

MOBILE ASSORTMENTS

Intelligent solutions for professional load safety

Sortimo®
Intelligent Mobility

Mobile Assortments

From pioneer to market leader

More than 30 years ago, a blue metal case and the corresponding, multi-coloured inset boxes formed the beginning of the entire Sortimo product range. Developed for the secure transportation of small parts and tools, the case as a mobile item forms the centrepiece of our entire product assortment.

The current Sortimo in-vehicle equipment consists of more than 3000 individual products. It comprises a consistently compatible series of sortation systems, transport containers and load safety systems and offers innovative solutions for all crafts and service branches.

Well-designed ergonomics, best possible passive safety, quality and longevity are the properties which distinguish our products during hard, everyday work – from the individual case inset up to the complete in-vehicle equipment.

Thanks to those ambitions, Sortimo is the world's leading manufacturer of in-vehicle equipment and load safety systems, today.

Symbols and their meaning

CarMo The product is compatible with CarMo and can be safely fastened onto the anchoring points of the floor plate.

Simpleco The product fits into the simpleco in-vehicle equipment for vans.

TROLLEY

Trolley The product can be clicked onto the trolley with a single hand movement and therefore makes transport of the work equipment easier.

MULTI SLIDE

Multislide The product can be accommodated by the new drawer tray made from sturdy plastic.

CRASH TEST

Crash-tested The product fulfils the highest safety requirements from Sortimo and has been crash-tested successfully in cooperation with the TÜV, the DEKRA or the ADAC in simulated cases of emergency.

CLICK

Clickable The product can be clicked together with another product with a single hand movement and can therefore be transported to the worksite with one hand.

LOW CO₂

CO₂ reduction due to lightweight construction The product is weight-reduced due to extremely modern lightweight construction, so that you will substantially save fuel and therefore contribute to CO₂ reduction.

3 YEARS

Product warranty Sortimo guarantees a 3 years warranty for these products.

PRO SAFE

ProSafe In this product, the lashing points for the ProSafe hooks are already integrated and quickly ready for use.

M READY

M ready The product fits into the new in-vehicle equipment generation Globelyst M from Sortimo.

Intelligent Mobility with our mobile assortments

Sortimo's innovative strength is reflected in each individual product of the mobile assortments – and this is not only true in terms of progressive design. Owing to intelligent material combinations and best possible quality of workmanship, we can guarantee stability, longevity and safety for all our product solutions. The consistent system compatibility guarantees that each article from our mobile assortments is combinable with all other products of Sortimo in-vehicle equipment. The assortment and all accessories are flexibly applicable and facilitate best possible efficiency in your work routines.

From Workshop to job site

Optimize your work processes with our mobile assortments from Sortimo: Your entire work equipment is neatly arranged and safely stowed in the in-vehicle equipment, yet remains extremely mobile at the same time. Straight out of your workshop, simply click each transport box into the vehicle and transport it – if required on the trolley or caddy – to the job site and then back again into your vehicle. From there, you can conveniently carry everything back to your workshop in the evening.

Metal case

The legendary metal case from Sortimo

Since the market introduction of the first metal case more than 30 years ago, we have been continuously developing our patented classic product to perfection. In terms of functionality, arrangement possibilities and longevity, it fulfils every possible requirement.

For all craftsmen, unwilling to do without an extremely sturdy metal transport case

Special features of the Sortimo metal case

- Extremely sturdy and durable through metal construction
- Hard-wearing powder coating which resists all hardships during everyday work
- High load capacity for transportation of heavy equipment
- Available in four different heights

- Easy carrying through rubberized handle
- Flexible tidiness (partitioning with inset boxes and/or dividers)
- Foam insert in the lid protects small parts inside of the inset boxes from unwanted migration
- Convenient operation of the lid with one hand – can be opened with only two fingers
- Lid can be opened wide (opening angle 120°)

The cases can be secured inside the in-vehicle equipment in various ways, e.g. on the case rails or the multislide tray.

The metal cases are available in the following versions: KM = Small parts case. For the clearly arranged transport of small parts (screw, dowels, etc.).

MULTI SLIDE

The product can be accommodated by the new drawer tray made from sturdy plastic

Inset boxes for containers and drawers

WM = Tool case. The case with dividers for the transport of tools (pliers, screwdrivers, etc.) and power tools (electric drill, disc grinder, cordless screwdriver etc.).

TK = Technicians case. Tidiness for small parts and tools in one tool board.

DK = Nozzle case. Special case for the HVAC branch for the clearly arranged transport of burner nozzles.

DM = Twin level component case. Small parts case combined with tool case, insetboxes and dividers.

With the inset boxes you can partition containers and drawers. They facilitate tidiness and clear visual access to all small parts. You can configure your equipment individually for your demands.

Layer trays made from sheet metal

• More tidiness on two levels with partitioning ratios 1/2, 3/4 and 1/1

Inset boxes

- Perfect tidiness and visual access in three heights and six sizes
- Can be configured individually depending on demand and application
- Can be easily taken out individually

Suspension adapter set

Ref. No. 51011477

The Sortimo T-BOXX suspension adapter set facilitates the fastening of the T-BOXX to the door or sidewall cladding of the in-vehicle equipment. Two are mounted on the carrier material, four are screwed into the T-BOXX bottom.

