*"I Like the
control board
it's very easy
to use".*

BACKGROUND

Parc Carafanau Strand Caravan Park is a family run and family friendly holiday caravan park, established in 1973. The Park itself is located in the centre of the seaside village of Benllech.

Magnetic barrier

With its barrier width of up to 6.0 m and its comprehensive range of functions, the Access Pro-L is the perfect solution due to the built in obstacle detection and full declaration of conformity. It was installed alongside a ANPR & GSM entry system, the site had no previous entry system but they are now able to control access on and off the caravan park in a smooth, efficient way. Guests are able to enter the site efficiently because the ANPR technology allows the car numberplate to be read therefore streamlining the access to the site 24/7 for guests whilst benefitting from increased security.

The GSM intercom allows users to arrive at the caravan park, if they aren't expected (for example the postman) it rings the owners mobile phone, they can speak to them and by pressing a number on the telephone, they can open the barrier remotely to allow access. GSM allows the owners to speak to the customers and let them in remotely from anywhere in the world.

A year on, the site are still thrilled with the installation.

The barrier is very reliable, looks great and i like the control board, it's very easy to use. The customer was also over the moon with the installation. stated Jack Howorth - Security Engineer at Strobe Security.
