**Venesta**

# **We know washrooms.**

**After 100 years of innovation in partnership with our customers, we're still passionate about setting new standards of design, value, performance and reliability.**

At Venesta, we live and breathe washrooms. Ever since the early days, innovation has been our inspiration, and product excellence our goal. With a commitment to setting the benchmark for design and performance, we've partnered our clients in creating solutions that they can rely on to satisfy the most challenging and demanding of briefs.

Today, our expert knowledge and pioneering attitude have inspired our range of commercial toilet cubicle and washroom systems. On the following pages you'll discover great product choice, value for money and uncompromising quality. And because customer care is so important to us, you'll find we're breaking new ground in customer service too.

We invite you to see for yourself.

**We know ingenious innovations.**  
 Did you know there are over 100 years of washroom innovation behind V-epps? A team of experts passionate about our products and services? A wide range of quality, cost-effective products and modern designs? And highly engineered systems designed for simple fitting? It is this commitment to continuous innovation that has helped us create our seven quality promises.

**Engineering**

Our highly engineered system, modern materials and aluminium click-fix components are fast to install, keeping projects on time.

**Quality**

V-epps combines quality with value. Our fitted sanitaryware has been specially engineered to give you the highest quality finish.

**Efficiency**

There is no need to ever buy loose sanitaryware and panels again. Our V-epps pre-plumbed system is all you need.

**Design**

Innovation and design are at the heart of our V-epps pre-plumbed system and sanitaryware.

**Value**

Our V-epps pre-plumbed system is designed to be more cost-effective than if you bought the items separately.

**Testing**

All our sanitaryware is factory tested and fitted to guarantee the highest quality.

**Guarantee**

All our products and solutions come with the reassurance of our 10 year rock solid Venesta guarantee.

**01 Quality control**  
 No product is launched without thorough testing and all materials are selected for quality and durability.

**02 On budget, on time**  
 Our service level is unrivalled and we strive to deliver every job to your deadline and budget.

**03 A fine eye for detail**  
 Our team is committed to your job satisfaction, and that means getting every detail right, every time.

**04 A friendly team of experts**  
 We're genuinely passionate about what we do and enjoy sharing our wealth of experience and product knowledge with you.

**A history of innovation.**  
 Ever since the early days, innovation has been our inspiration. Combining our expert knowledge and pioneering attitude we continue to set the benchmark for design, value and performance.

**1960**

Using timber and plywood, we manufactured and supplied the UK's first pre-plumbed IPS system which was installed into Greenwich Hospital - the first project of its kind.

**2001**

Recognising the opportunity to set a new benchmark for design and performance, Venesta replaced its traditional timber-framed IPS pre-plumbed system. IPS Evolve was launched, the UK's first metal framed, click fix IPS system.

**1898**

Venesta was founded in Millwall, London, originally supplying materials for tea chests and was the first UK importer of plywood.

**1930**

Venesta became the first UK company to manufacture toilet cubicles using timber, plywood and high pressure laminate.

**1980**

Using fresh and vibrant colours, previously never seen in washroom areas, Venesta introduced Genesis toilet cubicles specifically designed for children. Genesis offered reduced height and shaped doors and partitions, perfect for teacher supervision.

**2015**

Introducing V-epps, the revolutionary, fully engineered metal framed pre-plumbed system offering even faster installation, even easier ongoing maintenance and a much wider range of sanitaryware options, all at a lower cost. V-epps - engineered with ingenuity.

**We know pre-plumbed solutions.  
The choice is all yours.**

## The secret behind V-epps.

The beauty of V-epps is it's easy to see the benefits, without seeing the installation. V-epps features ingenious engineering such as:

### 01 Venesta linear-bearing hinge™

Our precision engineered, high strength linear-bearing hinges and panel support ratchets offer smooth movement and allow panels to be positioned at 10 different heights, all without any gaps between panels.

Patent pending

### 02 Venesta dowel-dock™

Designed for strength and perfect panel alignment, our dowel dock system ensures panels return to their correct position every time.

Patent pending

### 03 Tie backs

Adjustable zinc plated steel tie backs offer a bracing system for improved stability and allow for easier, speedier installation.

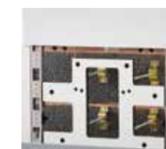

### 04 Baserail

Designed with a smooth, modern finish in 2 colour choices, the V-epps baserail, now available in 2 height options, ensures compatibility with all cubicle ranges and washroom designs.

### 05 Panel lock

We understand the need for added safety without compromised aesthetics. In stainless steel with a tamper proof security key opening, our panel locks are discreet and ensure maximum security.

### 06 Wall hung WC carrier

Our wall hung WC carrier is made from virtually indestructible Solid Grade Laminate. It simply locates into the baserail and is fixed back to the building structure without the need for floor bolts. The assembly has been load tested to 400kgs and complies with BSEN 997.

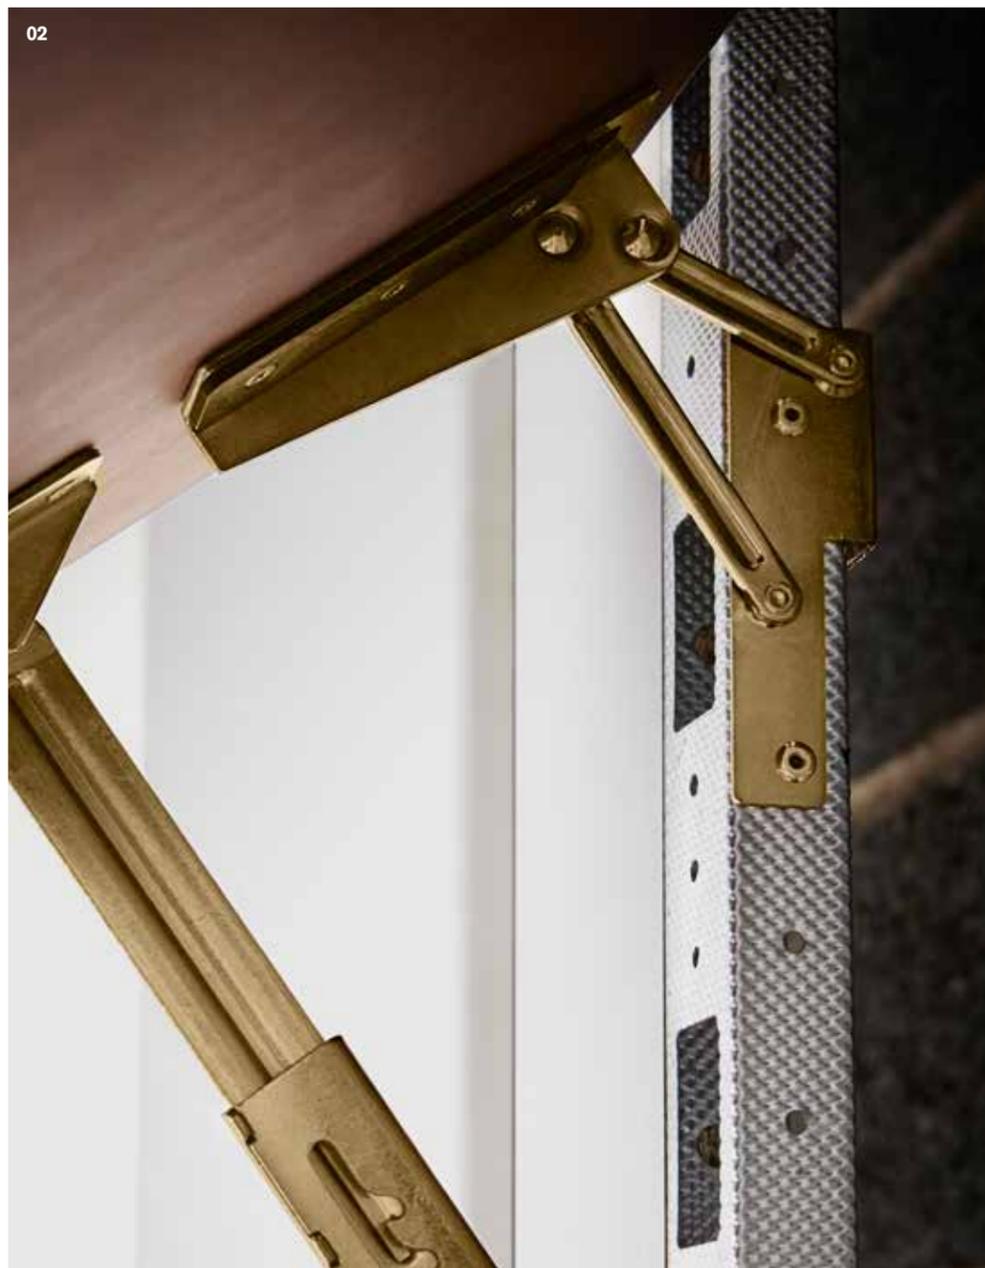

### 07 Fittings

We understand the need for products that last. That's why all of our metal components are non-ferrous or coated to protect against rusting and corrosion.

