

# HEAVY 4054

The heavy duty case with  
optional trolley-system

**NEW!**

Case solutions for your success.

# HEAVY 4054

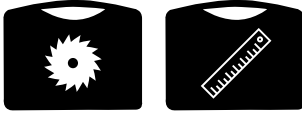

The new case size HEAVY 4054 of the proven case line HEAVY meets the highest demands of a transport packaging for heavy and large products. Its large interior volume in combination with the high stability of the sandwich frame construction fulfil toughest requirements for a professional as well as safe application of your products. Despite its robustness HEAVY 4054 impresses with an attractive, timeless design - without sharp corners and edges. Its sturdy knee-lever seals guarantee a maximum security for the content.

HEAVY 4054 has external stacking feet like the complete case line HEAVY. Those enable a secure and non slip stacking in service vehicles for example.

The carrying handle within the sandwich frame construction is built out of one piece. Therefore an easy handling even of extremely high loads will be granted.

For the mobile use of heavy loads a trolley-system can optional be fitted at the case size HEAVY 4054 - a comfortable handling is guaranteed.

## Out of our total range

NEW!

**JAZZ**  
 Pure elegance in shape and a perfect and individual organization of the interior by using punched dividers or customized foam inlays.

**TEKNO**  
 Timeless and classic design, but versatile in applications (for example for promotion, medicine etc.).

**BEAT**  
 Narrow and long dimensions for an optimal product presentation at shelves. The reusable and environmentally friendly alternative to foil packaging.

**DESIGN OPTIONS**  
 Customized foam or deep-drawn inlays guarantee the best protection for the contents. You can match the colours of the case, the locks as well as the handle perfectly to your corporate identity. For example, we can place your logo on the case with an high advertising effect by screen-printing or pad printing.

We consider case-packagings as total solutions.

NEW!

**In-mould Labeling:** The alternative to screen and pad printing in brilliant photo quality.

The in-mould labels (decoration films) will be integrated on the plastic case in just one step during the production process.\*
