SERVICES

THIN BOND REPAIRS (MAXI-CRETE)

BBA and HAPAS approved thin bond repairs to Concrete or Asphalt. Hot applied resin based material, offering a highly cost effective repair solution which avoids the need for a full depth repair.

CALL FREE QUOTE

HOT POUR JOINT SEALING

Cutting, widening, and sealing joints in concrete or asphalt carriageways and airfield pavements using hot bitumen products to meet specified specification.

CALL FREE QUOTE

COLD POUR JOINT SEALING

Cutting, widening, raking and resealing of joints using a high performance 2 part polysulfide fuel resistant, fast cure sealant with high durability and high movement accommodation. Ideal for airfield runways and taxiways EU 14188-2 compliant.

CALL FREE QUOTE

AGL INSTALLATION

Our teams are trained to cut, drill, breakout and install ducts and AGL pots to CAA regulations. We can provide a rapid response to UK or International requirements, using the latest machinery and processes.

CALL FREE QUOTE

RHINOPHALT SURFACE STRENGTHENING

A quick, cost effective solution which protects the condition of the existing asphalt surface. It is a HAPAS approved, preventative maintenance treatment used on highways, runways, car parks, cycleways etc as a means to improve aggregate cohesion and resistance to moisture ingress and weathering, which in turn reduces the need for planned maintenance.

CALL FREE QUOTE

DIAMOND DRILLING

Using specialist, diamond drilling tools allows us to cut through the toughest, reinforced concrete with upmost precision.

CALL FREE QUOTE

CONCRETE AND ASPHALT SAWING

Self propelled diesel driven floor saws ideal for diamond saw cutting concrete or asphalt in carriageways, runways, hard standings and aprons. Mainly used for forming isolation demolition cuts or widening of existing or new joints.

CALL FREE QUOTE

IRONWORK REINSTATEMENT (PACOPATCH)

Designed to reinstate failing surfaces surrounding manholes, drainage gullies and other public utilities ironworks, it uses two state-of-the-art materials, the IKO Pacopatch Brick and the IKO Pacopatch Grout, which work hand in hand to create an impermeable system made to last.

CALL FREE QUOTE

PULL TESTING

We provide pull testing to fixtures and anchors which have been installed in concrete or masonry, to confirm they meet the specification required. Test certificates are provided on the day of the test.

CALL FREE QUOTE

VAC-EX

A safe and efficient no-dig excavation solution, our Vac-Ex machines combine compressed air and suction to safely loosen and remove ground material. This enables the exposure of underground services without the need to use traditional excavating techniques eliminating service strikes.

CALL FREE QUOTE

SERVICES

ROCK DRILLING

Rock drilling is super fast, cost-effective and now safer than ever. Imagine the time and money you'd save if you could drill a 30mm diameter hole in 30 seconds - now you can. In contrast to traditional, high-vibration rock drilling methods, we can offer the cost savings of rock drilling without the risk because our equipment is operated hands-free. With a fleet of horizontal, vertical or excavator-mounted drilling rigs to choose from, we're ready to tackle any job.
