

AL3C Light Commercial Loft Ladder

Product Information

A loft ladder designed for heights up to 3m (9'10").

The counterbalanced unit is a spring assisted 'Easy Stow' system, giving total control when lowering or stowing the loft ladder.

The in-loft handrail provides added safety when entering or leaving the loft.

The loft ladder comes with an access pole that is utilised to position the ladder into the upwards or downwards mode. It also doubles up as a loft hatch pole for the majority of our loft doors.

3 section commercial statistics:

Minimum clearance arc 0.71m (2'4")

Minimum storage space 1.12m (3'8")
