

## BEFORE...

The desk's role has outgrown its design and is difficult to keep tidy

## AFTER...

Pleasing minimal design with suited storage resulting in a stylish and functional reception solution

Reception desk

evolution® eclipse special finished in maple laminate with brushed aluminium effect shadow gaps and flush plinth

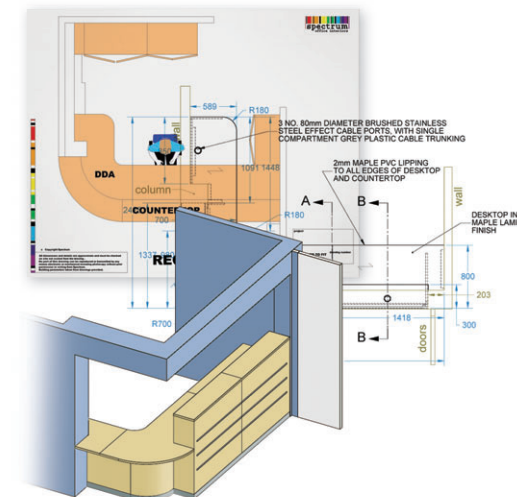

Dealer

*"At the last minute, my client wanted the raised counter section heightened by a few centimetres to allow for a computer monitor. Clarke Rendall applied the change without any hassle and at no extra cost"*

Project: **Special School, Hants.**

Dealer: **Spectrum Office Interiors**

Business Area: **Education**

A regular and consistent aim of Clarke Rendall is to ensure that the specification and design of any reception counter is as simple and hassle free as possible. In this project, the Clarke Rendall design team took a footprint and some pointers on styling from the dealer and began adapting an evolution® eclipse YCN-1SL to incorporate the required DDA return that would allow this reception counter to fit into the space to be refurbished. Attention was also given to ensuring that the shape remained consistent with the existing bulkhead which was set to remain.

Clarke Rendall's 18 year track record in delivering ideal reception desk solutions helped guarantee this was a simple and straight forward project requiring minimal input from the dealer once the initial brief had been agreed.

To discover more about how **Clarke Rendall** can make a molehill out of a mountain on your next project, call the support team on **01908 391600**.