**We know industry-leading design.**  
At Venesta, we are renowned for our continuous innovation in pre-plumbed systems. Bringing together cutting-edge technology and the latest in sanitaryware designs, we introduce V-epps - the industry's first precision engineered, pre-plumbed panel system.

**01 Cross brace bars**  
The heavy duty aluminium construction gives greater stability and ensures rigidity, whilst the cross brace, complete with 5mm rivet fixings, offers the framework extra support.

02

### 02 Unique Venesta linear-bearing hinge™

- Our highly engineered, linear-bearing lift-up hinges allow easy access to duct space for hassle-free, ongoing maintenance
- Linear-bearing hinges ensure effortless, smooth movement time and time again
- Eliminates manual handling issues and prevents panels from being damaged during maintenance
- Made from zinc plated steel for optimum strength

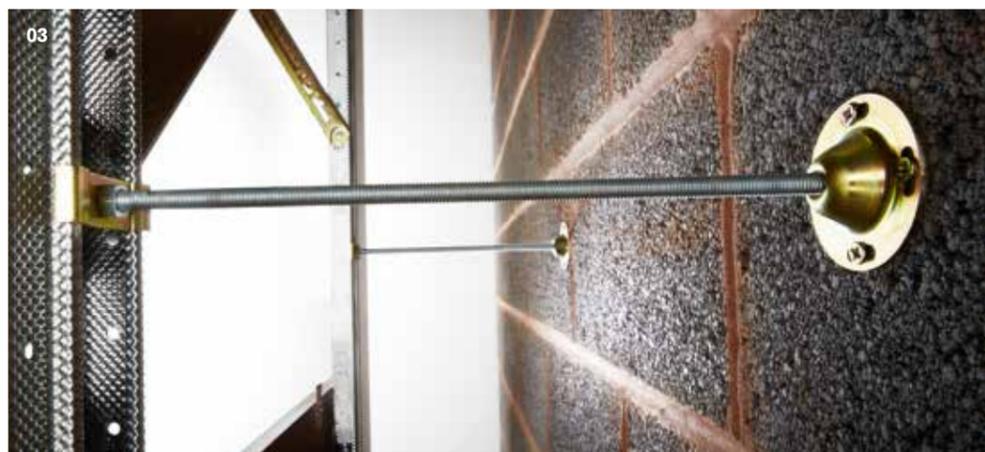

Patent pending

### 03 Tie back system

- Our tie back system utilises galvanised steel tie back rods. This offers complete flexibility during installation whilst ensuring the entire system is rigid and stable
- Allowing for all site conditions, our threaded wall fixing brackets allow fine adjustment of the tie back rods, so you can make sure the system is level during installation
- Our bespoke brackets are made from zinc plated steel for optimum strength

### 04 Panel ratchets

- Panel support ratchets allow panels to be positioned at 10 different heights for total flexibility during maintenance
- They are load tested up to 200kg, offering complete peace of mind
- Panel ratchets are factory fitted during manufacture to ensure perfect positioning and eliminate gaps between panels

03

04

#### 05 Headrail

- Our headrail is constructed of extruded aluminium which delivers strength whilst remaining light and easy to handle
- It has a unique, engineered profile to suit a variety of applications and ceiling finishes
- It forms a supporting beam for the V-epps framework which ensures complete stability whilst remaining simple and quick to install
- It is v-grooved for precise screw location during installation

#### 06 Baserail

- Available in 2 colour options, the baserail's smooth finish offers improved aesthetics and added choice
- It is available in 2 different height options to ensure compatibility with all cubicle ranges and washroom designs
- For easier and more precise installation, it has an integral bracket locator which allows the framework to click in and slide

#### 07 Baserail corner mouldings

- Baserail corner mouldings offer a seamless fixing when installing V-epps at right angles
- They are available in 2 colour and 2 height options to match the chosen baserail

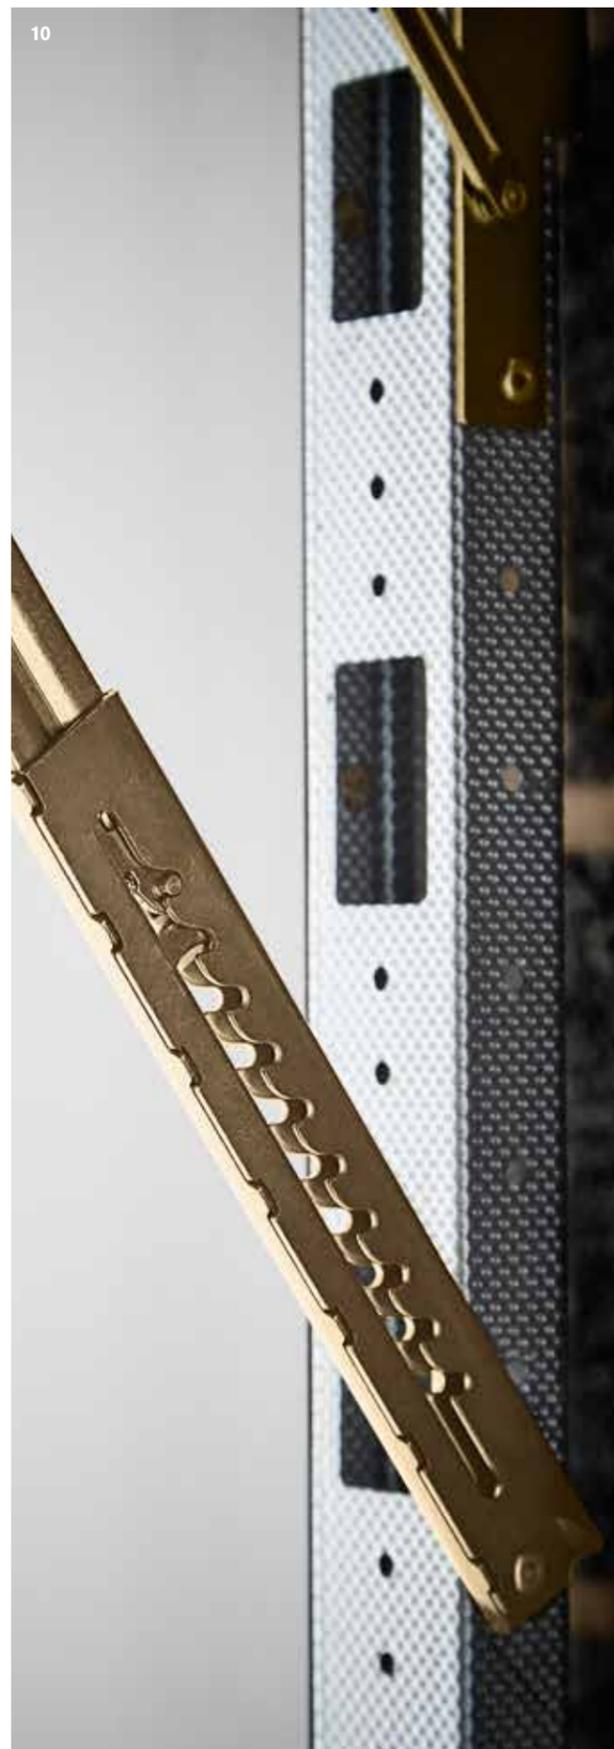

#### 08 Panel locks

- With a 18mm diameter outer face, our unique panel locks are designed to be discreet
- The panel lock sits virtually flush to the face of the panel and has a novel visual locked or unlocked indication so you can never mistakenly leave the panel unlocked
- The security fixing is completely tamper proof to ensure maximum security
- They are made from polished stainless steel for corrosion resistance and longevity

#### 09 Headrail and baserail locators

- The headrail and baserail locators allow the subframes to click into place and easily slide along for simple installation and precise location
- Made from self-lubricating nylon which ensures smooth movement and no friction during installation

#### 10 Subframe

- Made from ultrasteel, the subframes are incredibly strong whilst remaining light and easy to handle
- They have a galvanised finish to resist corrosion and ensure longevity
- Subframes have an integrated lug which provides a fixing surface for flashgaps. This ensures that all flashgaps fit perfectly flat to the front surface of the subframe which then ensures perfect alignment of panels
- Subframes have pre-fabricated holes and slots in pre-determined positions for all of the system's fixing components. This allows for easier and quicker installation whilst ensuring uncompromised strength and rigidity

#### 11 Slider brackets

- Made from self-lubricating nylon which ensures smooth movement and no friction during installation
- They allow the top panel to rise and fall, whilst maintaining precise alignment to the panels below

