ABOUT US

“Foresport is a leading sports fencing supplier operating across the UK delivering quality and reliable service every step of the way.”

Who we are?

Foresport Fencing supplies and installs specialist and tailored made ball stop fencing and sports netting to the sports industry.

With over 25 years' experience we have developed a range of systems to suit your specific needs. You can be confident that whatever your sport, whatever your requirement, Foresport Fencing will help design an affordable fencing system to meet your individual needs. All our staff are professional and courteous ensuring competent work to an excellent standard with minimum disruption.

Why Choose Us?

The installation of sports fencing is not as simple as erecting a picket fence in your garden. Unique problems such as extreme heights exist which regular fencing contractors have little experience of. Choosing a specialist company who regularly undertake this type of work will mean you have the best possible start. The reliability of our products is second to none, and our experienced installation teams make sure the process on site runs as smoothly as possible.

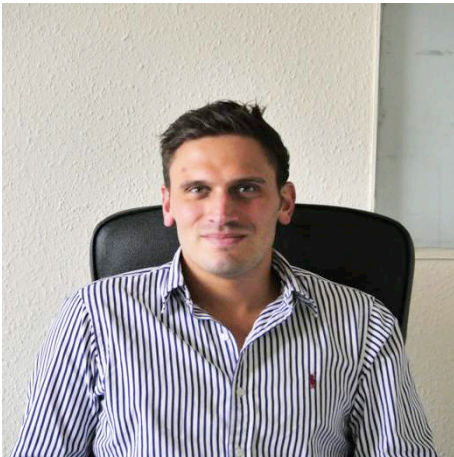

OUR PROFESSIONAL TEAM

Nick Hammond
Director
Experience : 15 years

“Having previously graduated from the University of Luton with a BA (HONS) Degree in Business Studies it gave me the jump start to pursue a professional career within management . After graduating I took the opportunity to travel the world for 18 months. The knowledge and experience gained within an academic and business environment has now lead me to become Managing Director of Foresport Fencing. My experience within the industry now expands to 10 years, with the hope of many more to follow.

This is a demanding and challenging role but one in which I have thoroughly enjoyed and look forward to further developing and expanding the business.

Nico Licata
Business Development
Experience : 8 years

Having graduated from Cardiff University after studying business management – I started several successful businesses. However after meeting Nick Hammond and hearing his passion to deliver exceptional service whilst striving to become a market leader I jumped at the chance to join Foresport Fencing.

My aim is to help push Foresport fencing forward and help to expand our links in the construction industry. We are always looking for new business connections and aim to become number one provider for sport fencing in Europe.

Vicky Hammond
HR and Business support
Experience: 20 years

Having initially started my business career over 20 years ago as a Legal Secretary in Plymouth, I worked my way through the ranks to become a PA to one of the Partners. Following a move to Bristol some years later, I joined one of the top law firms in the area as a Senior Case Handler. I thoroughly enjoyed this stage of my career however, felt that I had more to offer so when an opportunity came along to join Foresport Fencing Ltd as their Administration/HR Manager, I felt this was too good an opportunity to miss.

I am enjoying the challenge of working within an ever growing company with successful strategies and good values, and hope to keep working in this ever developing environment for many years to come.

Our clients

These are just a few of our clients

Our accreditations

Our Fencing Systems

We have extensive experience within the fencing industry. Our fencing solutions include the following systems: -

- Security fencing
- MUGA fencing
- Permanent netted fencing 3m - 30m high
- Demountable fencing up to 12m high
- Semi demountable fencing up to 15m high

