LASER S.O.S. AESTHETICS

*Robust, Reliable & Affordable
OEM Laser Systems, Spares & Consumables*

Laser S.O.S. Group was established over 30 years ago to service and support the rapidly expanding use of lasers in a wide range of industrial sectors medical & scientific research. Today, it has become one of the leading global suppliers of solid state laser sources, retrofit laser parts, consumables and associated products for many hundreds of different laser systems.

Additionally **Laser S.O.S. Group** has now expanded its product range into the beauty, aesthetics & medical sectors, producing Intense Pulsed Light (I.P.L.) system for hair reduction & skin rejuvenation, also included is an extensive range of retrofit I.P.L. & medical components for most leading brands. During the last five years a wide range of fiber laser machines have been developed for cutting, drilling, welding, engraving and marking metals for large volume industrial production replacing many old manufacturing processes.

The company's international growth has been achieved by providing not only outstanding service and technical support, but also intelligent solutions based on in-house manufacturing capabilities and development activities. The customer support expertise is always based on technically feasible and cost effective solutions. **Laser S.O.S. Group** core business sectors are industrial, diamond, jewellery, medical, beauty, aesthetics and the scientific community.

Laser S.O.S. Group welcomes all parties to visit our production & service facilities in the UK, USA, Turkey & India and discuss any aspects of laser technology and its applications. Our technical specialists will be pleased to discuss how today's laser technologies can be used to benefit and improve your organisation's current operations.

Sapphire Lipo-Light

The latest **intelligent alternative** to liposuction

Sapphire Lipo-Light: latest in the line of body sculpting technology by Innovate Photonics – with improved performance, enhanced patented flexible pads and touch screen technology for more intuitive operation and control.

Sapphire Lipo-Light is a revolutionary new system that uses scientifically proven 635nm red light for fat reduction and body shaping treatments. The Sapphire Lipo-Light uses photobiomodulation to stimulate the body's natural process for releasing stored content from the adipose (fat) cells.