#### 12 Cross brace brackets

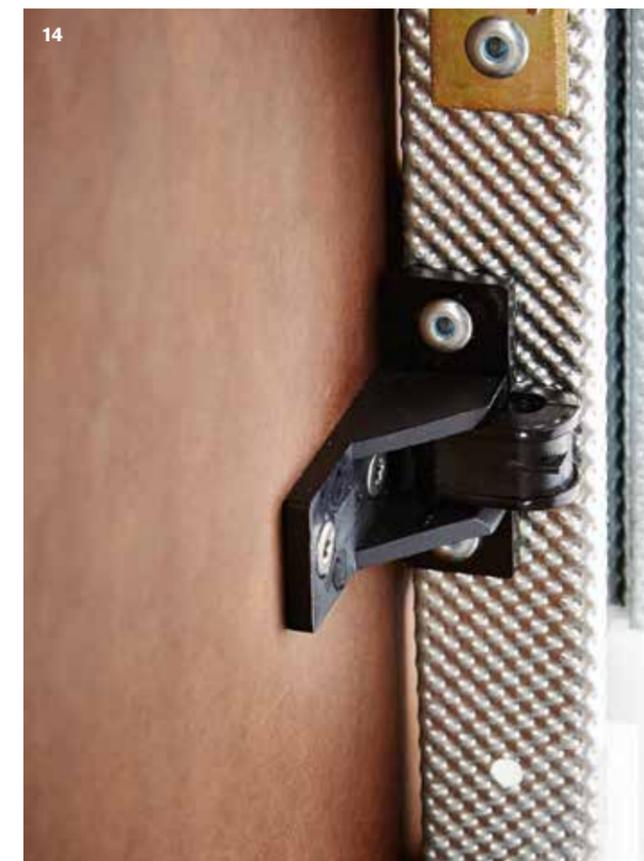

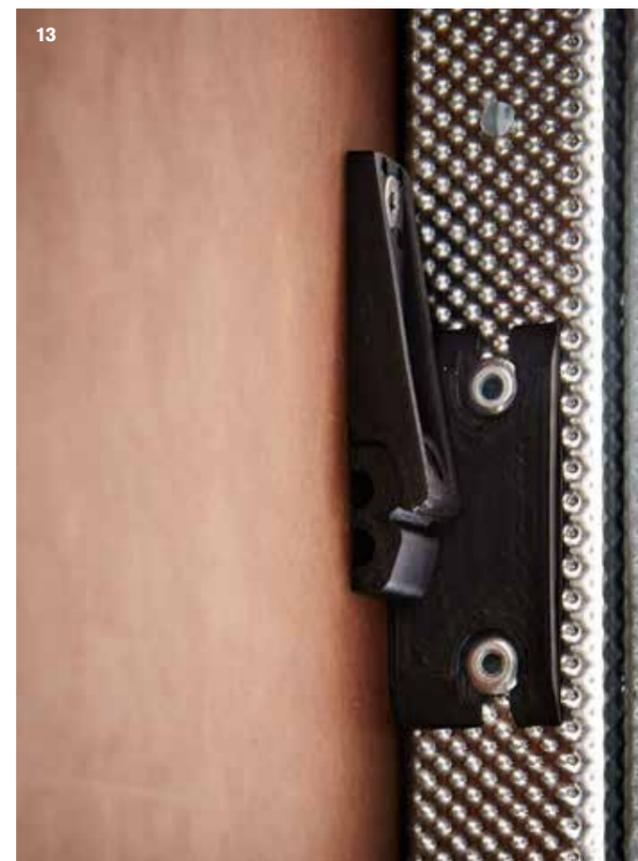

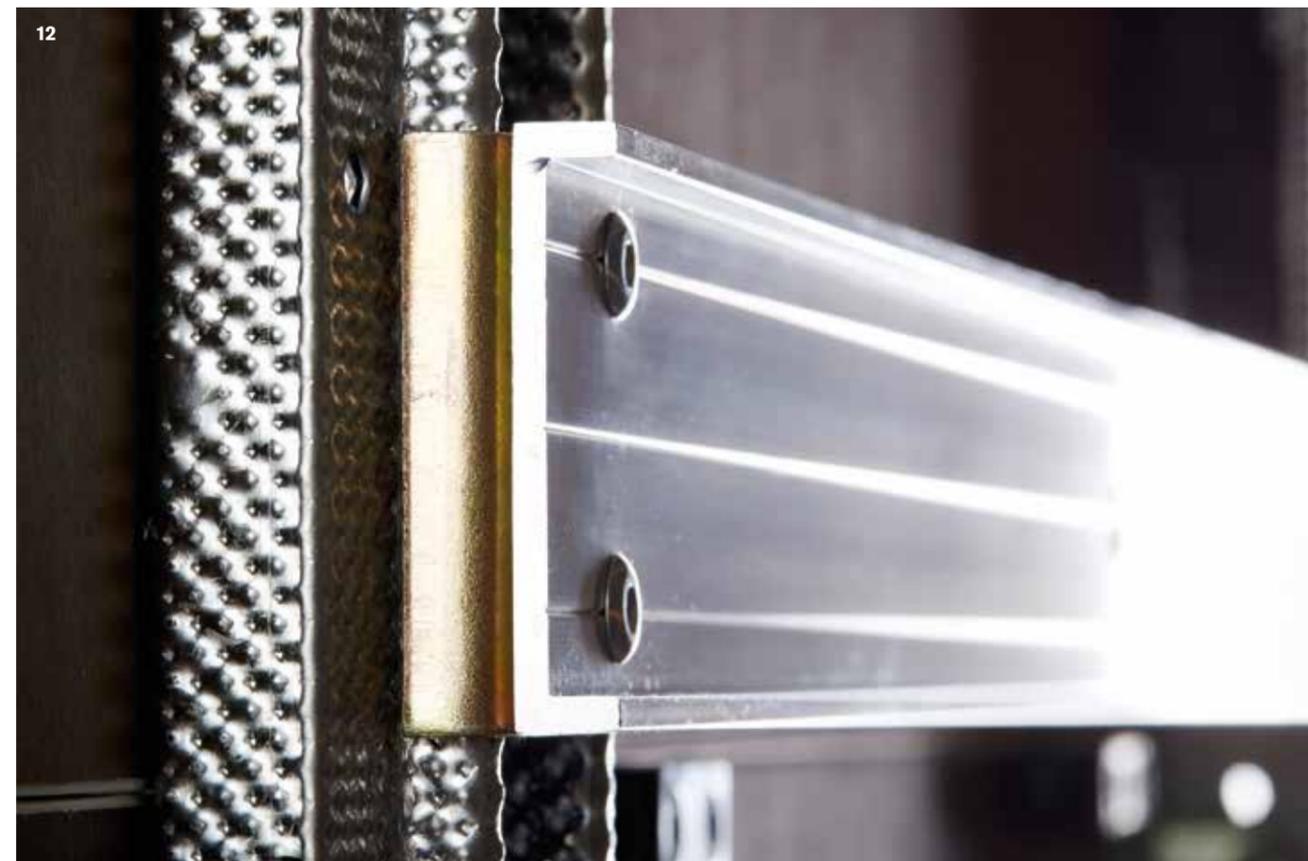

- Cross brace brackets provide an accurate fixing position for the cross brace bar, to ensure the whole system retains its shape and perfect alignment

#### 13 Panel fixing clips

- Panel fixing clips are factory fitted during manufacture and ensure panels accurately locate to the framework
- Panel fixing clips are made from self-lubricating nylon for strength and friction resistance

#### 14 Push-pull clips

- Push-pull clips are made from self-lubricating nylon for strength and friction resistance
- Push-pull clips are factory fitted during manufacture and provide a fast and secure way of fixing bottom panels

#### 15 Wall hung WC carrier

- Incorporating wall hung WCs with an access duct system can be a challenge. Our wall hung WC carrier is made from virtually indestructible Solid Grade Laminate. It simply locates into the baserail and is fixed back to the building structure without the need for floor bolts. The assembly has been load tested to 400kgs and complies with BSEN 997
- The SGL carrier is extremely durable, hardwearing and totally water resistant
- The wall hung WC carrier utilises galvanised steel tie back rods to ensure it can withstand industry standard loading
- It is factory fitted to the subframe with the use of riveted brackets to ensure strength and accurate positioning

**Guaranteed perfection.**  
Our dowel-dock system ensures panels return to their correct position, giving you perfect panel alignment every time.

#### 16 Venesta dowel-dock system™

- Designed for perfect panel alignment, our dowel-dock system is factory fitted during manufacture to speed up installation on site
- It ensures panels return to their correct position every time, guaranteeing perfect panel alignment
- Docks are made from self-lubricating nylon for strength and friction resistance
- Dowels are zinc plated, hardened steel for strength and corrosion resistance
- Dowel-docks incorporate panel protect buffers which prevent panel damage as panels are closed

Patent pending

16

## You need speedy installation.

Our design team created V-epps to ensure that's what you get. There are four easy steps to installation so you can be up and running in the shortest possible time frame, with a guaranteed quality finish.