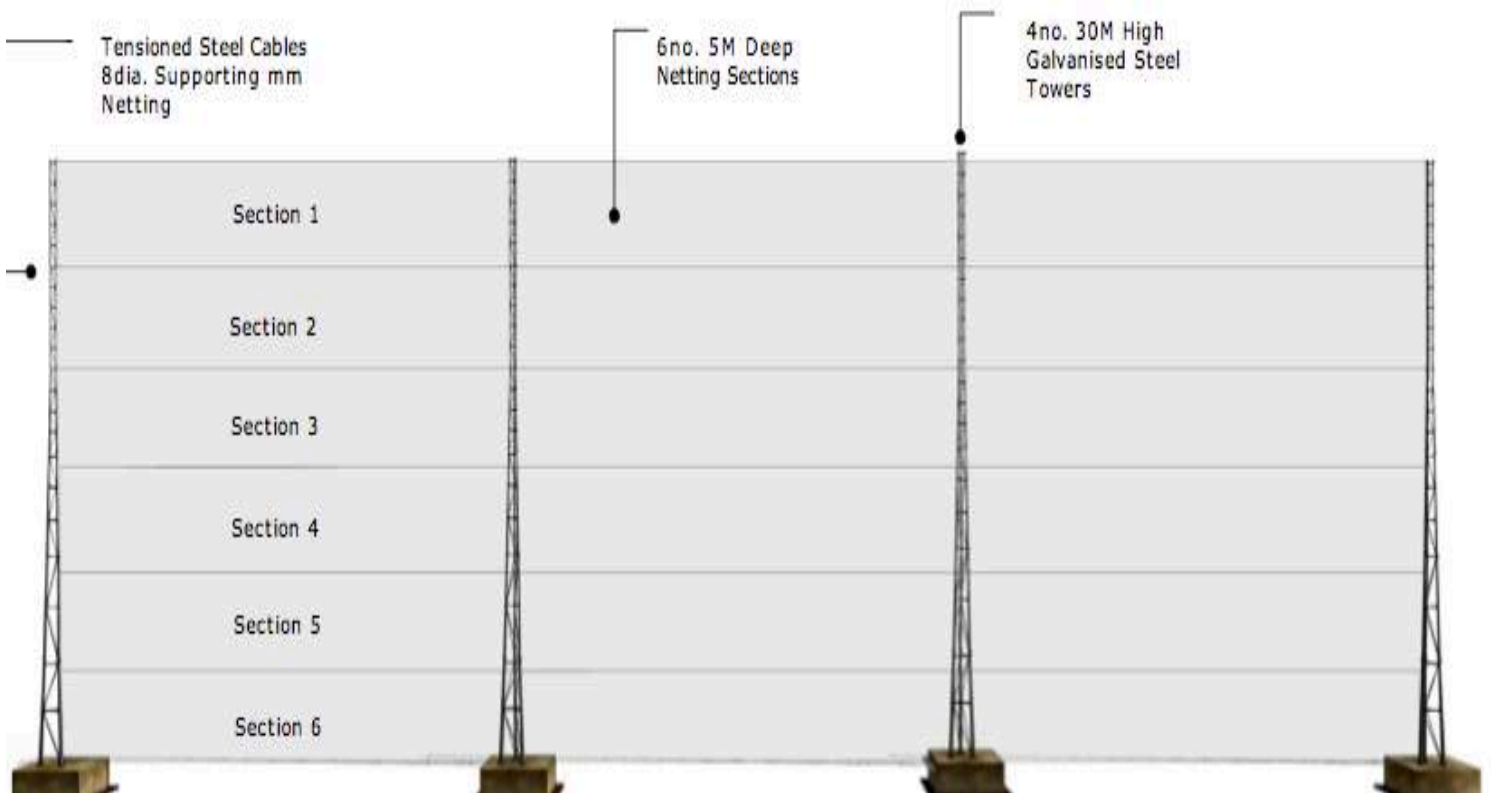

Tower Fencing

Structurally designed up to 30 meters heights using steel lattice tower posts to form strong pillars helping to disperse wind-loading forces. Ideal for extreme height requirements such as driving ranges. Tower includes a unique fail safe system when wind gusts exceed 70mph guaranteeing structural integrity.

Our approach

We work closely with all parties on projects to ensure the project is delivered efficiently and accurately. We manage the project from the point we were appointed to completion. Our dedicated team takes full control of the site and ensures direct liaison with the relevant people at all times. Our clients often comment that having one point of contact throughout the work makes a significant impact on the project being delivered on time and on budget.

Permanent netted system

Our permanent fencing ranges from 3m to 30m high. These heights can vary along the run of fencing and can adapt to the course or ground.

Security Fencing

Our security products range from medium rated systems to high security which can both offered to both industrial and commercial applications

We also offer a combination of netting and metal solutions. This option is more cost effective and has less impact on the surrounding neighbours.

Demountable Fencing Solutions

Foresport Fencing are pleased to offer a fully demountable fencing solution for heights of up to 12m.

Lightweight poles mounted on a galvanised hinge base.

Muga

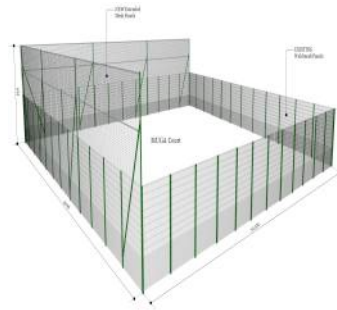

A Multi Use Games Area allows the client to use one court to play a multitude of games including netball, tennis and 5-a-side football. We provide design advice to work to budgets and to ensure their security and sporting requirements are reached.

MUGA Extension and roof netting

We can extend the height of MUGA pitches using the existing fencing.

Foresport offers a second option of fixing a roof net. We have found that an increasing number of sports complexes require roof netting. This is an option that ensures balls are retained within the play area.

General Arrangement Drawing of Extended MUGA Court
