

Double reception desk

evolution® **eclipse special** finished in maple laminate with brushed aluminium effect shadow gaps, flush plinth and curved overhead lighting bulkheads

“Clarke Rendall produced some initial 3Ds and right from the start the client liked it”

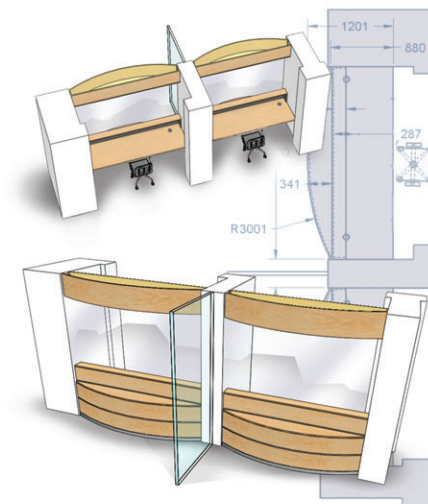

“Very pleased indeed about the way things turned out. We got the ideal solution, and everything was carried out with the minimum of fuss”

Dealer

Project: **School & 6th Form College, Surrey**

Dealer: [Spectrum Office Interiors](#)

Business Area: **Education**

When local authority approved suppliers **Spectrum Office Interiors** first approached **Clarke Rendall** about this project for a School and 6th Form College in Surrey, they were clear about what was required. Familiar with **Clarke Rendall's** range of evolution® standard products, they provided some **initial loose drawings** of his design which used the styling elements from evolution® **eclipse**. After an initial **site visit** by a member of the Clarke Rendall design team, work commenced to produce the **final working drawings** for this double bowed reception counter, featuring security glazing, a hinged DDA flap and a suited lighting bulkhead.

Drawings for a second, straight fronted option were also worked up for the School as an option in case budget became a major factor in the final decision.

The glazing was manufactured by specialist glaziers based on the accurate and detailed technical specifications in the Clarke Rendall drawings.