**01** Once the site has been prepared, fix the aluminium docking frame to the wall, ceiling and floor.

**02** Click-fix the first V-epps unit onto the frame and slide into position. Open the mid panel to a fully hinged position. Attach a vertical flashgap to the frame on either side of the unit, screw-fixing to the frame from the face. Fix tie back to the wall. Repeat until all units are in place.

**03** Once all the units are in position, connect the plumbing and services.

**04** Simply close the hinged panel and attach the top and bottom panels of the units. Installation complete.

**20**  
minute installation

**30**  
minute installation

**10**  
minute installation

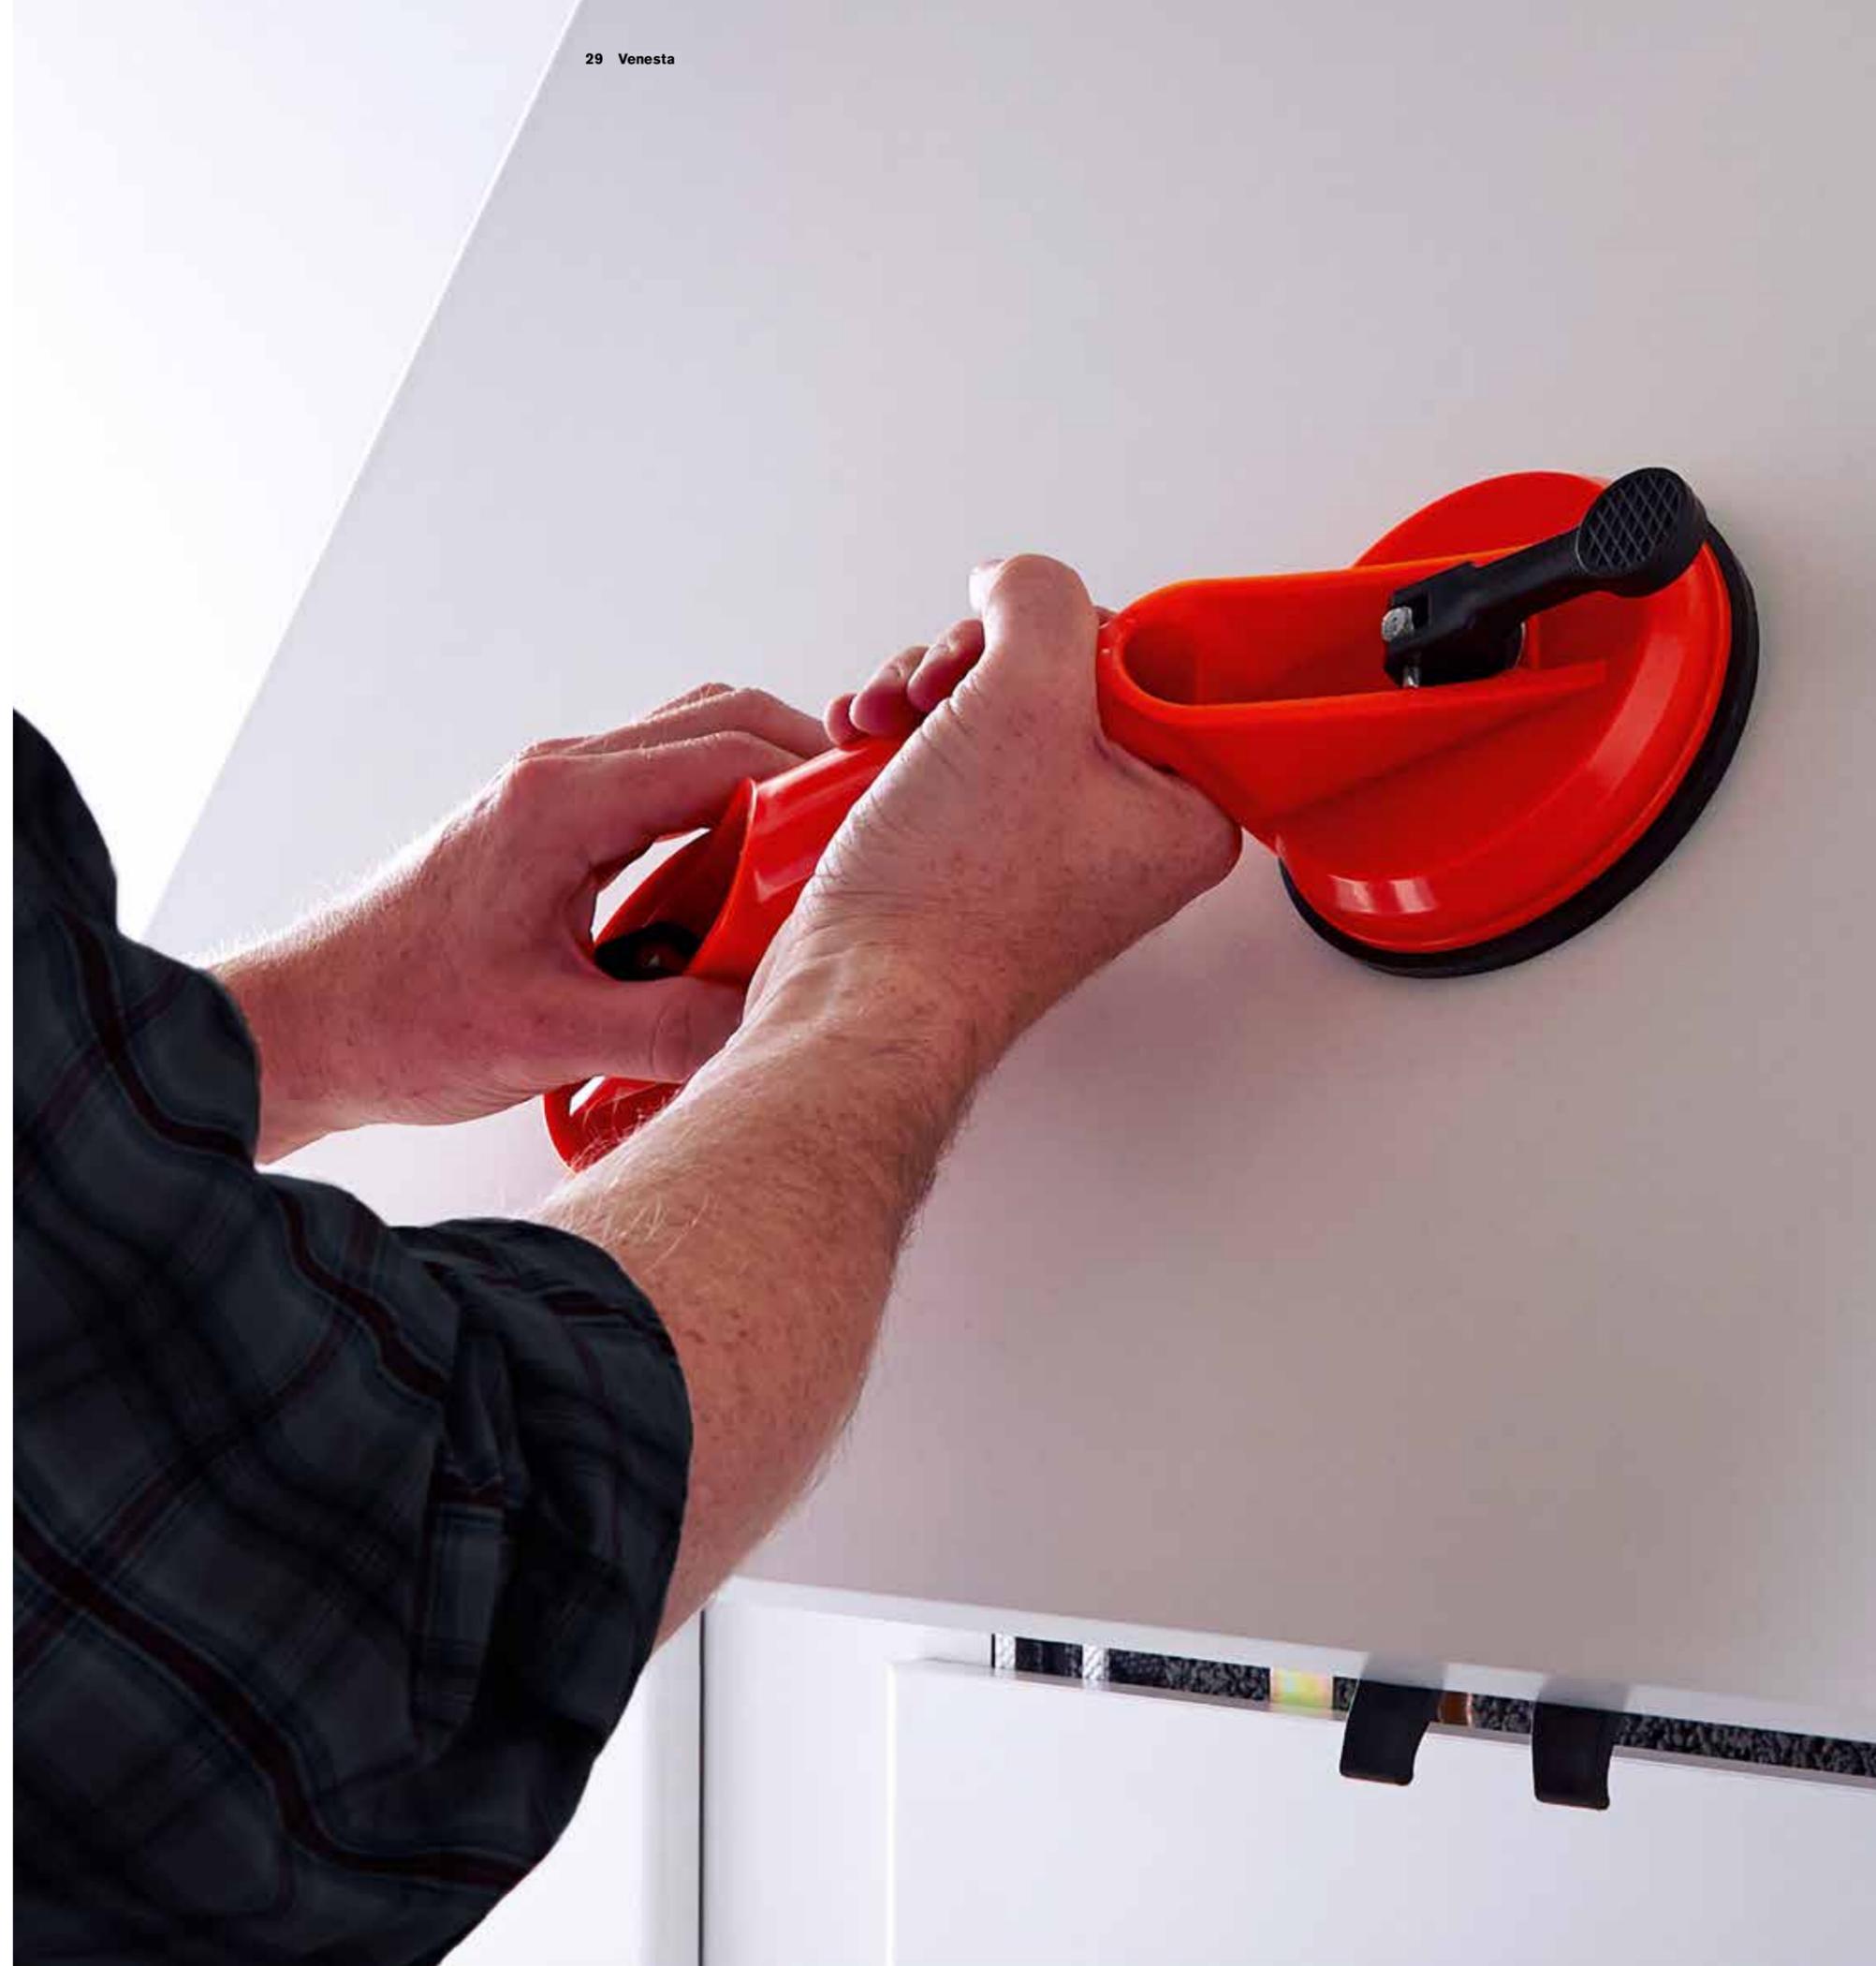

**5**  
minute installation

## Maintained in minutes.

Efficient, high quality and cost-effective installation is only half the story.

We understand your need for easy and simple ongoing maintenance, which is why V-epps has been designed with that in mind. The strong, linear-bearing hinges and panel support ratchets allow for speedier maintenance and they eliminate the need for lifting off heavy panels too, thereby reducing potential damage and solving any manual handling issues.

**We know V-epps  
pre-plumbed vanities.**

Our range of vanities brings form and function together in one stylish collection.

Whether you're looking to create a prestigious, luxury finish or something simple and understated, we have everything you need.

## We know V-epps pre-plumbed vanities.

At Venesta, we've created a vanities collection that's contemporary in style and highly functional. Whether you're looking to create a prestigious, luxury finish or something simple and understated, the Venesta pre-plumbed vanities collection, complete with factory fitted, fully tested sanitaryware, has everything you will need.

### 01 Granite

Step into the rare and distinctive world of natural stone with Granite. The perfect solution for your most exclusive and prestigious design solutions, Granite comes with a choice of basins and brassware.

### 02 Oslo

A highly distinctive vanity, Oslo enhances contemporary washrooms where a sleek, minimalist finish is specified. Combined with our highly polished stainless steel basins, this tough and durable glass vanity is one aesthetic that's hard to beat.

### 03 Quartz

Dramatic and durable - that's Quartz. This natural finish vanity surface combines the high-class look and feel of natural quartz with a resin composite for maximum durability. In short, a fabulous choice for maximum impact.

### 04 SGL

The most demanding environments need hard-working solutions to match. This solid grade laminate (SGL) is built to last and is totally impervious to water; plus, it comes in a choice of 36 colours.

### 05 HPL

High pressure laminate (HPL) is highly economical, delivering top marks on finish and design and a superb choice for any dry environment. Ensuring maximum choice, it comes with a selection of vanity profiles and 36 colour options.

### 06 Solid Surface

For luxury, strength and a smooth, seamless finish, our Solid Surface solution wins hands down. Its stone appearance delivers a visually stunning yet highly practical installation.

## We know your sector.

From education to retail, healthcare to industrial, Venesta has a proven track record of supplying high quality panelling systems for the most demanding environments.

