

PLATELET INCUBATION

This is a range of platelet incubation systems controlling at 22°C. Both models have a chart recorder and an alarm system with volt-free connections to remote alarms.

The internal power socket is automatically switched off when the door is opened. Agitators are fitted with a motion failure alarm as standard.

Systems are available to hold 36, 54 & 108 bags.

All models meet BS, MHRA requirements and are Medical Device Directive registered.

MDD Registered

We can supply just the agitator if you already have a suitable incubator.
