Height adjustable changing tables

Lifting children numerous times during a working day is a great burden to the back but the right piece of furniture can prevent back pain and body part discomfort.

By lowering the changing table, it's suddenly easy for even a 2-year old child to get on and off the table. The height is adjustable to as low as 28cm and up to 118cm (see specifications for each product). Adjustment works easily with a spiral cord hand control. The molded top is constructed of ABS, a bacteria resistant material that is easy to clean.

Top sizes fit standard changing pad sizes. Kindergartens, nurseries, hospitals and daycare institutions will benefit greatly from the advantages of a height adjustable changing table. All ConSet products meet the safety requirements for the area in which they are sold.
