

Easy-Take[®]

IT'S GETTING EASY NOW

May we help you carry?

Easy-Take®

APPLICATIONS

It's getting "easy": Easy-Take® can be simply put on the article which you want to carry and it is ready for transport! Easy – handy – safe!

Carrying large or heavy goods is not often practical. Pressed under the arms or with two hands in front of the body it leads to the wrong physical posture. Opening doors or loading in and out of cars often requires the item to be set down and then picked up again. The very strong adhesive allows carrying goods up to 25 KG directly after application of the Easy-Take®. Sentega has developed the Easy-Take® in order to help consumers facilitate the transport of such goods in an ergonomically friendly way.

Easy-Take® Clean

Sometimes the removal of the Easy-Take is required without damaging the packaging e.g. in the case of returned goods. The standard version with the strong adhesive may damage the outer packaging and therefore for this purpose Sentega developed the Easy-Take® Clean, a carry handle that can be removed without damaging the box.

Easy-Take® and the environment

With environmental issues being important, Easy-Take® helps to address this in more than one way. Using Easy-Take® instead of a plastic carrier bag not only saves costs but contributes to a better environment.

Easy-Take® and your own logo

Apart from our standard stock range of plain unprinted Easy-Take® you may also have these pre-printed with your own logo and text with up to three colours – for minimum orders of 5,000 units.

Easy-Take® ex stock

The Easy-Take® is available within a couple of days. In plain format the Easy-Take® can be ordered in minimum volumes of 1,000 units.