### 01 Office

We understand office washrooms should reflect your corporate image in a stylish and innovative way. For more prestigious, executive office washrooms, V-epps is available with rich real wood veneer or contemporary ColourCoat panels and cutting-edge, designer sanitaryware. If your project requires a more affordable solution, V-epps is available with a variety of low-cost, high quality and functional panels and sanitaryware.

### 02 Sports and Leisure

We're passionate about raising the bar for leisure changing rooms and sports centre washrooms. Your need for a range of practical, safe and durable solutions for both WC and shower areas has prompted us to create a range of panel and sanitaryware products to meet these requirements, whatever your budget.

### 03 Retail

We understand that retail washrooms need to serve many functions; they must be safe, hard-wearing, easy-to-clean and be attractive. They need to endure a high volume of traffic and stand up to potential vandalism too. Whether it's a large shopping centre, or a small high street store, V-epps is available with panel and sanitaryware options that are completely fit for purpose.

### 04 Entertainment

Washrooms in the entertainment sector need to complement the décor and atmosphere of the establishment, while being durable, safe and easy-to-clean. We offer a range of sanitaryware to suit every application and our extensive panel materials will widen your options even further.

### 05 Government

The need for washrooms that are robust, strong, safe and easy-to-clean in the government and public sector are all key considerations when it comes to specifying your project. That is why we have designed V-epps with innovative panel and sanitaryware solutions for even the most demanding public environments.

### 06 Transport

There are many different types of transport washroom areas. From rail and bus stations, to airport and motorway services, V-epps is available with a range of panel and sanitaryware options that will meet your need for durable, aesthetically pleasing and easy to maintain products in a high usage environment.

**07 Education**

We have specialised in school washrooms for over 50-years. From nurseries to universities, we know that performance, practicality and cost effectiveness are your key considerations. We are committed to raising the standard of our children's school washrooms and that is why our design team have

worked hard to create a range of sanitaryware suitable for a variety of age ranges that is both safe and hygienic. We also understand children love colour and bold designs. That's why V-epps is available in a wide range of panel options that are bright, fresh and vibrant.

**08 Healthcare**

We've been supplying the healthcare sector for over 45-years. From small refurbishments to new buildings we provide the highest quality solutions that are fit for purpose and completely compliant. Our V-epps healthcare system was specifically developed for the healthcare sector, supplied with the

sanitaryware already factory fitted and tested. This results in a higher quality finished product that is very easy to maintain. You can rest assured our V-epps healthcare system meets the industry's requirement for fully compliant, tested and proven solutions.

**You need a wide choice of high quality sanitaryware.**

From cutting-edge, designer sanitaryware to simple, budget options, our partnership with Armitage Shanks, Ideal Standard and SanCeram gives you the flexibility to choose industry leading products to complement your washroom.

# Technical Specifying V-epps

## Dimensions

### Maximum ceiling height\*

**MFC** 2860mm  
**HPL** 3035mm  
**SGL** 2640mm

\*Maximum ceiling height will be 50mm less if using the 50mm baserail.

