

Reception Desk  
evolution® Xpression special in graphite and maple

*“Clarke Rendall bring out new ranges all the time, which is great, and with Xpression we saw a significant change over previous models. It was ideal for this project because my client wanted all the classic features of a bespoke reception desk, without delving into bespoke for cost reasons”*

**Bridgend Office Furniture**

Project: [Trinity St David College, University of Wales](#)

Dealer: [Bridgend Office Furniture](#)

Business Area: **Education**

Based on an accurate 2D AutoCAD floor plan drawing supplied by the design team at **Bridgend Office Furniture** and some general pointers on desired styling, **Clarke Rendall** produced an initial design concept. The reception area of the **University of Wales Trinity Saint David** is brand new and required a design in keeping with a modern environment and also capable of displaying a lit graphic of the college crest and title.

*“My client wanted all the classic features of a bespoke reception desk, without delving into bespoke for cost reasons”*, explains BOF’s **Simon Narbeth**. This type of request will currently be familiar to many in the industry.

**evolution® Xpression** was put forward to the college by BOF as a potential solution due to its sleek minimal styling, built-in LED lit recessed feature graphics panel and **excellent capacity for customisation**.

*“As part of our presentation, we called up the Clarke Rendall website on the plasma screen, saw the potential of Xpression and virtually designed the desk there and then”* commented Simon, *“giving the client complete clarity over how they expected the final product to look”*

Finished in graphite and maple, the counter also features a DDA recess described by Simon as *“more organic, often they look like an after thought that’s been retro-fitted, but not with Xpression”*.

To ensure YOUR next project benefits from this kind of forward thinking, call our support team now on **01908 391600** or visit our comprehensive website.
