Formed upstand and desk top finished in crown cut oak veneer

Formed upstand finished in 'Aubergine' lacquer supporting white acrylic panel with etch effect logo

Project: **St Brendans College, Bristol, Avon**  
 Architect: **NVB Architects**  
 Main Contractor: **ISG Pearce**  
 Business Area: **Education**

The initial designs for these counters were produced by **NVB Architects** as part of their plan for the construction of a new 6th form College campus to replace the existing **St Brendans College** facility. Handed over to main contractors for the project **ISG Pearce**, the reception desk and library counter element was then put out to competitive tender.

**Clarke Rendall** have a relationship with ISG Pearce stretching back many years and covering a number of successful projects and were delighted when the invitation to pitch was offered.

With such a wealth of experience in this field, Clarke Rendall were clearly front-runners and completely confident from the outset about all aspects of manufacture, particularly the distinctive formed upstands which resemble closely the **evolution® classic CZ**, one of Clarke Rendall's portfolio of standard products all manufactured at our central UK facility.

To discover more about how **Clarke Rendall** can successfully implement your requirements, call the support team on **01908 391600**.

Formed modesty panels finished in crown cut oak veneer
