

Fire Rated Access Panels, Picture Frame, Key Lockable - PFFDL

Product Information

Our range of high quality, precision welded key lockable 1-hour fire rated access panels tested to B.S.476: Part 22:1987 provide access into all types of wall and ceiling construction voids.

The 1.0mm powder coated zintec steel panels have a slim profile, producing a lightweight, robust panel where access to building services is required.

The metal frame holds a flush metal door through simple concealed hinge and is held closed with a secure radial pin tumbler lock (supplied with two keys).

As standard all doors are powder coated in white RAL 9010 with 20% gloss. Black and other addition colours are available to order (panels can be over painted on site if required).

All panels are manufactured with a picture frame or a beaded frame.

With options for Part "L" insulated and air test compliancy
