

REEDBUT GROUP TO MANUFACTURE NEW CORRUGATED SKYTIDY®

A lighter, more cost effective solution designed to ease the process of onboard rubbish collection.

Reedbut Group, exclusive manufacturers of the skytidy® airline trash compactor box, will soon begin producing brand-new versions made from corrugated board.

Compatible with both Zodiac (Monogram) and Iacobucci trash compactors, the skytidy® is currently constructed from solid-fibre board including sustainable kraft paper. The switch to corrugated board will ensure a more flexible box and a **weight saving of over 250g**, with increased savings and cost-effectiveness.

Manufactured 24 hours a day, 5 days a week

Fully-automated production process

Up to 15,000 units produced weekly

UK manufacturing for worldwide distribution

Reedbut Group will be exhibiting the brand new corrugated skytidy® at the World Travel Catering and Onboard Services Expo (WTCE) in June for the second year running. Visit **Stand IA97** to see the innovation in action.
