## 3DSDS

## ABOUT

3DSDS was founded by Teresa Benson-Shettle in 2018, and the main mission was to provide affordable professional services to the Construction Industry. Having been in the construction industry for over 25 years with experience using AutoCAD R9 to 2021, Advance Steel, Revit, Creo Elements, FreeCAD, SolidWorks, Draftsight 2D and SketchUp and many more.

3DSDS uses the latest AUTODESK Software and has experience in producing 2D, 3D, Structural Detailing, Range Design to JSP 403, Planning Drawings and QMS for ISO9001 standards.

Teresa also worked in the past at Graitec UK, developing, teaching and supporting AutoCAD and Advance Steel.

In her years as a Structural Technician and Project Engineer she has worked on various projects for construction that have been located all around the world, these included the following:-

3D Printed Projects, Balconies, Bespoke Metalwork (Cage Units, Chairs, Park Benches, Shelving Units, Tables), Fire Escape Staircases (Spiral and Straight), Mezzanine Floors, Portal Frame Structures, Residential and Commercial Steelwork, Sheet Metal Work, Shooting Ranges (MOD), Timber Frame Structures & Telecommunication Towers.

When Teresa started the Company, her vision was to provide a professional affordable service in the Steel Industry and as a company work closely with our clients to produce the design and fabrication drawings with all the necessary documentation using the specifications provided.

3DSDS will firstly produce drawings for approval once approved we will complete the project and issue all the necessary documentation and drawings for fabrication and if required, we can offer Structural Calculations as we can use independent Structural Engineer.

## TESTIMONIALS

### Alan Staton Bower-Bennett Ltd

"Teresa has a vast technical knowledge and she understands what she's doing. She's aware of contractual commitments and always works towards helping you achieve them. Teresa is personable and is easy to communicate with. She grasps the problem and is business like in solving it."

### Matt Covil - Cubic Defense (UK)

"We sat a 3-day introduction to AutoCAD course with 3DSDS, (Teresa) and it was delivered on point and everything was tailored to our needs. The course was delivered with a lot of hands-on work, (which is a must) and documented "how to" information for reference was also handed out and very useful. If you are looking to get started with AutoCAD, I would highly recommend this course!"

### Eddie Gevorkian CEO 1 Techno Canada

"Teresa was instrumental helping my new team at 1Techno (Distributor for GRAITEC) get on their feet. For the past five years she has been a gem, putting her heart into every project. Her people skills are excellent."

### Peter Scannell - Macai Projects Ltd

"3DSDS provided a fast, efficient and effective service, often delivering what was asked ahead of schedule. Any queries were dealt with straight away. I would have no hesitation in using them again or recommending them to others."

### Russ Uridge - DesignBYRuss

"Teresa is an exceptional tutor. Very thorough with very in-depth knowledge of Advance steel as well as the fabrication and erection processes. She has very good communication skills and is a great judge of what you need to proceed. Every minute was valuable, and I would recommend her to anyone of any ability."

## VEGETABLE CONTAINER – 3D PRINTED

We recently got asked to model and 3D print a vegetable container for a client on the Isle of Wight. It had to be wall mounted and had to be easily dismantled if necessary - so after various designs we produced this one that the client liked, and all parts were 3D Printed:- Brackets, Base, Corners, Infills and most of all Nuts and Bolts. Easily assembled using the 3D Printed Nuts and Bolts.

## 12 CAN ORGANISER – 3D PRINT

We recently got asked to model and 3D print a 12 Can Organiser for a company called "And That's the Wrap" located on the Isle of Wight. This organiser was to keep the Cans stored together with a space in between the cans for an Ice Pack to keep them chilled in a cool bag.

Parts Location

Exploded View

Assembled Unit

And That's A Wrap are a mobile catering unit that specializes in hot and cold fresh wraps. They are located on Seaview Road in Cowes and can be booked for private events.

## **BRING YOUR DESIGNS TO LIFE**

Have you ever wanted to see what your designs will look like before construction.

We can print your designs and deliver a 3D Model in just a few days.

Here is an image of a foot bridge scaled down and measures 210x80x35mm, the actual measurements would be 6m long x 1m wide.

Also is a Spiral Staircase - 3D print measures 170mm high x 120mm diameter.

Various colours available including white.
