and a Professional Motor Mechanic Top Product. Available with full HD 1080 resolution and wide angled lens giving clear footage that allows you to pick out details. Exceptional low light performance means it can provide vital evidence even when driving at night. Hassle free to install and use. Automatically switches on when you start the engine – so you never miss a thing – and turns off once you park up so there's no risk of it draining the battery once you've turned the engine off. Loop recording continuously captures footage and will automatically save over old files so no need to manually replace SD cards.

MOBILE PHONES

We supply a comprehensive selection of state-of-the-art devices offering the very latest in high tech and intuitive electronics.

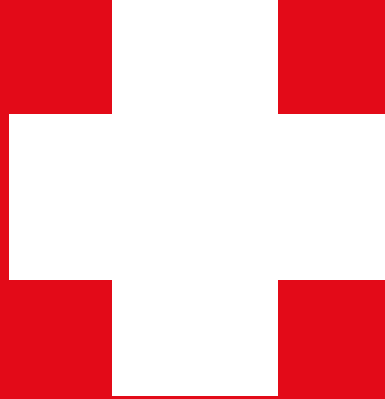

C.I.G Facts

- › We supply the latest GPS & dash cam devices
- › Smartphones, digital organisers
- › Laptops

TABLETS & LAPTOPS

We supply a range of tablets and laptops ideal for those looking for fast performance - in a super-compact and lightweight design. Offering easy-to-use intuitive functionality perfect for work, play, web browsing and more.

FIRST AID

HIGH QUALITY FIRST AID KITS

At C.I.G. Ltd, we offer some of the most proficient, high-quality first aid kits. Assembled with the most appropriate equipment, our kits aim to meet, or even exceed, your specific medical requirements.

We also offer a wide range of bespoke first aid provisions to accommodate a variety of industries and activities, including, motorist kits for road-side safety, emergency service supplies, and on-the-go travel bags.

H&SE: MAKE SURE YOU COMPLY

The accident book, a valuable document that organisations can use to record accident information as part of their management and compliance to health and safety.
