

Case Study – Finchampstead Community Centre

A new community centre in Wokingham is truly multi-purpose. The £4 million-plus project includes a children's centre, library, sports hall, café, parish office and a local police base. It will also be a place of worship for Finchampstead Baptist Church.

Main contractor Mansell was keen to speed the construction project while ensuring durability, and with this in mind used FlexiDry in the F2 formulation to ensure the building's floor screed dried in 14 days after installation which fitted perfectly with their project timelines. Moisture and strength tests carried out on site confirmed FlexiDry fast drying screed's outstanding performance.

With funding from a variety of sources, this long-awaited development will allow Finchampstead residents to benefit from significantly enhanced community facilities and services.
