

PHLEBOTOMY/TREATMENT CHAIR

Designed primarily as a phlebotomy chair, but also as a useful chair in the out-patient department and doctors surgery's for minor procedures. The large upholstered armrests are adjustable for height and angle, and easily replaced. The backrest may be reclined incrementally by the operative to the horizontal position, with automatic profiling of the seat and leg rest. A removable step is provided for the patients convenience.

The chair is fully manoeuvrable on four 100mm braking castors, and upholstered in flame retardant vinyl fabric to BS5852 in the colour of your choice from the Chieftain or Just Colour ranges
