

Giving a lift to everyday life

flexible kitchen systems

Mobil Flex   
R A N G E

# Flexible work areas

Mobil Flex® frame systems allow worktops, wall units, sinks and appliances to be instantly adjusted in height by the touch of a button or simple winding handle.

The system is ideal for multi-user environments such as schools, colleges, ADL/Training kitchens, rehabilitation and family scenarios.

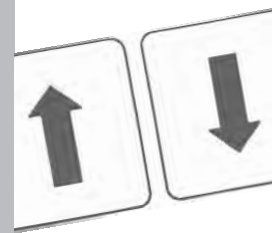

Mobil Flex® is compatible with most furniture ranges and particularly System Flex® kitchens.

Worktop frames can be supplied with concealment panels which hide services, plumbing, etc and give the frame the appearance of fully fitted furniture.

## Unique

- The design of Mobil Flex® allows the frames to be adjusted in width so that site dimensions are not as critical as with similar products.
- Easy installation.
- Innovative bracket system (patent pending) allows both waste and feed pipes to pass behind the frame.
- Adaptable safety devices.
- Simple levelling system to allow for out of true walls.

# Technical specification

Elevation	Illustration	Example	Description	Specification
			<p><b>Model MF- B</b></p> <p>Wall mounted or free-standing frame which enables height adjustment of worktops, hobs, sinks, etc.</p> <p>Available in both manual (winding handle) and 24v electric versions (with safety stop feature)</p> <p>Concealment panel option available.</p> <p>Sink, tap, hob and furniture available as an optional extra.</p>	<p>Widths available: 60 to 300cm</p> <p>Height adjustment: 30cm</p> <p>Height of frame in lowest position: 57.5cm</p> <p>Depth from wall to front of consoles: 58.5cm</p> <p>Load capacity: 150kg</p>
			<p><b>Model MF- X</b></p> <p>Wall mounted or electrically operated frame with diagonal adjustment which allows wall cabinets to be lowered down and towards the user.</p> <p>Supplied with safety cut out plate to suit width of cabinets.</p> <p>Furniture available as an optional extra.</p>	<p>Widths available: 60 to 120cm</p> <p>Height adjustment: 42cm</p> <p>Horizontal adjustment: 18cm</p> <p>Total height: 73cm</p> <p>Depth from wall to front of frame: 9cm</p> <p>Load capacity: 150kg</p>
			<p><b>Model MF- V</b></p> <p>Wall mounted electrically operated frame for vertical adjustment of wall cabinets.</p> <p>Supplied with safety cut out plate to suit width of cabinets.</p> <p>Furniture available as an optional extra.</p>	<p>Widths available: 60 to 120cm</p> <p>Height adjustment: 30cm</p> <p>Total height: 70cm</p> <p>Depth from wall to front of frame: 11cm</p> <p>Load capacity: 150kg</p>
			<p><b>Model MF- K</b></p> <p>Wall mounted electrically operated frame which will adjust both worktop and wall cabinets at the same time</p> <p>Supplied with safety cut out strip.</p> <p>Sink, tap, hob and furniture available as an optional extra.</p>	<p>Widths available: 60 to 120cm</p> <p>Height adjustment: 30cm</p> <p>Total height: 123cm</p> <p>Depth from wall to front of frame: 8.4cm</p> <p>Depth from wall to front of consoles: 57.5cm</p> <p>Load capacity: 150kg</p>
			<p><b>Model MF- O</b></p> <p>Wall mounted electrically operated frame for the adjustment of appliance housings.</p> <p>Supplied with safety cut out plate.</p> <p>Appliance and housing available as an optional extra.</p>	<p>Width available: 60cm</p> <p>Height adjustment: 30cm</p> <p>Total height: 145cm</p> <p>Depth from wall to front of frame: 8.4cm</p> <p>Depth from wall to front of consoles: 57.5cm</p> <p>Load capacity: 150kg</p>

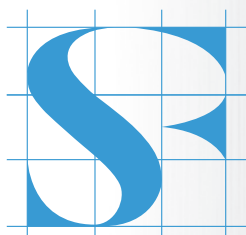

## CAD services

A typical Scanflex® kitchen presentation giving a realistic interpretation of how the installation might look. Our design and estimating department accepts enquires in all formats including AutoDesk and AutoCAD (.dxf and .dwg files).
