

Car Park Ventilation Systems by D+H UK

D+H UK Ltd are able to offer a solution for your car park ventilation system requirements, be this a new project or the service & maintenance to an existing system.

We have extensive experience with jet fan type systems, with each system backed up by CFD analysis – to model general ventilation and smoke clearance modes – all project specific.

Our systems comply with:

- + AD-B
- + AD-F
- + BS7346 Part 7
- + Smoke Control Association Guidance (SCA)
- + BS EN 12101 series of standards

System Operation

- + High temperature rated smoke extract fans remove pollution and smoke from the car park.
- + Fresh air enters the car park via the entrance ramp, inlet louvres or supply fan.
