

You have saved 2,100 milk bottles from entering the landfill

Buy recycled furniture

Each year the average UK household uses 480 plastic bottles, but only recycles 270 of them - meaning nearly half (44%) are NOT put in the recycling.

☒ RECYCLE ☐ WASTE

How to recycle plastic

- Making sure plastic bottles are empty
- Rinsing the bottles
- Squash the bottles to save space in the recycling bin (then put the lids back on)
- If you're out; pop your plastic bottle in a bag and recycle it when you get home rather than throwing it in a waste bin

**Reduce
Reuse
Recycle**

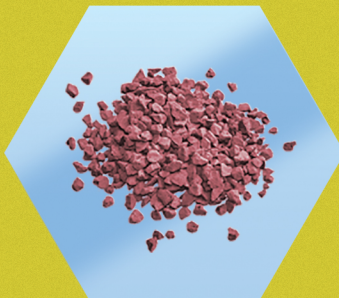

Using the correct bin is important. 2100 milk bottles can become one of our benches.
