

Scanwedge

Scanwedge is designed specifically for portable x-ray screening in tough law enforcement and EOD environments,

Scanwedge has a unique flat panel x-ray imager that is lightweight and backpackable, producing high quality x-ray images time after time.

Scanwedge contains no moving parts nor fragile components with a weather-protective milspec cover for use in tough field environments.

Key features

- Unique rugged and lightweight flat panel imager (imaging area less than 1" thick)
- 3 component operation (generator, imager, laptop) - no additional interface box needed
- Direct X-ray Image Viewing with Fast rescans - take multiple x-ray exposures without reapproach to retrieve the plate
- Ethernet cable or wireless operation

Imaging Area

8 x 10"

X-ray Generators

Works with most portable x-ray sources including the Golden XR150, XR200 and XRS-3

Image processing features

Scanwedge uses our powerful ScanView software to give you a range of image manipulation options to get all the detail out of your x-ray image. Features include Zoom, inverse Image, b/w, pseudo colour, pseudo 3D, contrast enhancement, clean image, rotation, distance, measure and show gradients.

Power Options

Totally battery powered in the field for over 5 hours continuous operation

Provided in rugged transport case with integral charging system
