

## Tractor Tag

The Tractor Tag includes best practice steps for efficient daily pre-use tractor inspections. The tag comprises a practical holder and writable insert system that can easily be attached to tractors by either rivet, cable tie or epoxy resin. Both holder and insert are customisable to suit specific needs such as company policy requirements.

- can be attached to tractors and includes best practice steps for efficient user inspections
- tag insert can be removed on failed equipment check, leaving a clear 'do not use' icon and 'inspection required' message in the empty tag holder
- tag insert records inspection dates and inspector signatures in combination with the best practice inspection steps for compliance with EU Directive 2009/104/EC
