

AL4C Commercial Loft Ladder - Up to 5m

Product Information

The AL4C is a deluxe commercial loft ladder manufactured to BS7553 – 150kg Class 'H'.

A double section aluminium loft ladder with twin handrails and a choice of 75mm or 100mm tread depth.

The loft ladder is operated via 'long arm' pole.

Stores horizontally above the hatch extending beyond into the loft space.

Suitable for heights up to 5m subject to suitable hatch lengths and clear space within loft space.

The Operation controlled through a balance spring assembly:

2500 to 3000mm requires hatch opening length of 750mm
3001 to 3350mm requires hatch opening length of 900mm
3350 to 3600mm requires hatch opening length of 1050mm

On receipt of an order a drawing will be submitted for approval to ensure 100% compatibility.

For larger sizes please call our advisory service.