### Skirting/baserail height

Available in 50mm and 100mm (other skirting heights achievable by site packing the baserail).

### Top flashgap

50mm

Minimum shelf heights and panel widths are dependant upon sanitaryware.

## Sanitaryware

Fitted sanitaryware has been specially engineered to give you the highest quality finish.

**WCs**  
**Basins**  
**Urinals**  
**Showers**  
**Wash troughs**  
**Drinking fountains**  
**Bidets**  
**Cleaners sinks**  
**Squat pans**  
**Baths**  
**Healthcare items**

## Performance

Available in 5 material options, V-epps is suitable for every type of wet or dry environment allowing you to specify the most appropriate panel option to meet the site requirements and your budget.

### MFC

For dry environments with low risk of vandalism. Panels are manufactured from 18mm nominal thickness high performance moisture-resistant melamine faced chipboard. Edges lipped with PVC.

### HPL

For more heavily used washrooms, panels are heat, scratch and impact resistant. Manufactured from moisture-resistant chipboard faced with high pressure laminate, panels are 18mm nominal thickness. Edges lipped with PVC. Post-formed vertical edge option available.

### SGL

Solid grade laminate is extremely resistant to impact and all surfaces are impervious to water. Panels are 13mm nominal thickness with polished black radiused edges.

### ColourCoat

Panels are 18mm nominal thickness MDF finished with one primer and 2 coats of pigmented polyurethane lacquer creating a semi-gloss finish.

### Veneer

Manufactured from moisture resistant chipboard faced with real wood veneer, panels are 18mm nominal thickness. Edges lipped with hardwood lipping to match the veneer.

## Detailing

### Panels

Available in MFC, HPL, SGL, ColourCoat and Veneer.

### Flashgaps

MFC, SGL, ColourCoat and Veneer.

### Colour finish

**MFC, HPL and SGL** 36 colours.

**ColourCoat** 10 ColourCoat colours available when specifying V-epps with selected V1 and V2 cubicle ranges.

Unlimited ColourCoat options (any RAL) when specifying V-epps with selected V3 cubicle ranges.

### Veneer

Unlimited Veneer options (varying price points).

### Edge treatment

#### MFC and HPL

Matching 1mm PVC lipping. Post-formed vertical edge option available with HPL.

#### SGL

Polished black radiused edge.

#### ColourCoat

Edges are sprayed with one coat of primer and finished with pigmented polyurethane lacquer.

#### Veneer

Hardwood lipping to match veneer face.

### Flashgaps

Flashgaps have unfinished edges except return end flashgaps which will be 1mm PVC lipped (or polished if solid grade laminate).

### Docking frame

Headrail, baserail manufactured from extruded aluminium section.

### Subframes

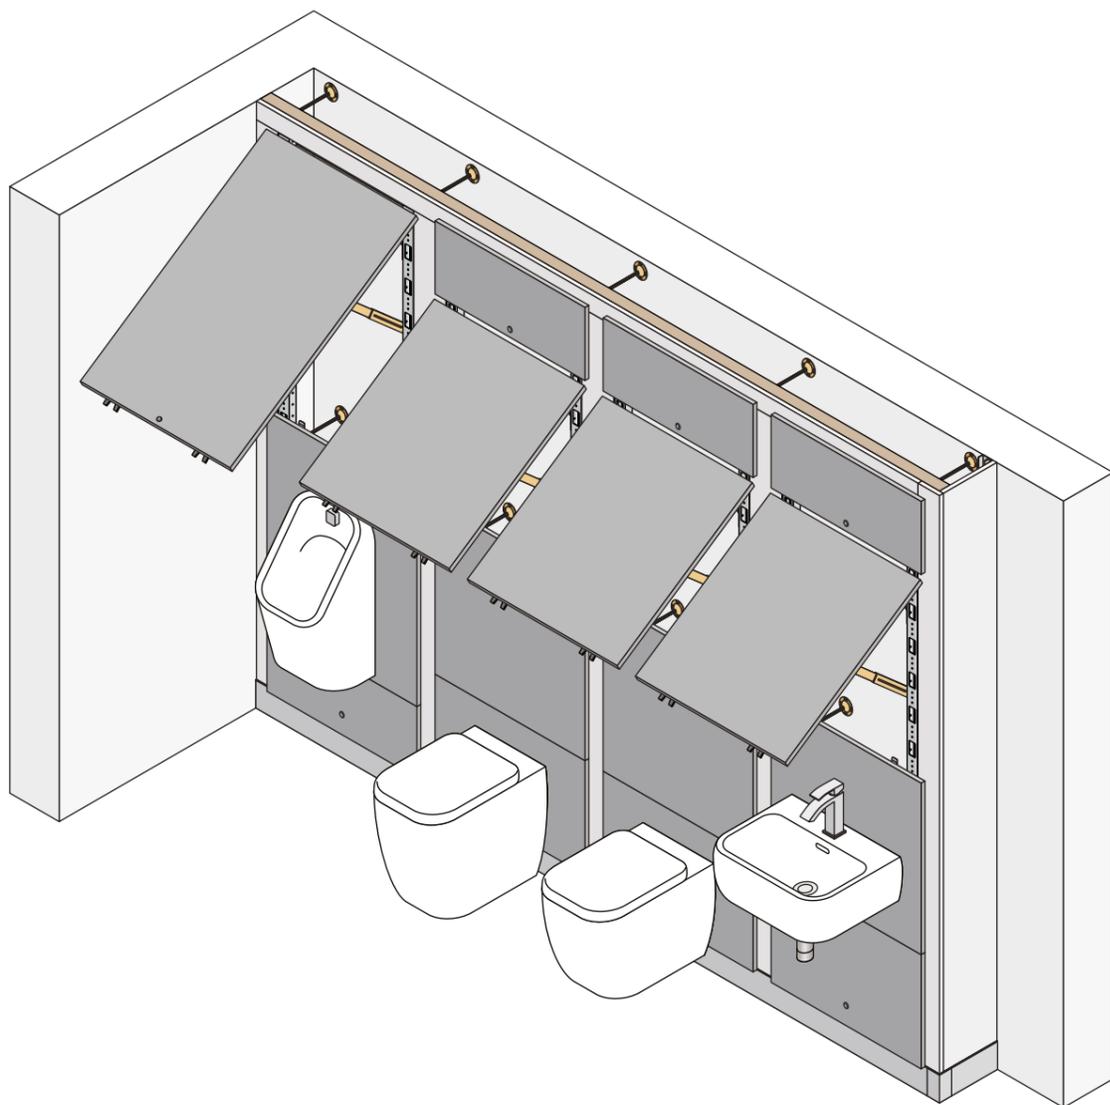

Manufactured from rolled galvanised steel section with aluminium cross brace bars. Subframe installed within aluminium docking frame by click-fix nylon location brackets. Back panels fixed to steel section by nylon clips.