£ 10.55

This product is not Multislide compatible

All prices exclusive of VAT and shipping. Our delivery and payment terms are applicable. See: www.sortimo.co.uk/GTCT.

Special features of the T-BOXX

- Made from sturdy and highly impact-resistant polypropylene
- Transparent lid made of highly durable polycarbonate
- Wide opening angle for the lid
- Two sturdy locking clasps
- Partitioning with inset boxes for flexible tidiness
- Integrated parking points on the floor and lid always ensure a tight fit of the inset boxes – even if the T-BOXX is not completely filled with inset boxes!
- Every combination between inset boxes with small parts and tools is possible without any problem.
- Rubberized handle for easy carrying
- The TBOXXes can be secured inside the vehicle in different ways.

- Additionally, the T-BOXX can be fastened to the aluminium side panelling of the in-vehicle equipment or to the wing doors of the van.

Users

- For all trades people and service professionals who appreciate quick visual access at the first glance
- For all branches in which quick access to small parts is essential

L-BOXX

The award-winning bestseller: the Sortimo L-BOXXes

The L-BOXX family is the intelligent solution for all mobile job demands in the crafts and service industry.

With its superior ergonomics and seamless integration into the in-vehicle equipment system from Sortimo, the L-BOXX is a unique solution which is unparalleled and unrivalled on the market.

Partnerships for the future

- Many manufacturers of fastening systems and electric power tools have realized the advantages of the L-BOXX system and already use the L-BOXX as transport container and outer packaging.
- Also our customers benefit from our partnerships with renowned manufacturers, as they can work with a fully compatible logistics system.
- Whether you buy a Sortimo L-BOXX from BOSCH, Fischer or other partners – the system remains the same. And it all fits into the leading in-vehicle equipment on the market – Sortimo Globelyst.

Advantages of the L-BOXX

- Mobile logistics solutions in four sizes
- Manufactured from highly impact-resistant ABS plastic
- Two sturdy locking clasps
- Plastic handle integrated into the lid
- Completely compatible with each other
- Clickable without complicated locking system
- Can be quickly separated again
- Available in an empty version or as an equipped set
- Extensive accessories available for individual partitioning
- Branch-specific inserts available for each size
- L-BOXXes can be secured on shelf trays or the multislide tray
- With the separate adapter panels, it becomes the smallest independent, mobile in-vehicle equipment unit in the van
- Handle at the front for easy removal
- Maximum mobility with L-BOXX trolley and caddy

- Safety accessories and construction site accessories available

Special features

- With the CarMo floor plate, particularly suited for transport in the station wagon
- Compatible with the Simpleco shelves from Sortimo

Users

- For all craftsmen and service technicians who place priority on utmost mobility
- Convenient transport and mobile working, from the company to the vehicle, to the job site and back.

Accessories for all L-BOXXes

L-BOXX

With the individual partitioning, every machine or tool can be stored neatly inside the L-BOXX. The possibilities are almost unlimited. The partitioning can be screwed in at will into the floor plate, which in turn is inserted into the L-BOXX. For each L-BOXX size we have a basic set on offer.

The basic set consists of:

- floor plate
- position holders incl. fixing material
- 2 screw sets for screw-mounting of the inset boxes or other accessories

- 6 self-adhesive felt strips for the protection of machines and tools

Additionally, we have divider holders available, which allow partitioning of the L-BOXX with dividers.

The adapter panel for the L-BOXX

With the optional suspension adapters and the adapter panel station, the L-BOXX becomes the smallest, mobile in-vehicle equipment unit from Sortimo. The suspension adapters always click into place into the slots on the adapter plate – no matter on which L-BOXX or position you are.

No other boxes can be safely stowed quicker in any utility vehicle.

LS-BOXX

The L-BOXX family has just become bigger. In the LS-BOXX, you can find two systems combined in one BOXX – a combination between the 136 L-BOXX and removable, smaller i-BOXXes. Therefore, it is particularly suited for the transport of electric tools and small parts in a single transport container

The advantages

- Storage space of the normal L-BOXX 136 on the upper level, with two free trays on the lower
- Two versions available as complete set:
 - with two high i-BOXXes à 72 mm
 - with one low i-BOXX à 53 mm and one open tray

- Like the L-BOXXes, the LS-BOXXes are also compatible with each other
- Therefore, they are also suited for transport on the CarMo floor plate
- **Please note!** The entire range of accessories which is designed for the L-BOXX 136 also fits into the upper level of the LS-BOXX!

i-BOXX

The I-BOXX. Small, lightweight and always on board. Either as a single unit or as part of the LS-BOXX.

Special features

- Transparent lid made of highly durable polycarbonate
- Carcase made of impact-resistant ABS plastic
- Available in two heights

- Can be equipped with the Sortimo inset boxes
- Integrated handle
- The open drawer offers a lot of space and allows quick access
- Both the i-BOXXes and the drawer securely latch into their guide rails
- All parts are available as single pieces

Users

- For all tradesmen and service professionals who appreciate the combination between electric tools and accessories, such as fitters, electricians and others.
- Also in the private household, it is a practical and inexpensive solution for storing everything in one box
