

## Fire Rated Access Panel, Made To Measure - PFFDS

### Product Information

A neat made to measure access panel with a picture frame, to suit all wall construction types. Air and vapour sealed between the frame and door with a budget polished steel tri-drive lock.

The access door is hinged with a concealed continuous full length hinge. The access panel is 1hr fire rated and insulated by default.

The white powder coating RAL No. is 9010.

The fire rated access panels are tested to B.S.476: Part 22:1987 and provide access into all types of wall and ceiling construction voids.

The access panels consist of 1.0mm powder coated zintec steel with a slim profile, producing a light, robust access panel where access to building services is required.

The metal frame links to a steel door through a simple concealed hinge and is closed flush with a budget lock.

As standard all doors are powder coated in white RAL Number 9010 with 20% gloss. Black and other addition colours are available to order (please call to discuss) or access panels can be over painted on site if required.

**Delivery is 7 days from Tuesday lunchtime order cut-off point.  
Maximum size is 900x750mm (please call to discuss if larger).  
Presume hinged on the longside unless informed otherwise.**