### Linear-bearing hinge

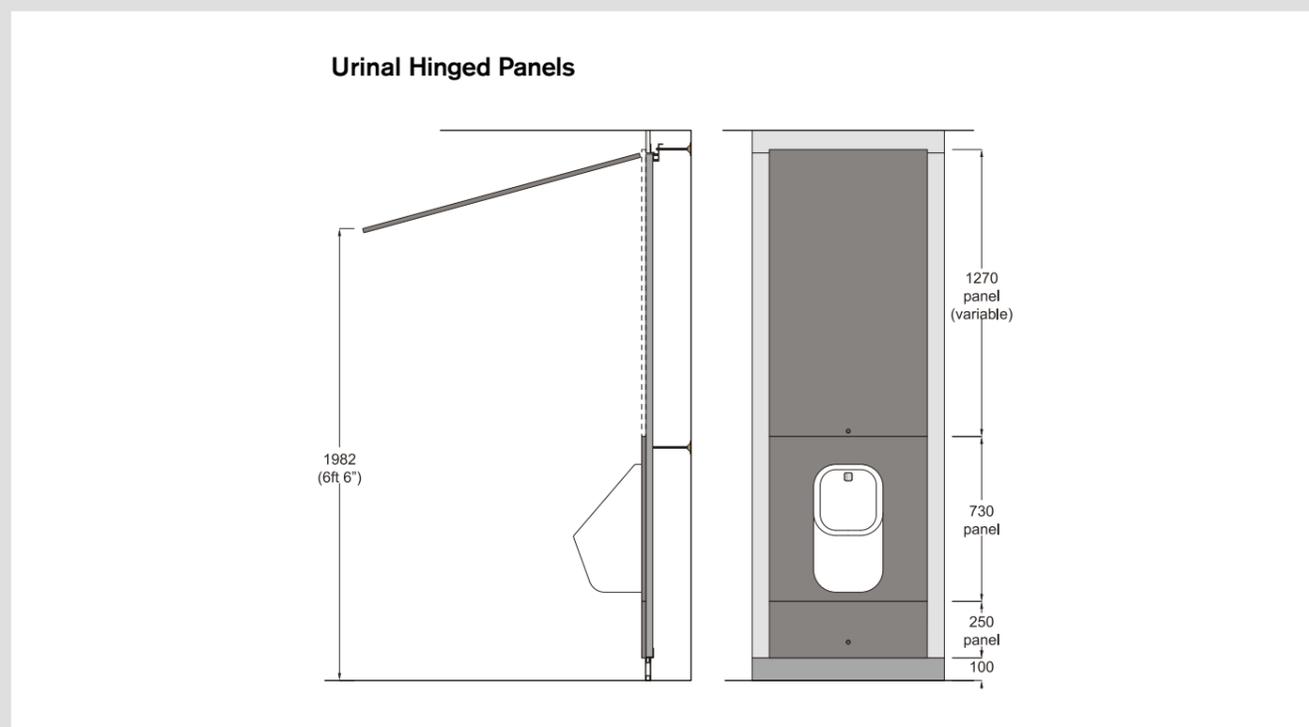

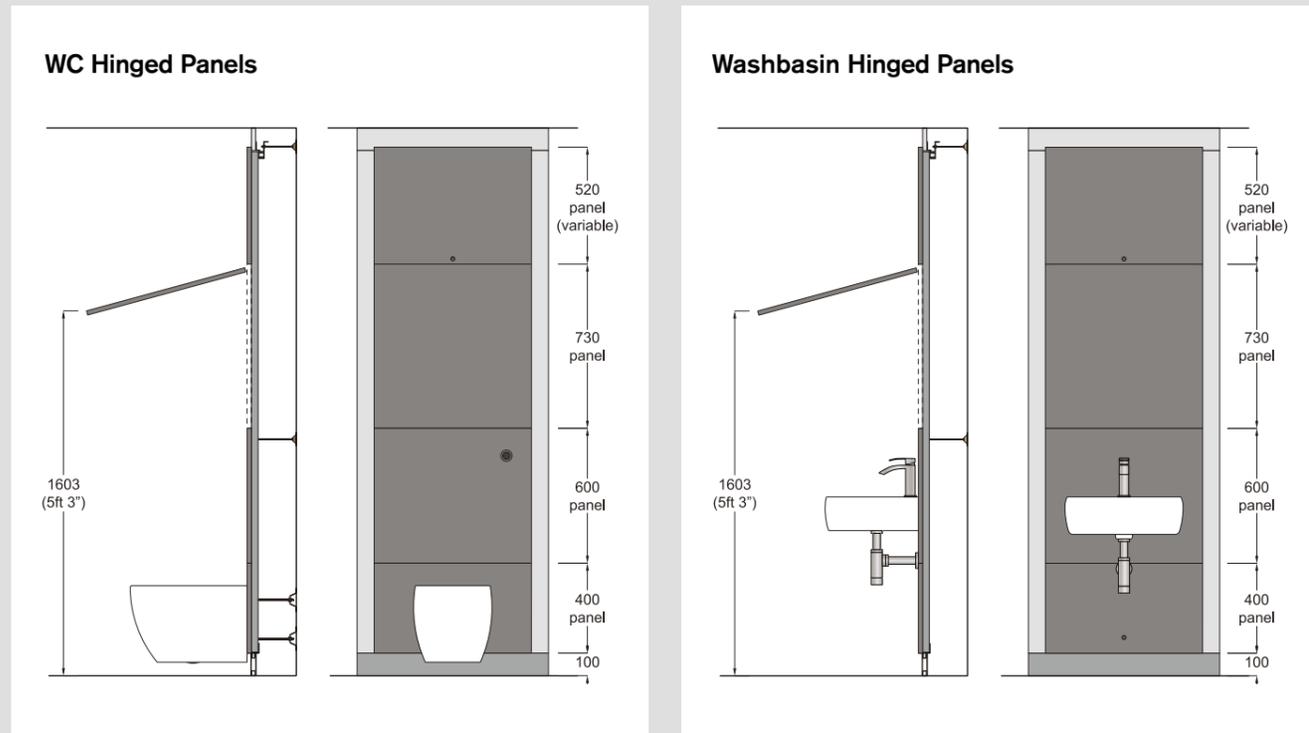

Manufactured from zinc plated steel with chrome plated rivets and black glass filled nylon linear-bearing.

### Panel lock

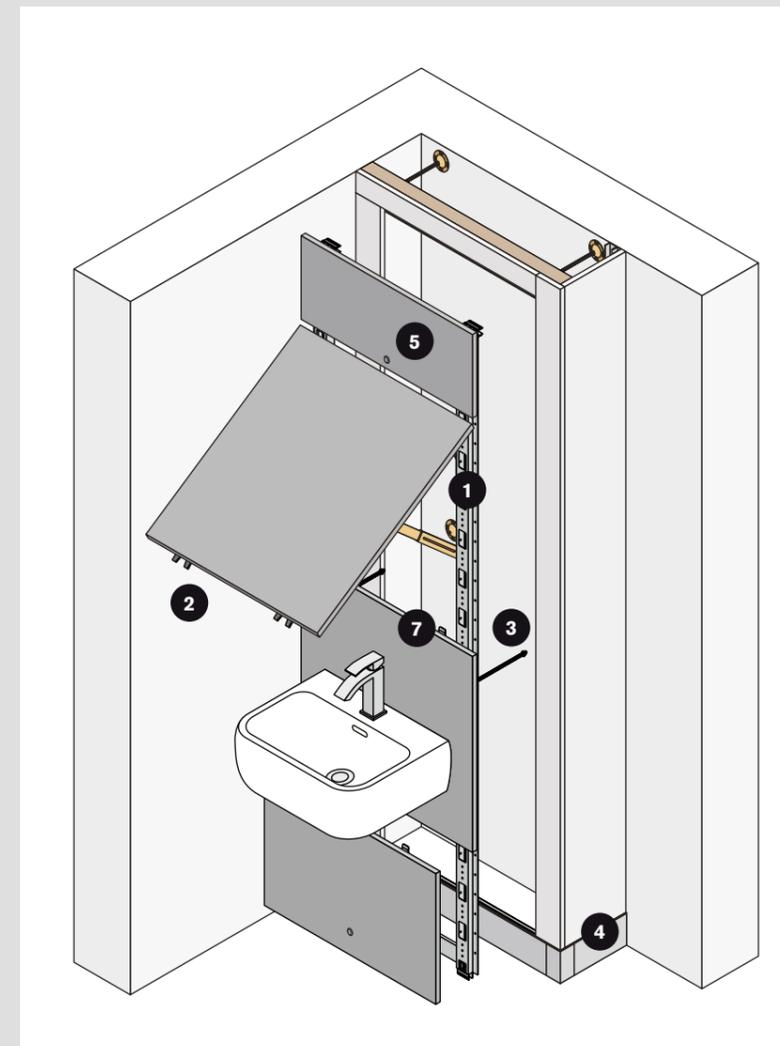

Manufactured from stainless steel with a polished finish.

## Technical Specifying V-epps

## Secrets of V-epps

### 1. Venesta linear-bearing hinge™

Our precision engineered, high strength linear-bearing hinges and panel support ratchets offer smooth movement and allow panels to be positioned at 10 different heights, all without any gaps between panels.

Patent pending.

### 2. Venesta dowel-dock™

Designed for strength and perfect panel alignment, our dowel dock system ensures panels return to their correct position every time.

Patent pending.

### 3. Tie backs

Adjustable zinc plated steel tie backs offer a bracing system for improved stability and allow for easier, speedier installation.

### 4. Baserail

Designed with a smooth, modern finish in 2 colour choices, the V-epps baserail, now available in 2 height options, ensures compatibility with all cubicle ranges and washroom designs.

### 5. Panel lock

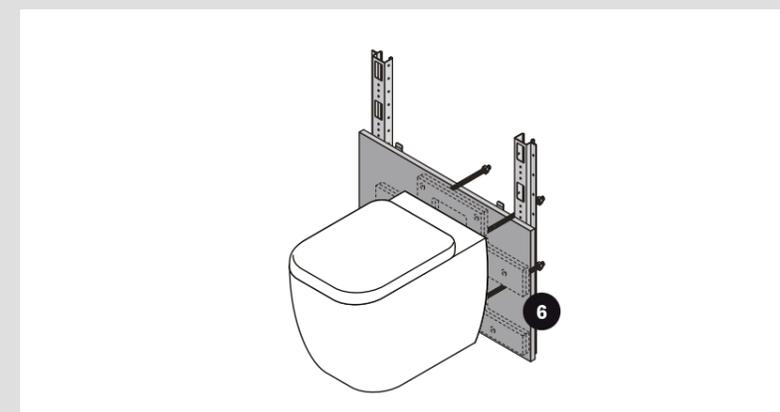

We understand the need for added safety without compromised aesthetics. In stainless steel with a tamper proof security key opening, our panel locks are discreet and ensure maximum security.

