Headboard Installation Options

Bed Mounted

The traditional method of mounting headboards, your headboard will be attached to your bed base via struts, secured with head bolt bolts. The headboard will be attached directly to the bed base - making it easy to move your bed when required.

Wall Mounted

If you want your headboard to be wall-mounted, we can supply our headboards with wall-mounting kits. This consists of two wooden batons which will interlink with one another to affix your headboard to your wall. It also allows for the headboard to be removed if required - i.e. for cleaning.

Floor Standing

For a truly distinguished appearance to your room, our floor-standing headboards make a striking appearance. The floor-standing headboards will affix to your divan base and will be tall—stretching up from the floor and upholstered head-to-toe.

Headboard Designs

Below are our standard headboard models, with their height options listed under each.

Plain

Outer Stud

Inner Stud

Double Stud

Double Stud Square

Double Stud Diamond

Stitch & Stud

Saddle Stitch