### 6. Wall hung WC carrier

Our wall hung WC carrier is made from virtually indestructible Solid Grade Laminate. It simply locates into the baserail and is fixed back to the building structure without the need for floor bolts. The assembly has been load tested to 400kgs and complies with BSEN 997.

### 7. Fittings

We understand the need for products that last. That's why all of our metal components are non-ferrous or coated to protect against rusting and corrosion.

# We know our responsibility.

## Your world is our world. At Venesta, we treat the environment the way we treat our customers, with care and commitment.

### Managing our waste

#### Targeting zero waste

Waste is an inevitable part of any manufacturing process, but there are ways to ensure it doesn't become an environmental headache. For example, at Venesta, we've set ourselves the challenge of reducing waste in all areas, not only in manufacturing but also in our administration processes.

We've significantly invested in a programme of new recycling systems and equipment for all production waste. So far, this has allowed us to reduce our waste to landfill by 50%. That's not all. We're currently planning to extend our recycling and waste burning equipment which will mean we can achieve our objective of zero waste to landfill by 2016.

### Managing our energy

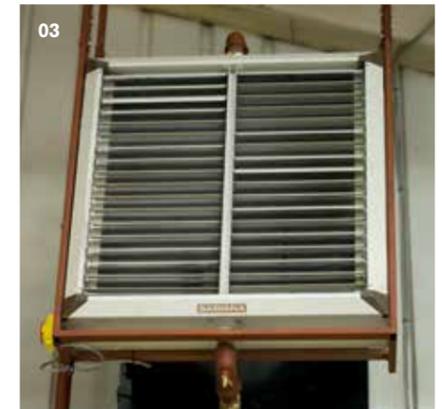

#### Eliminating landfill

The cost of energy and the issue of carbon emissions are high on our environmental agenda and we're continually searching for ways to reduce energy consumption across all of our facilities. For example, our waste burning equipment diverts the heat it generates into fuel for our manufacturing site. This means we've been able to replace our conventional gas-fired heating systems, significantly reducing our heating usage and carbon emissions.

### Reducing our travel

#### Decreasing carbon emissions

As part of our ongoing commitment to improving our carbon footprint, we've undertaken to reduce employees' travelling time. All staff are encouraged to use public transport wherever possible and we've installed video conferencing facilities on all of our sites to allow meetings to be held without the need for travel.

**01-03 Waste management**  
Biomass burner turns smaller production waste into factory heating

**04 Recycling**  
Wherever possible all off-cuts are worked back into production for smaller product components

**05 Recycling**  
Investment in latest CNC programming reduces waste board material

**06 Recycling**  
Robotic handling systems ensure maximum board utilisation is achieved

# We know good service.

## The quality of our products is only half the story. We know that excellent service can make all the difference to your satisfaction.

### Our 6-stage service plan

Whether it's a simple vanity unit or an extensive refit, you'll always find we go the extra mile to ensure you're happy. Here's our 6-stage service plan.

#### Stage 1 Specification

Our friendly and knowledgeable team of specification managers will help you choose the most suitable products for your project, visiting you onsite and surveying your area before quoting if needed. If you need help specifying, our NBS specification writing service is available free of charge to guide you through all the detail. Remember, whenever you need advice of any kind, just call our helpful sales team, who can also provide you with product literature and samples. And during the specification process, our dedicated technical helpline offers you all the technical support you need.

#### Stage 2 Estimating

Our estimating service levels have never been stronger; it's our aim to never deliver a late quotation. And, because we pride ourselves on our attention to detail, our comprehensive quotations always give the most detailed breakdowns of materials and prices. Don't forget, our dedicated technical helpline is here to give you technical support on all our products at any stage of the estimating and ordering process.

#### Stage 3 CAD

Once your order is placed, our highly skilled CAD technicians will prepare layout drawings. At this stage, you'll be given a dedicated CAD technician to work with you throughout your project. Everything from dimensions, colours and drawings can be sent for your approval prior to manufacture.

#### Stage 4 Manufacture and delivery

We're committed to delivering your order as soon as we possibly can, wherever you are in the country. With that in mind, we've invested £5m in state of the art machinery – allowing us to streamline our manufacturing process to make it more efficient than ever before. 100% on time, in full with no errors is our aim and we monitor our performance closely to ensure we can deliver on this.

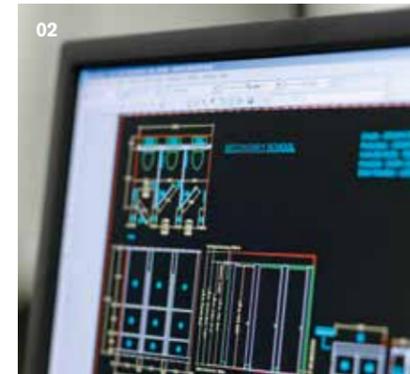

#### Stage 5 Installation

Our highly responsive technical helpline is here to give you technical support throughout the installation process. It's worth remembering that although we're a supply only company, if you need fitting too, there are accredited installers we can recommend who have vast experience installing our products. Accredited installers undergo rigorous training and an approval process so you can be assured of a top quality job.

#### Stage 6 After sales support and spares

Once your products have been delivered, we'll give you your own dedicated point of contact to efficiently deal with all your after sales needs. Attentive and highly empathetic to your needs, they'll ensure you're completely happy at all times with our service. However, if you're not satisfied, for whatever reason, rest assured we offer replacements within 48-hours. Our friendly and helpful customer service team will be in touch with you 48-hours after delivery to ensure everything is in order.

One final thing, at Venesta, we appreciate customer feedback; it helps us to ensure we can continue to improve what we do in line with your needs. So, if you have any comments on our products or service, we want to hear them. You can call us on 01474 353333.

#### 01 Sample service

Our helpful sales team can provide you with product literature and samples

#### 02 Technical drawings

Everything from dimensions, colours and drawings can be sent for your approval prior to manufacture

#### 03 Dedicated technical helpline

When you're ready to specify, our dedicated technical helpline offers you all the technical support you need

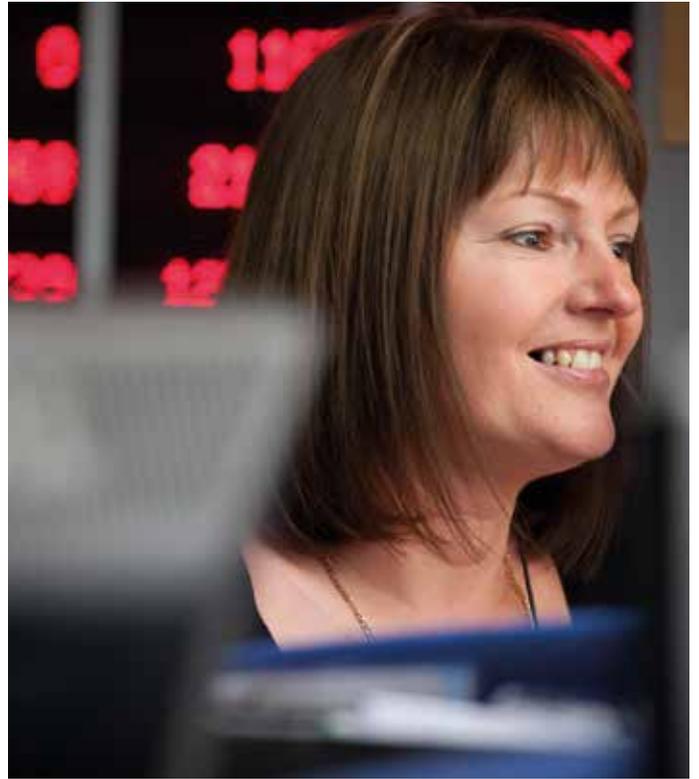

#### 04 Design team

A specification manager will meet you face-to-face to help you choose the most suitable products for your project

# We know washrooms. Your partner, every step of the way.

Venesta people are passionate about ensuring you get the very best product and service, whatever the size of the project. That's why, from your first enquiry through to installation and beyond, you'll have a team of talented and committed experts working tirelessly to ensure you're happy and satisfied.

At Venesta, we believe it's our people that make the real difference to our business success. Everyone is an expert in their field, from our highly creative CAD team to our efficient and responsive project managers and our dedicated manufacturing team. Their experience and professionalism is what underpins the quality of our customer relationships.

## How can we help you?

Our friendly and knowledgeable team is waiting to advise you on your project.

**Call us on 01474 353333.**

Alternatively, you can see all our products online at **[www.venesta.co.uk](http://www.venesta.co.uk)**

We look forward to working with you.
